Economic Justice Race Gender Identity And Economics University Casebook Series:

Economic Justice Emma Coleman Jordan, Angela P. Harris, 2005 *Economic Justice Race Gender Identity and Economics* is a new casebook offered as a means to further the conversation between critical legal scholarship and law and economics. The phrase economic justice signals the authors aim to engage these two cultures and to find the answer to questions such as: What can economics tell us about democracy and the law? What can theories of justice tell us about economic theory and the law? Why is there no legal language of class in the United States and what might one look like? *Economic Justice Race Gender Identity and Economics* also uses the problem of racial and gender injustice as a site to interrogate both critical theory and economic theory. Just as race, gender, and class seem inextricably intertwined, economic and critical analysis both seem crucial to unraveling the knot of racial and gender inequality. **The AALS Directory of Law Teachers**, 2005 **Washington University Journal of Law and Policy**, 2005 **U.C. Davis Law Review** University of California, Davis. School of Law, 2014-04 *Whitaker's Books in Print*, 1998 *Forthcoming Books* Rose Arny, 1994-02 *Books in Print*, 1991

Introducing Race and Gender into Economics Robin L. Bartlett, 2002-09-11 Economics has tended to be a very male, middle class white discipline. *Introducing Race and Gender into Economics* is a ground breaking book which generates ideas for integrating race and gender issues into introductory economics courses. Each section gives an overview of how to modify standard courses including macroeconomics, methodology, microeconomics, as well as race and gender sensitive issues. This up to date work will be of increasing importance to all teachers of introductory economics. **Race, Economic Justice and Community Lawyering in the New Century**, 2007 **The Hidden Rules of Race** Andrea Flynn, Dorian T. Warren, Felicia J. Wong, Susan R. Holmberg, 2017-09-08 Why do black families own less than white families? Why does school segregation persist decades after *Brown v. Board of Education*? Why is it harder for black adults to vote than for white adults? Will addressing economic inequality solve racial and gender inequality as well? This book answers all of these questions and more by revealing the hidden rules of race that create barriers to inclusion today. While many Americans are familiar with the histories of slavery and Jim Crow, we often don't understand how the rules of those eras undergird today's economy, reproducing the same racial inequities 150 years after the end of slavery and 50 years after the banning of Jim Crow segregation laws. This book shows how the fight for racial equity has been one of progress and retrenchment, a constant push and pull for inclusion over exclusion. By understanding how our economic and racial rules work together, we can write better rules to finally address inequality in America. *When Markets Fail* Emma Coleman Jordan, Angela P. Harris, 2006 This book provides the foundation for thinking outside the box of conventional legal strategies and arguments to make visible new and more creative paths toward racial justice. For example, how are familiar legal debates like the one over affirmative action transformed when seen from a perspective incorporating a sophisticated understanding of the relationship between race and class and a vision enriched by both efficiency and justice concerns? Will market competition do away with racial

discrimination How does the empirical evidence of persistent discrimination fit with neoclassical economic claims that over time markets are race neutral This book provides the resources for developing a multifaceted approach to racial justice Race and class have long been inextricably intertwined in American society From this perspective neither political struggles nor economic strategies alone can dissolve the knot of racial inequality Belief systems everyday practices and social norms undergird the operation of all institutions public and private and in the United States race has historically played an important role in shaping these beliefs practices and norms Thus serious students of inequality should understand the strengths and weaknesses of both market and government regulation Moreover students should understand that both market and government institutions are rooted in culture This book is the answer for faculty teaching courses about discrimination and looking for materials that take seriously the problem of racial subordination and provide in depth rigorous analyses of economic frameworks contributing to inequality

Race, Markets, and Social Outcomes Patrick L. Mason,Rhonda M. Williams,2012-12-06 THE JANUS FACE OF RACE REFLECTIONS ON ECONOMIC THEORY Patrick L. Mason and Rhonda Williams Many economists are willing to accept that race is a significant factor in US economic and social affairs Yet the professional literature displays a peculiar schizophrenia when faced with the task of actually formulating what race means and how race works in our political economy On the one hand race matters when the discussion is focused on anti social behavior social choices and undesired market outcomes Inexplicably African Americans are more likely to prefer welfare lower labor force participation and unemployment On the other hand race does not matter when the subject of discussion is economically productive or socially acceptable activities and legal market choices for example wages and employment This Janus faced construction of race is maintained by economists stubborn adherence to the market power hypothesis The market power hypothesis asserts that racial discrimination and market competition are inversely correlated Discriminatory behavior will persist only in those sectors of society where the competitive forces of the market are least operative When applied to the labor market the market power hypothesis suggests that pre and post labor market decisions represent disjoint sets On average members of a disadvantaged social group may accumulate a lower amount of or a lower quality of productive attributes because of discrimination in marital residential or school choice or because of substantial animosity in day to day interpersonal relations with members of a privileged group

Economic Freedom and Social Justice Wanjiru Njoya,2021-11-01 This book analyses the egalitarian foundations of equality law from a classical liberal perspective by asking two central questions does justice ideally demand equality Are differences in abilities among people in some sense unfair The book examines these questions in the context of racial diversity Racial justice as a component of social justice is often considered to be so emotionally and morally compelling that its implications for economic

freedom are rarely subjected to critical scrutiny In defending the classical ideal of formal equality in contexts of racial diversity this book questions the ethical status of egalitarian social and moral ideals Economic Freedom and Social Justice argues that egalitarian ideals like all subjective value judgements must be subjected to critical intellectual inquiry rather than treated axiomatically Drawing upon the legal framework in the UK and other common law jurisdictions this book shows some of the ways in which egalitarian ideals in addition to resting on false premises are costly harmful and ultimately inimical to justice and liberty The book argues that legal entitlements and policy guidelines constructed upon notions of racial equity are wrongly constituted as the main prism through which liberal market democracies govern private relationships including the employment relationship Written in a clear and forthright style this book will be of interest to students and scholars in law economics philosophy and political economy The Economics of Discrimination Gary Stanley Becker,1957 Race, Class, and Gender Margaret L. Andersen,Patricia Hill Collins,1992 This anthology focuses on race class and gender from a sociological perspective The readings examine these topics as interlocking categories of experience looking at the way that they shape the experience of persons in different social institutions Race, Class, and Gender Margaret L. Andersen,2004 There are 64 interdisciplinary readings in this text that show how race class gender shape people s experiences The volume provides conceptual grounding in understanding these issues with a strong historical sociological perspective **Special Issue on Economic Justice** ,1999 **Understanding Inequality** Barbara A. Arrighi,2007 As the age of globalization and New Media unite disparate groups of people in new ways the continual transformation and interconnections between ethnicity class and gender become increasingly complex This reader comprised of a diverse array of sources ranging from the New York Times to the journals of leading research universities explores these issues as systems of stratification that work to reinforce one another Understanding Inequality provides students and academics with the basic hermeneutics for considering new thought on ethnicity class and gender in the 21st century
