Gis Organisations And People A Socio Technical:

GIS, Organisations and People James Petch, 2019-08-08 GIS projects have previously been viewed primarily as technical exercises but it is now evident that the success of GIS projects depends as much upon organisational issues as upon technicalities GIS projects have socio organisational contexts which must be taken into account if such projects are to succeed The book presents an overview of the human side of GIS both individual and organisational *GIS, Organisations, and People* Derek E. Reeve, 1999 **Socio-Economic Applications of Geographic Information Science** David

Kidner, Gary Higgs, Sean White, 2002-12-05 To date no one volume in the Innovations in GIS series has been given over to solely highlighting the use of up to date GIS based techniques in a range of socio economic applications This monograph redresses this gap The book begins with a short introductory chapter on the fundamental principles of GIS followed by an examination of recent **Geographic Information Systems in Business** James B. Pick, 2005-01-01 This book contains state of the art research studies on the concepts theory processes and real world applications of geographical information systems GIS in business Its chapters are authored by many of the leading experts in applying GIS and geospatial science to business The book utilizes a wide variety of approaches and methodologies including conceptual theory development research frameworks quantitative and qualitative methods case studies systems design DSS theory and geospatial analysis combined with point of sale Since relatively little research has been published on GIS in business this book is pioneering and should be the principal compendium of the latest research in this area The book impacts not only the underlying definitions concepts and theories of GIS in business and industry but its practice as well **Geographic Information Management**

in Local Government Ian Gilfoyle, Peter Thorpe, 2016-04-19 As early pioneers in the use of digital geographic data many local governments in the UK were ahead of their counterparts in central government and the private sector in the application of GIS technology To meet current challenges local authorities must coordinate the latest technology with effective information management strategies human and *Geographic Information Systems to Spatial Data Infrastructures* Ian Masser, 2019-09-25 This book draws on author's wealth of knowledge working on numerous projects across many countries It provides a clear overview of the development of the SDI concept and SDI worldwide implementation and brings a logical chronological approach to the linkage of GIS technology with SDI enabling data The theory and practice approach help understand that SDI development and implementation is very much a social process of learning by doing The author masterfully selects main historical developments and updates them with an analytical perspective promoting informed and responsible use of geographic information and geospatial technologies for the benefit of society from local to global scales Features Subject matter spans thirty years of the development of GIS and SDI Brings a social science perspective into GIS and SDI debates that have been largely dominated by technical considerations Based on a world wide perspective as a result of the author's experience and research in the USA Australia Canada Brazil Peru China India Korea Malaysia and Japan as

well as most European countries Draws upon professional and academic experience relating to pioneering UK and European GIS research initiatives Includes updated historical material with an analytical perspective explaining what was done right and what didn't work *Geospatial Semantics and the Semantic Web* Naveen Ashish, Amit P. Sheth, 2011-06-11 The availability of geographic and geospatial information and services especially on the open Web has become abundant in the last several years with the proliferation of online maps geo coding services geospatial Web services and geospatially enabled applications The need for geospatial reasoning has significantly increased in many everyday applications including personal digital assistants Web search applications local aware mobile services specialized systems for emergency response medical triaging intelligence analysis and more *Geospatial Semantics and the Semantic Web Foundations Algorithms and Applications* an edited volume contributed by world class leaders in this field provides recent research in the theme of geospatial semantics This edited volume presents new information systems applications that have potential for high impact and commercialization Also special effort was made by the contributors to focus on geospatial ontology development related standards geospatial ontology alignment and integration and algorithmic techniques for geospatial semantics Case studies and examples will be provided throughout this book as well as possibilities for future research *GIS for Sustainable Development* Michele Campagna, 2005-08-29 GIS for Sustainable Development examines how GIS applications can improve collaboration in decision making among those involved in promoting sustainable development This volume reviews leading GIScience providing an overview of research topics and applications that enable GIS newcomers and professionals to apply GIScience methods to sustain *GIS in Law Enforcement* Mark R. Leipnik, Donald P. Albert, 2002-11-07 This is the ideal book for GIS users in law enforcement who want to learn more about the technology or who wish to get started using GIS in their agency Crime analysts teachers and students of criminal justice will also gain valuable insights into a suite of powerful technological tools ideally suited for crime mapping and analysis from this com **Research and Theory in Advancing Spatial Data Infrastructure Concepts** Harlan Joseph Onsrud, 2007 Spatial data infrastructures SDIs have come a long way in the last two decades **Spatial Data Infrastructures at Work** Ezra Dessers, 2013-07-04 Spatial data identifies the geographic location of natural and constructed features and boundaries on Earth and has become increasingly important in various administrative practices In order to facilitate access use and sharing of spatial data among organisations information is brought together in clustered initiatives known as Spatial Data Infrastructures SDIs In *Spatial Data Infrastructures at Work* Ezra Dessers introduces spatial enablement as a key concept to describe the realisation of SDI objectives in the context of individual public sector processes Drawing on four years of research Dessers argues that it has become essential even unavoidable to manage and re design inter organisational process chains in order to further advance the role of SDIs as an enabling platform for a spatially enabled society Detailed case studies illustrate that the process he describes is the setting in which one can see the SDI at work This book is must read material for academics practitioners and policymakers dealing

