Economic Democracy Challenge Routledge Revivals:

The State, Class and the Recession (Routledge Revivals) Stewart Clegg, Geoff Dow, Paul Boreham, 2013-10-18 The contributions to this edited collection first published in 1983 are based on two underlying themes The first examines the major recession that took hold of the global economy during the 1980s and assesses its effects on key areas of social structure including political and economic democracy and trade union representation The second theme considers the limitations of state intervention in such changing circumstances with particular reference to the welfare state This is a comprehensive title which is of great relevance to those with an interest in the current global economic situation and the potential impact of this on the welfare state and class structure

Entrepreneurship in Europe (Routledge Revivals) Robert Goffee, Richard Scase, 2015-06-11 The changing character of the economies in Eastern and Western Europe are leading more people to start their own businesses This volume first published in 1987 highlights the trends developing over the closing decades of the twentieth century Although business start up requires financial and marketing skills it also demands important psychological and sociological inputs On the basis of detailed accounts of the relevant social processes this volume describes the varied experiences of entrepreneurship as they are emerging among various groups in both Eastern and Western Europe including the unemployed women ethnic minorities and others This book will be of interest to students of business studies and sociology

The Struggle for Development and Democracy: A General Theory Alessandro Olsaretti, 2023-03-13 In *The Struggle for Development and Democracy* Alessandro Olsaretti argues that we need significantly new theories of development and democracy to answer the problem posed by neoliberalism and the populist backlash namely uneven development and divisive politics heightened by the 9 11 attacks This volume proposes a general theory of development and democracy as part of a unified theory of power emphasizing that development needs markets civil society and the state and also the proper networks and interactions amongst markets civil society and the state Imperialism undermines these interactions and turns countries into providers of cheap land or labour This book begins to sketch the mechanisms at work and to answer one question how did imperialist elites build their power All royalties from sales of this volume will go to GiveWell org in honour of Alessandro Olsaretti s memory

The Challenges of the New Social Democracy Raju J. Das, Jamie Gough, Aram Eisenschitz, 2023-07-10 Raju J Das Jamie Gough and Aram Eisenschitz provide a Marxist critique of new social democracy as the dominant contemporary strategy for local economic and social development In both the global North and South new social democracy seeks to develop social capital strengthen civil society build not for profit enterprises encourage self help and foster community ties It seeks participatory forms of local politics to achieve a local class consensus It promises to improve people s economic and social conditions in the face of neoliberal capitalism and to empower them The authors argue that this strategy is severely limited by and internalises its capitalist environment They show that social enterprise can be developed in socialist ways and contribute to a local politics based in class struggle But

social capital cannot replace the struggle of the exploited and oppressed against capitalism and for a socialist society a strategy which the authors outline for the local scale Challenge of Politics, 4th Edition Neal Riemer,Douglas W. Simon,Joseph Romance,2013-02-15 So often political science is introduced to students as a segmented field The Challenge of Politics instead enables students to see how the subfields converge around a set of crucial questions can we as citizens and students articulate and defend a view of the good political life and its guiding political values Can we develop a science of politics to help us understand significant political phenomena the empirical realities of politics Can we bring a high level of political prudence or wisdom to bear on judgments about politics and public issues Can citizens and students creatively address the future of politics Riemer Simon and Romance aim to harmonize the valuable lessons of classic and contemporary theory as well as to reconcile politics to scientific and empirical study The book gives students an avenue to explore the impact of philosophy and ideology to recognize major forms of government to evaluate empirical findings and to understand how policy issues directly affect people s lives Throughout the authors look at political dynamics of American comparative and international affairs While continuing to pursue its distinctive normative approach and showing politics to be a potentially humanizing enterprise this new edition of Challenge has been revised and updated for major world events like the global financial crisis recent elections in the U S and elsewhere important policy decisions like the recent Supreme Court ruling in the U S on healthcare and the aftermath of the Arab Spring Based on reviewer feedback it has also been substantially streamlined throughout The Revival of the Left in the Balkans Filip Balunović,2024-12-02 This book explores how the critical discursive breakthrough of social movements in Serbia Bosnia and Herzegovina and Croatia disrupted the post socialist transitional status quo While critical ideas have long fueled social and political actions the specifics of their relationship with activism have received limited scholarly attention This book discusses the emergence of new left actors through the lens of a maturation of consciousness rather than the opening of structural or other windows of opportunity suggesting the potential for such actors to emerge stemmed from the exposure of a segment of the populace to critical ideas Questions surrounding the relevance of different types of knowledge in contemporary movements their origins dissemination and the organizational factors shaping their adoption within social movement collectives are central to this work as the author digs into the intricate relationship between critical knowledge and activism explores the cognitive underpinnings of critical social and political engagement and examines the influence of both non theoretical and theoretical knowledge This book will be of great value to postgraduate students and scholars in social sciences particularly those studying social movements and Eastern and Southeastern European politics The Challenge of Economic Revival in Malaysia Wolfgang Kasper,1987 **Challenges to Punjab Economy** Baldev Singh Shergill,Swati Mehta,2023-12-01 This volume looks at the challenges faced by the economy and society in Punjab India It probes into the economic issues institutional development and resources imbalance faced by the Punjab economy It discusses regional research problems and futuristic approaches for a

