## **Economic Advice And Rhetoric Economic Advice And Rhetoric:**

*Economic Advice and Rhetoric* Onno Bouwmeester, 2010-01-01 This book compares the approaches of consultants and academic advisers and provides an in depth analysis of their advice argumentation Both compete on the market for economic advice with consultants enjoying a larger market share and usually obtaining higher fees However academics criticize them for overcharging shallowness and quick and dirty methods So are consultants clients misled or even cheated Not necessarily The book reveals that academics have drawbacks as well their arguments are less balanced than those of consultants and their estimates contradict each other more Economic Advice and Rhetoric argues that clients should be cautious challenging academics to reconsider their understanding of consulting practices Onno Bouwmeester illustrates that the instrumental concept of academic advice as assumed by mainstream economists and policy scientists does not guide the practice of academic advisers and thus creates wrong expectations He deconstructs the current understanding of academic advice and counters the view held by critical academics that consultants rhetoric is misleading by comparing it to the rhetoric of academics This rhetorical analysis will be informative to academics and advisors with an interest in the subject of consulting Students aiming to become consultants as well as consultants who want to learn more about academic advisers as their competitors will also find this book an invaluable resource

**Beyond Rhetoric and Realism in Economics** Thomas A. Boylan, Paschal Francis O'Gorman, 1995 Boylan and O Gorman inject a fresh empiricist voice into the debate on economic methodology They strike a reasonable middle ground between the extremes of scientific realism and the rhetoric of economics *McCloskey's Rhetoric* Benjamin Balak, 2006 This unique book examines the use of rhetoric in economics focusing on the work of one of the discipline's most recognizable names Deirdre McCloskey It analyzes her major texts and evaluates their methodological and philosophical consequences *The Consequences of Economic Rhetoric* Arjo Klamer, Deirdre N. McCloskey, Robert M. Solow, 1988 The papers in this volume are drawn from a recent conference at Wellesley College for both theoretical and applied economists which explored the consequences of rhetoric and conversation within the field of economics The Moral Rhetoric of Political Economy Paul Turpin, 2011-03-17 Two of the most important economics treatises are Adam Smith's *Theory of Moral Sentiments* and *Wealth of Nations* and Milton Friedman's *Capitalism and Freedom* In this book Paul Turpin provides a rhetorical analysis of these texts arguing that both Smith and Friedman use argumentative and narrative depictions of character to reinforce a sense of societal decorum as a stabilizing foundation for their theories of liberal political economy The comparison of Smith and Friedman by itself is a major contribution to the development of the history of economic thought It adds a new historical depth to the heterodox analyses and critiques of twentieth century economics by writers such as Giocoli and Mirowski The issue of the social constitution of identity which is at the core of this book is a hot topic in economic methodology and as such this book by a promising young historian of economic thought will be roundly applauded Rhetoric in Debt Kellie Sharp-Hoskins, 2023-06-13 In recent years household

indebtedness in the United States reached its highest levels in history From mortgages to student loans from credit card bills to US deficit spending debt is widespread and increasing Drawing on scholarship from economics accounting and critical rhetoric and social theory Kellie Sharp Hoskins critiques debt not as an economic indicator or a tool of finance but as a cultural system Through case studies of the student loan crisis medical debt and the abuses of municipal bonds Sharp Hoskins reveals that debt is a rhetorical construct entangled in broader systems of wealth rule and race Perhaps more than any other social marker or symbol the concept of debt indicates differences between wealthy and poor productive and lazy secure and risky worthy and unworthy Tracking the emergence and work of debt across temporal and spatial scales reveals how it exacerbates vulnerabilities and inequities under the rhetorical cover of individual moral and volitional calculation and equivalency A new perspective on a serious problem facing our society Rhetoric in Debt not only reveals how debt organizes our social and cultural relations but also provides a new conceptual framework for a more equitable world *The Rhetoric of Religious Freedom in the United States* Eric C. Miller, 2020-07-06 Though much has already been written on religious freedom in the United States these treatments have come mostly from historians legal scholars and advocates with relatively little attention from rhetorical critics In *The Rhetoric of Religious Freedom in the United States* fifteen scholars from this field address the variety of forms that free public religiosity may assume and which rhetorical techniques are operative in a public square populated by a diversity of religious political actors Together they consider the arguments evidences and strategies defining what religious freedom means and who is entitled to claim it in the contemporary United States **The Rhetoric of Economics** Deirdre N. McCloskey, 1998-05-15 A classic in its field this pathbreaking book humanized the scientific rhetoric of economics to reveal its literary soul Economics needs to admit that it like other sciences works with metaphors and stories Its most mathematical and statistical moments are properly dominated by comparison and narration that is to say human persuasion The book was McCloskey's opening move in the development of a humanomics and unification of the sciences and the humanities on the field of ordinary business life *The SAGE Handbook of Rhetorical Studies* Andrea A. Lunsford, Kirt H. Wilson, Rosa A. Eberly, 2008-10-29 The *SAGE Handbook of Rhetorical Studies* surveys the latest advances in rhetorical scholarship synthesizing theories and practices across major areas of study in the field and pointing the way for future studies Edited by Andrea A Lunsford and Associate Editors Kirt H Wilson and Rosa A Eberly the Handbook aims to introduce a new generation of students to rhetorical study and provide a deeply informed and ready resource for scholars currently working in the field *Military R&D after the Cold War* Philip Gummett, Mikhail Boutoussov, Janos Farkas, Arie Rip, 2012-12-06 Countries establish defence industries for various reasons Chief among these are usually a concern with national security and a desire to be as independent as possible in the supply of the armaments which they believe they need But defence industries are different from most other industries Their customer is governments Their product is intended to safeguard the most vital interests of the state The effectiveness of these products in the real