with sdi and spatial enablement By extension the book will also be of great interest to anyone confronted with societal issues that call for an integrated approach implying in depth cooperation between multiple organisations Spatial Information and the Environment Peter Halls,2003-09-02 There is considerable current academic interest in the interface between geographical information systems GIS and the environment This new monograph explores the process from start to finish It begins with information acquisition in the environment and moves on to tool and techniques for manipulating the information visualisation and navigation methods for exploring it and computation and modelling techniques for its analysis It then concludes with a survey of decision support for its application Spatial Information and the Environment is the eighth book in the Innovations in GIS series initiated in 1994 The series is in essence derived from a selection of the presentations made at the annual GIS Research UK conference 2000 held in York and has now changed its focus by concentrating on a single topic making each text distinctive **Information and Communication Technology for Competitive Intelligence** Dirk Jaap Vriens,2004-01-01 In today s complex and dynamic world the need to be informed about what is going on in the environment of the organization is increasing rapidly To this end organizations implement a process called competitive intelligence Competitive intelligence CI is about gathering and analyzing environmental information for strategic purposes However the noncritical implementation of these tools may lead to an information overload or to environmental myopia To select the right ICT tools for CI an organization needs to understand the role of ICT in the CI process Information and Communication Technology for Competitive Intelligence addresses this need It assesses the role and possibilities of ICT in the intelligence activities from different perspectives **Enacting Electronic Government Success** J. Ramon Gil-Garcia,2012-02-25 Many countries around the world are investing a great amount of resources in government IT initiatives However few of these projects achieve their stated goals and some of them are complete failures Therefore understanding e government success has become very important and urgent in recent years In order to develop relevant knowledge about this complex phenomenon researchers and practitioners need to identify and assess what are the main conditions variables or factors that have an impact on e government success However before being able to evaluate these impacts it is necessary to define what e government success is and what some e government success measures are This book presents a review of both e government success measures and e government success factors It also provides empirical evidence from quantitative analysis and two in depth case studies Although based on sound theory and rigorous empirical analysis the book not only significantly contributes to academic knowledge but also includes some practical recommendations for government officials and public managers Theoretically the book proposes a way to quantitatively operationalize Fountain s enactment framework Based on the institutional tradition the technology enactment framework attempts to explain the effects of organizational forms and institutional arrangements on the information technology used by government agencies According to Fountain 1995 2001 the technology enactment framework pays attention to the relationships among information technology

organizations embeddedness and institutions This framework is very well known in the e government field but is normally used for qualitative analysis and there is no previous proposal of how to use it with quantitative data The book proposes variables to measure each of the different constructs in this framework and also tests the relationships hypothesized by Fountain s theory Finally using the advantages of the selected quantitative analysis technique Partial Least Squares the study also proposes some adjustments and extensions to the original framework in a theory building effort Methodologically the book reports on one of the first multi method studies in the field of e government in general and e government success in particular This study uses a nested research design which combines statistical analysis with two in depth case studies The study begins with a statistical analysis using organizational institutional and contextual factors as the independent variables An overall score representing e government success in terms of the functionality of state websites is the dependent variable Second based on the statistical results two cases are selected based on their relative fitness to the model residuals and their position in the general ranking of website functionality which includes four different measures In order to complement the results of the statistical analysis case studies were developed for the two selected states New York and Indiana using semi structured interviews and document analysis In terms of the statistical analysis the book constitutes one of the first applications of Partial Least Squares PLS to an e government success study PLS is a structural equations modeling SEM technique and therefore allows estimating the measurement model and the structural model simultaneously The use of this sophisticated statistical strategy helped to test the relationships between e government success and different factors influencing it as well as some of the relationships between several of the factors thus allowing exploring some indirect effects too

Effective Public Administration Strategies for Global "New Normal" Perfecto G. Aquino Jr.,Revenio C. Jalagat Jr.,2022-08-05 This book analyzes the recent discussions on the practices issues challenges and strategies of various public organizations and service organizations in light of the ongoing global pandemic The book investigates how such organizations have managed to sustain the changes brought on to operations due to the new normal business environment and in doing so provides lessons and insights on how similar strategies could be implemented successfully in other organizations This book would be a valuable read for policy makers decision makers of public organizations and scholars