developing economy The chapters in this volume focus on comprehending economic challenges agrarian structure and development markets R manufacturing sector opportunities and possibilities examine labour caste and gender trajectories exploring the question of freedom and livelihood human social and financial resources development hunger diet and disease challenges for development paradigm present the macro and micro facets of development processes in the region and offer a way forward for long run growth sustainability and inclusiveness amidst the dynamic fast changing economies across the globe Comprehensive and analytical in its approach this volume will be of interest to young researchers scholars practitioners and policymakers working in the fields of Development Economics Regional Economics Evolutionary Economics Sustainable Economics Agrarian Development Manufacturing and Labour Democratizing the Corporation Isabelle Ferreras, Tom Malleon, Joel Rogers, 2024-03-19 Worker representation is the first step toward democratizing the economy Although contemporary Western societies refer to themselves as democratic the bulk of the population spend much of their lives in workplaces that have more in common with tyranny Gigantic corporations such as Amazon Meta Exxon and Walmart are among the richest and most powerful institutions in the world yet accountable to no one but their shareholders The undemocratic nature of conventional firms generates profound problems across society hurting more than just the workplace and contributing to environmental destruction and spiraling inequality Against this backdrop Isabelle Ferreras proposes a radical but realistic plan to democratize the private firm She suggests that all large firms should be bicamerally governed with a chamber of worker representatives sharing equal governance power with the standard board representing owners In response to this proposal twelve leading experts on corporate behavior from multiple disciplines consider its attractiveness viability and achievability as a real utopian proposal to strengthen democracy in our time **Reducing Inequalities**

Towards Sustainable Development Goals Medani P. Bhandari, 2022-09-01 The Sustainable Development Goals SDGs are a set of global goals that meet some of the most pressing challenges facing our world today Goal 10 concerns reducing global inequalities Inequality is currently seen in the social political and economic structures of communities at both the national and international level The United Nations approach to sustainable development is to create a set of goals and targets try to minimize the accelerating gaps of inequality The book presents new insights for evaluating the progress on SDGs especially goal 10 it also boldly sets new economic social and environmental targets for reducing inequality Using case studies this book encourages readers to view economic development through the lens of growing inequalities and disparities Such inequalities are clearly becoming more obvious as the world is better connected and information is quickly shared The books main aim is therefore to direct the efforts of scholars practitioners and policymakers to swiftly find the balance between the three pillars of sustainable development The main challenges and focus of each chapter are different and collectively they give an integrated understanding of the phenomenon of sustainable development and its diverse aspects This book will be useful for policymakers social and environmental activists agencies educators and practitioners in the sphere of social or

environmental economics The methodology of the research can be replicated and taken forward by future researchers in the field

Supranational Institutions and Peacebuilding in Africa Redie Bereketeab, 2024-09-06 This book analyses the role of the African Union and regional economic communities in contributing to peacebuilding in Africa Big and small conflicts rage across the African continent and this book argues that the African Union and the five regional economic communities have the potential to greatly contribute to peace and peacebuilding In Africa Looking across the African Union and the five regional economic communities the AMU ECCAS ECOWAS IGAD and SADC the book considers in detail the organizations programmes engagement endeavours success and failure of activities of peacebuilding in their respective regions Overall the book argues that an institutionalised and formalised relationship between the African Union and the regional economic communities would not only be decisive for the prospects for peace in the region but would also serve to strengthen the continent's role on the global stage through asserting its agency owning its agenda and designing its own solutions and mechanisms for addressing problems Drawing together an international team of prominent experts this book will be of interest to researchers policymakers NGOs activists and regional and international actors working on African politics security governance and economics

Challenges for the Democratisation Process in Tanzania Jonas Ewald, 2013-07-24 Tanzania has been independent in 2011 for 50 years While most neighbouring states have gone through violent conflicts Tanzania has managed to implement extensive reforms without armed political conflicts Hence Tanzania is an interesting case for Peace and Development research This dissertation analyses the political development in Tanzania since the introduction of the multiparty system in 1992 with a focus on the challenges for the democratisation process in connection with the 2000 and 2005 elections The question of to what extent Tanzania had moved towards a consolidation of democracy is analysed by looking at nine different institutions of importance for democratisation grouped in four spheres the state the political civil and economic society Focus is on the development of the political society and the role of the opposition in particular The analysis is based on secondary and primary material collected between September 2000 to April 2010 The main conclusion is that even if the institutions of

liberal democracy have gradually developed in practice single party rule has continued manifested in the 2005 election when the CCM won 92% of seats Despite impressive economic growth poverty remains deep and has not been substantially reduced On a theoretical level this brings the old debate between liberal and substantive democracy back to the fore Neither the economic nor the political reforms have brought about a transformation of the political and economic system resulting in the poor majority gaining substantially more political influence and improved economic conditions Hence it is argued that the interface between the economic political and administrative reforms has not been sufficiently considered in the liberal democratic tradition Liberal democracy is necessary for a democratic development but not sufficient for democracy to be consolidated For that a substantive democratic development is necessary

