community that meets their needs Strategies outlined here focus primarily on promoting shared authority visibility and voice and on encouraging student disclosure of needs and peer connection

Growing Up Suburban Edward A. Wynne, 2014-09-10 The prosperous comfortable and homogeneous American suburb is a relatively recent institution in American history Edward Wynne was one of the first to take a serious look at the quality of suburban childhood where he contends we have ignored the developments affecting the largest pool of children and parents in America This provocative volume argues that the total environment of the suburban youth the school the community the family and the workplace is in need of drastic reform Wynne advances a forthright argument for the preservation of traditional moral values and criticizes excessive individualism in fragmented modern society Focusing on the schools and extending his discussion to the larger community he pleads for more attention to such goals as honesty persistence patriotism and loyalty Post industrial suburban environments Wynne argues do not provide

the diversity of experience children must have to become successful adults Strong community ties to the schools are basic to Wynne's thesis Within the schools he recommends changes in grading systems student responsibilities and assignments selection and training of teachers and administrators structuring and evaluation of programs and the socioeconomic and age mix of pupils A feeling of cooperation and unity within the school itself is a major goal Wynne also suggests steps for moving toward more heterogeneous close knit communities where citizens have greater local control For example community members could restrict movement into the community and should aim for a mix of blue and white collar residents Wynne's arguments clearly run counter to fashion and are sure to provoke a high level of debate among educators of differing philosophic persuasions Civil libertarians feminists civil rights advocates and others are bound to make spirited replies to many of Wynne's contentions *Growing Up Suburban* will be of interest to educators public school administrators parents and suburban dwellers

**Mindfulness-Based Play-Family Therapy: Theory and Practice** Dottie Higgins-Klein,2013-09-09 Incorporating mindfulness and family therapy into play family sessions When a child is offered a space to relax the busy mind his experience is comparable to mindfulness meditation Therapists can help children remain in this calm state in the state of the present moment if they have the right tools and techniques to do so During this stillness a child can reach a level of

consciousness that is parallel to the deepened awareness that occurs during mindfulness meditation. Conducting play sessions in this stage allows for healing and progress. Not only can the symptoms of children's pain be reduced in intensity and duration but their self-esteem can be enhanced. This book presents a new and comprehensive framework for helping children through play therapy within the context of the family and incorporating ideas from the practice of mindfulness. This experience-based therapeutic model respectfully derives from the best roots of traditional family therapy and play therapy modalities. Additionally, it draws from child development theory, interpersonal neurobiology, and mindfulness. Either spontaneous play or directed play can be used according to the need. *The Journal of Social Work Process*, 1969