Cybercartography D.R. Fraser Taylor,Tracey Lauriault,2006-01-12 For generations the map has been central to how societies function all over the world Cybercartography is a new paradigm for maps and mapping in the information era Defined as the organization presentation analysis and communication of spatially referenced information on a wide variety of topics of interest to society cybercartography is presented in an interactive dynamic multisensory format with the use of multimedia and multimodal interfaces Cybercartography Theory and Practice examines the major elements of cybercartography and emphasizes the importance of interaction between theory and practice in developing a paradigm which moves beyond the concept of Geographic Information Systems and Geographical Information Science It argues for the

centrality of the map as part of an integrated information communication and analytical package This volume is a result of a multidisciplinary team effort and has benefited from the input of partners from government industry and other organizations The international team reports on major original cybercartographic research and practice from a variety of disciplinary perspectives including the humanities social sciences including human factors psychology cybernetics English literature cultural mediation cartography and geography This new synthesis has intrinsic value for industries the general public and the relationships between mapping and the development of user centered multimedia interfaces Discusses the centrality of the map and its importance in the information era Provides an interdisciplinary approach with contributions from psychology music and language and literature Describes qualitative and quantitative aspects of cybercartography and the importance of societal context in the interaction between theory and practice Contains an interactive CD Rom containing color images links to websites plus other important information to capture the dynamic and interactive elements of cybercartography

Technological Communities and Networks Dimitris Assimakopoulos, 2007-05-17 The first book to analyze how new technologies are emerging against a background of continuing globalization of research and development activities This unique book explores how technological communities and networks shape a broad range of new computer based technologies in regional national and international contexts Offering a critique of exist *Environmental Modelling, Software and Decision Support* Anthony J. Jakeman, Alexey A. Voinov, Andrea E. Rizzoli, Serena H. Chen, 2008-09-11 The complex and multidisciplinary nature of environmental problems requires that they are dealt with in an integrated manner Modeling and software have become key instruments used to promote sustainability and improve environmental decision processes especially through systematic integration of various knowledge and data and their ability to foster learning and help make predictions This book presents the current state of the art in environmental modeling and software and identifies the future challenges in the field State of the art in environmental modeling and software theory and practice for integrated assessment and management serves as a starting point for researchers Identifies the areas of research and practice required for advancing the requisite knowledge base and tools and their wider usage Best practices of environmental modeling enables the reader to select appropriate software and gives the reader tools to integrate natural system dynamics with human dimensions Information Systems Research Bonnie Kaplan, Duane P. Truex, David Wastell, A. Trevor Wood-Harper, Janice I. DeGross, 2006-04-11 Information Systems Research Relevant Theory and Informed Practice comprises the edited proceedings of the WG8 2 conference Relevant Theory and Informed Practice Looking Forward from a 20 Year Perspective on IS Research which was sponsored by IFIP and held in Manchester England in July 2004 The conference attracted a record number of high quality manuscripts all of which were subjected to a rigorous reviewing process in which four to eight track chairs associate editors and reviewers thoughtfully scrutinized papers by the highly regarded as well as the newcomers No person or idea was considered sacrosanct and no paper made it through this process unscathed All authors were asked to revise the

accepted papers some more than once thus good papers got better With only 29 percent of the papers accepted these proceedings are significantly more selective than is typical of many conference proceedings This volume is organized in 7 sections with 33 full research papers providing panoramic views and reflections on the Information Systems IS discipline followed by papers featuring critical interpretive studies action research theoretical perspectives on IS research and the methods and politics of IS development Also included are 6 panel descriptions and a new category of bright idea position papers 11 in all wherein main points are summarized in a pithy and provocative fashion

Sustainability Impact Assessment of Land Use Changes Katharina Helming, Marta Pérez-Soba, Paul Tabbush, 2008-06-11

There are many reasons why strategic intelligence is required to support policy decisions These primarily stem from the nature of today's knowledge society with two contrasting trends On the one hand there is a trend of increasing human intelligence in the economic social and political systems On the other hand there is a trend towards dissolving certainties about the problems and solutions of today's society Clearly more information does not necessarily imply more certainties on how to act What is more the same facts are often interpreted in markedly different ways the same policy relevant information can and often does result in conflicting framing of a problem by different stakeholders This is mainly due to competing assumptions rather than because of inconsistent facts The fore it is not surprising that policy makers are calling for strategic intelligence to support their understanding of today's challenges including the relevant aspects of science and technology their impact and their possible future developments Over the last 15 years Europe has rapidly adopted the practice of developing and using Impact Assessment IA tools to support decision making Formal procedures and guidance for IA are well established within the European Commission and in most EU Member States The adoption of IA procedures alone however does not guarantee that every policy domain is actually using the full potential of these assessment tools in the preparation of policies and legislation
