Kumanyika, Ruth Enid Zambrana, 2014-12-08 Groundbreaking approaches to preventing and reducing obesity among minority low income and other medically underserved communities in the United States The obesity epidemic has a disproportionate impact on communities that are hard hit by social and economic disadvantages In *Obesity Interventions in Underserved Communities* a diverse group of researchers explores effective models for treating and preventing obesity in such communities The volume provides overviews of the literature at specific junctures of society and health e g the effectiveness of preschool obesity prevention programs as well as commentaries that shape our understanding of particular parts of the obesity epidemic and field reports on innovative approaches to combating obesity in racial ethnic minority and other medically underserved populations in the United States Authors make specific recommendations to policy makers which are designed to reverse the rising rate of obesity dramatically The thirty one literature reviews commentaries and field reports collected here address obesity prevention and treatment programs implemented across a spectrum of underserved populations with particular attention paid to children and adolescents Aimed at students clinicians and community workers in public health and health policy as well as family medicine and pediatrics sociology childhood education and nutrition and deeply informed by fieldwork this book demonstrates the importance of taking a full contextual view both historical and current when considering the challenge of

reversing upward obesity trends among ethnic minorities impoverished people and other underserved populations

Improving Data to Analyze Food and Nutrition Policies National Research Council, Division of Behavioral and Social Sciences and Education, Committee on National Statistics, Panel on Enhancing the Data Infrastructure in Support of Food and Nutrition Programs, Research, and Decision Making, 2005-11-18 Several changes in the United States over the past two decades have implications for diet nutrition and food safety including patterns of food consumption that have produced an increase in overweight and obese Americans and threats to food safety from pathogens and bioterrorism The changes raise a number of critical policy and research questions How do differences in food prices and availability or in households time resources for shopping and food preparation affect what people consume and where they eat How do factors outside of the household such as the availability of stores and restaurants food preparation technology and food marketing and labeling policies affect what people are consuming What effects have food assistance programs had on the nutritional quality of diets and the health of those served by the programs Where do people buy and consume food and how does food preparation affect food safety To address these and related questions the Economic Research Service ERS of the U S Department of Agriculture USDA asked the Committee on National Statistics to convene a panel of experts to provide advice for improving the data infrastructure on food consumption and nutrition The panel was charged to review data needs to support research and decision making for food and nutrition policies and programs in USDA and to assess the adequacy of the current data infrastructure and recommend enhancements to improve it The primary basis for the panel's deliberations given limited resources was a workshop on Enhancing the Data Infrastructure in Support of Food and Nutrition Programs Research and Decision Making which the panel convened on May 27-28 2004 This report is based on the discussions at the workshop and the deliberations of the panel The report outlines key data that are needed to better address questions related to food consumption diet and health discusses the available data and some limitations of those data and offers recommendations for improvements in those data The panel was charged to consider USDA data needs for policy making and the focus of the report is on those needs

Public Health Jay Maddock, 2012-05-16 Human behavior accounts for the majority of morbidity and premature mortality throughout the world This book explores several areas of human behavior including physical activity nutrition and food addictive substances gun violence sexual transmitted diseases and more Several cutting edge methods are also examined including empowering nurses community based participatory research and nature therapy Less well known public health topics including human trafficking tuberculosis control in prisons and public health issues in the deaf community are also covered The authors come from around the world to describe issues that are both of local and worldwide importance to protect and preserve the health of populations This book demonstrates the scope and some of the solutions to addressing today's most pressing public health issues

Public Health Reports, 2000

The Problems of Disadvantaged Youth Jonathan Gruber, 2009-11-15 One of the most important public policy issues in the United States is

how to improve the life prospects of disadvantaged youth who in their formative years face low quality school systems poor access to health care and high crime environments The Problems of Disadvantaged Youth includes a broad range of research examining various aspects of disadvantage and ways of increasing the ability of low income youths to improve their circumstances later in life Taking an empirical economics perspective the nine essays in this volume assess the causal impacts of disadvantage on youth outcomes and how policy interventions can alleviate those impacts Each chapter develops a framework to describe the relationship between youths and later life outcomes addressing such factors as educational opportunity health neighborhood crime rates and employment This vital book documents the serious short and long term negative consequences of childhood disadvantage and provides nuanced evidence of the impact of public policy designed to help needy children *Bibliography of Agriculture with Subject Index* ,1993-05 **Primary and Secondary Preventive**

Nutrition Adrienne Bendich,Richard J. Deckelbaum,2000-11-29 The Nutrition and Health series has been very fortunate to have each of the volumes recognized by rating services such as Doody s as valuable contributions for health professionals and individuals interested in the most up to date and balanced information from the experts in nutrition These independent accolades may have occurred because the Nutrition and Health series has as its overriding mission to provide health professionals with texts that are considered essential because each book includes 1 a synthesis of the state of the science 2 timely in depth reviews by the leading researchers in their respective fields 3 extensive up to date fully annotated reference lists 4 a detailed index 5 relevant tables and figures 6 identification of paradigm shifts and the consequences 7 virtually no overlap of information between chapters but targeted inter chapter referrals 8 suggestions of areas for future research and 9 balanced data driven answers to patient questions which are based upon the totality of evidence rather than the findings of any single study The series volumes are not the outcome of a symposium Rather each editor has the potential to examine a chosen area with a broad perspective both in subject matter as well as in the choice of chapter authors The international perspective especially with regard to public health initiatives is emphasized where appropriate **Current Catalog**