rather than the experimental sense is not normally tested at the time of purchase. If or when it is tested many other factors such as the quality of political and military leadership enter into the equation so complicating judgments about the quality of the armaments and about the reliability of the promises made by the manufacturers. All of these features make the defence sector an unusually political industrial sector. This has been true in both the command economies of the former Soviet Union and its satellites and in the market or mixed economies of the west. In both cases to speak only a little over generally the defence sector has been particularly privileged and particularly protected from the usual economic vicissitudes. In both cases too its centrality to the perceived vital interests of the state has given it an unusual degree of political access and support.

*Rhetoric, Inc.* Timothy Johnson, 2020-10-14 In 1914 the Ford Motor Company opened its Motion Picture Laboratory as an in-house operation that produced motion pictures to educate its workforce and promote its products. Just six years later Ford films had found their way into schools and newsreels, travelogues and even feature films in theaters across the country. It is estimated that by 1961 the company's movies had captured an audience of sixty-four million people. This study of Ford's corporate film program traces its growth and rise in prominence in corporate America. Drawing on nearly three hundred hours of material produced between 1914 and 1954, Timothy Johnson chronicles the history of Ford's filmmaking campaign and analyzes selected films' visual and narrative techniques and genres. He shows how what began as a narrow educational initiative grew into a global marketing strategy that presented a vision not just of Ford or corporate culture but of American life more broadly. In these films Johnson uncovers a powerful rhetoric that Ford used to influence American labor, corporate style, production practices, road building, suburbanization and consumer culture. The company's early and continued success led other corporations to adopt similar programs. Persuasive and thoroughly researched, *Rhetoric, Inc.* documents the role that imagery and messaging played in the formation of the modern American corporation and provides a glimpse into the cultural turn to the economy as a source of entertainment value and meaning.

**Rhetorical Style and Bourgeois Virtue** Mark Garrett Longaker, 2015-09-29 During the British Enlightenment the correlation between effective communication and moral excellence was undisputed so much so that rhetoric was taught as a means of instilling desirable values in students In *Rhetorical Style and Bourgeois Virtue* Mark Garrett Longaker explores the connections between rhetoric and ethics in the context of the history of capitalism Longaker's study lingers on four British intellectuals from the late seventeenth to the mid nineteenth century philosopher John Locke political economist Adam Smith rhetorical theorist Hugh Blair and sociologist Herbert Spencer Across one hundred and fifty years these influential men sought to mold British students into good bourgeois citizens by teaching them the discursive habits of clarity sincerity moderation and economy all with one incontrovertible truth in mind the free market requires virtuous participants in order to thrive Through these four case studies written as biographically focused yet socially attentive intellectual histories Longaker portrays the British rhetorical tradition as beholden to the dual masters of ethics and economics and he sheds new light on the deliberate intellectual engineering implicit in Enlightenment pedagogy

**A Socio-Rhetorical Interpretation of the Letter to Philemon in Light of the New Institutional**

**Economics** Alex Hon Ho Ip, 2017-09-15 In this study Alex Hon Ho Ip argues that when Paul wrote to Philemon about Onesimus his main purpose was not to try and reunite as is widely held a runaway slave with his master but rather to have Onesimus accepted as a beloved brother in Christ By examining the letter's inner texture the author shows that Paul's main concern was for Philemon and Onesimus to be reconciled in brotherly love The intertextual weave reveals Paul's theological and ethical thoughts on love which is the basis for the apostle's main argument By taking a new institutional economics approach to help reconstruct the economic relationship between slave and master Alex Hon Ho Ip is able to offer a better understanding of the original relationship Paul argued against With all this in mind the focus is on re-reading the letter and hearing how Paul's rhetoric exhorts a new relationship between Onesimus and Philemon