Handbook of Media Management and Economics Alan B. Albarran, Sylvia M. Chan-Olmsted, Michael O. The Enduring Legacies of the Global Financial Crisis in East Asia Iain Pirie, 2024-07-25 The Enduring Legacies of the Global Financial Crisis in East Asia challenges the assumption that the global financial crisis had a limited structural impact on East Asian political economies arguing that the crisis has led to a significant if uneven reorganization of major national political economies within the region where in response to the crisis states have promoted domestic processes of financialization as a means of stimulating their economies The major East Asian economies bar Japan enjoyed strong recoveries from the 2008 2009 financial crisis However this success has been achieved by promoting domestic processes of financialization to maintain demand more precisely the rapid build up of household debt Malaysia Korea Taiwan China and asset price bubbles China Japan In short East Asia has employed precisely those practices that the global financial crisis itself illustrated the unsustainability of to maintain growth Using a post Keynesian framework the book argues that the dependency on these forms of financialization to support demand is a direct product of a failure to address the issue of inequality High levels of inequality slow the growth of non debt based domestic consumption An alternative approach to supporting demand in the post crisis period would need to focus on progressive redistribution through strengthening of labour rights and systems of social support which would directly challenge the interests of economic and political elites The structural vulnerabilities that accelerated financialization is creating in East Asia demonstrate the necessity of a post Keynesian growth strategy based on redistribution and curbing financialization The book also argues that in certain Northeast Asian economies the crisis has led to a consolidation of systems of industrial activism state control which could have occurred without accelerated financialization and vice versa This book will be of great interest to students and scholars of political economy and Asian studies

Institutions and Economic Development Bryan Cheang, Tom G. Palmer, 2023-04-29 This book is a survey of the field of development studies from a political economy perspective It first reviews the academic literature on development and highlights the fundamental

importance of institutions and social values over and above other alternative theories as determinants in long run development In this context the book draws from the works of Nobel Laureates Douglass North F A Hayek and Elinor Ostrom and argues that the ingredients of property rights the rule of law and market freedoms are essential in generating socio economic progress Successful reforms however are not simply a function of constructing formal institutions but must cohere with the social values norms and cultural commitments of local communities It is in this spirit that the book theorises on the oft neglected role that political entrepreneurs play in driving endogenous institutional change Specifically this book integrates the theoretical discussion on market driven development with a range of case studies from around the world featuring the bottom up efforts of local change agents to pursue institutional reforms and changes in social opinion *F. A. Hayek* A. J. Tebble, 2013-08-01 Volume 13 in the Major Conservative and Libertarian thinkers series focuses on F A Hayek the influential member of the Austrian School of Economics Food Policy Environments: Discursive Effects, Material Consequences Myriam Durocher, Caitlin M. Scott, Irena Knezevic, 2022-07-26 Northern Neighbours John Bryden, 2015-03-23 This edited collection of essays covers various elements of the analysis of Norway and Scotland including land ownership politics agriculture industry money and banking local government education religion access and the outdoor life as well as se **The North American Idea** Robert A. Pastor, 2011-07-21 In its first seven years the North American Free Trade Agreement NAFTA tripled trade and quintupled foreign investment among the U S Mexico and Canada increasing its share of the world economy In 2001 however North America peaked Since then trade has slowed among the three manufacturing has shrunk and illegal migration and drug related violence have soared At the same time Europe caught up and China leaped ahead In *The North American Idea* eminent scholar and policymaker Robert A Pastor explains that NAFTA's mandate was too limited to address the new North American agenda Instead of offering bold initiatives like a customs union to expand trade leaders of the three nations thought small Interest groups stalemated the small ideas while inhibiting the bolder proposals and the governments accomplished almost nothing To overcome this resistance and reinvigorate the continent the leaders need to start with an idea based on a principle of interdependence Pastor shows how this idea once woven into the national consciousness of the three countries could mobilize public support for continental solutions to problems like infrastructure and immigration that have confounded each nation working on its own Providing essential historical context and challenging readers to view the continent in a new way *The North American Idea* combines an expansive vision with a detailed blueprint for a more integrated dynamic and equitable North America
