Eurocentrism at the Margins Lutfi Sunar,2016-05-05 Eurocentrism remains a prevailing feature of Western dominated social scientific perspectives tending to ignore alternative views originating outside the West and thus maintaining a form of scholarly hegemony As such there is an urgent need to reconsider Eurocentrism in social science to ask whether it constitutes an obstacle to understanding social problems and whether it is possible to go beyond Eurocentrism in the construction of reliable more universal knowledge At the same time certain questions persist particularly with regard to the extent to which recent revisionist challenges have really contributed to the surmounting of Eurocentric domination and whether the constant repetition of the concept serves to reinforce it This book engages with the central problems of Eurocentrism in the social sciences bringing together the work of scholars from around the world to offer a critique of this perspective from both European and non European positions thus shedding light on the binaries that often come into being in debates in this field Thematically organised and addressing a range of questions including Eurocentrism in historical studies in the understanding of religion and civilisation and in the study of international relations as well as in the institutionalisation and professionalisation of research and discourses on modernisation in the Middle East Eurocentrism at the Margins will appeal to scholars with interests in knowledge production and circulation and Eurocentrism and post colonialism in the social sciences **The Socio-Political Practice of Human Rights** Kiran Kaur Grewal,2016-06-23 This book examines discourses of rights and practices of resistance in post conflict societies exploring the interaction between the international human

rights framework and different actors seeking political and social change Presenting detailed new case studies from Sierra Leone Sri Lanka and Kosovo it reveals the necessity of social scientific interventions in the field of human rights The author shows how a shift away from the realm of normative political or legal theory towards a more sociological analysis promises a better understanding of both the limits of current human rights approaches and possible sites of potential Considering the diverse ways in which human rights are enacted and mobilised The Socio Political Practice of Human Rights engages with major sites of tension and debate examining the question of whether human rights are universal or culturally relative their relationship to forms of economic and political domination the role of law as a mechanism for social change and the ways in which the language of human rights facilitates or closes sites of radical resistance By situating these debates in specific contexts this book concludes by proposing new ways of theorizing human rights Empirically grounded and offering an alternate framework for understanding the fluid and ambiguous operation of power within the theory and practice of human rights this volume will appeal to scholars of sociology law and politics with interests in gender resistance international law human rights and socio legal discourse *The World-Making Power of New Media* Barrie Axford, 2017-09-22 In this new work Axford seeks to contribute to the development of global theory particularly where it engages with the contested idea of globality a concept which musters as consciousness condition framework even system By examining emergent globalities through the lens of world making communicative practices and forms the author demonstrates their transformative social power and underlines the cultural dynamics of globalization Taking a critical view of much of the current scholarship on emergent globalities Axford steps outside the rationalist territorialist conceptions of association and order and takes issue with those who advise there is a widespread myth of media globalization The book examines global communicative connectivity using digital or new media especially the Internet as the prime exemplar of global process As well as the academic importance of such themes for theory building the strategic real world impacts of communicative connectivity are palpable Thus the welter of debate around the influence of the Internet on democracy democratization revolt and collective action generally have real purchase when discussed in relation to the events of the uprisings in MENA anti capitalist protests in London and New York and the tribulations of the EU in recent months years Using such exemplars the book assesses claims for the existence and robustness of global society the significance of cosmopolitan communication and the extent of global consciousness This work will be of interest to students and scholars of globalization international relations and media and cultural studies *The Art and Science of Sociology* Roland Robertson, John Simpson, 2016-07-06 A festschrift honoring the work of Edward A Tiryakian consisting of a large number of essays *Beyond The Chinese Connection* Crystal S. The Routledge Handbook of Archaeology and Globalization Tamar Hodos, 2016-11-18 This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists The volume spans from as early as 10 000 cal BP to the modern era analysing the relationship between material culture complex connectivities between communities and groups and cultural change Each contributor considers globalization ideas explicitly to explore the socio cultural connectivities of the past In considering social practices shared between different historic groups and also the expression of their respective identities the papers in this volume illustrate the potential of globalization thinking to bridge the local and global in material culture analysis The Routledge Handbook of Archaeology and Globalization is the first such volume to take a world archaeology approach on a multi period basis in order to bring together the scope of evidence for the significance of material culture in the processes of globalization This work thus also provides a means to understand how material culture can be used to assess the impact of global engagement in our contemporary world As such it will appeal to archaeologists and historians as well as social science researchers interested in the origins of globalization

OUR CONNECTION WITH THE ELEMENTAL WORLD Rudolf Steiner, 2016-11-14 The heart of this volume comprises Rudolf Steiner's commentary on the elemental forces that are responsible for our earthly nature as human beings forces that influence us through our membership of a national or geographical group When such elemental forces are not recognised and understood he states they cause conflict and chaos However Steiner indicates an important accompanying task that calls upon each human being to develop individuality emancipating ourselves from the earthly influences underlying national and racial groups These great themes are framed by Rudolf Steiner's pioneering research into the two major Northern folk poems the Kalevala and The Dream Song of Olaf steson The former tells of the elemental spirits who created the conditions for our earthly incarnation whereas the Dream Song has to do with the drama of excarnation the journey of the human soul after death Linking these vast motifs is Steiner's unique description of the mission and tasks of the Russian people and the contrast of their destiny to the North American people who he says are dominating the Earth for a brief period of increasing

splendour Steiner explains how elemental beings responsible for the balance of land and sea have created conditions where various peoples are enabled to develop their gifts and fulfil their destinies Thus he speaks of Finland as the ancient conscience of Europe Russia as the future bearer of the Christ imbued Spirit Self and the differing but complementary environments of Germany and Britain Strikingly he states that no souls on Earth love one another more than those living in Central Europe and those living in the British Isles Rudolf Steiner also speaks of the necessary work of luciferic and ahrimanic beings that collaborate to enable the solid spatial forms of our physical bodies Likewise they influence our etheric and astral bodies facilitating thinking feeling and will to be imbued with life and consciousness

The Cambridge World History: Volume 7, Production, Destruction and Connection, 1750-Present, Part 2, Shared Transformations? J. R. McNeill, Kenneth Pomeranz, 2015-04-16

Since 1750 the world has become ever more connected with processes of production and destruction no longer limited by land or water based modes of transport and communication Volume 7 of the Cambridge World History series divided into two books offers a variety of angles of vision on the increasingly interconnected history of humankind The second book questions the extent to which the transformations of the modern world have been shared focusing on social developments such as urbanization migration and changes in family and sexuality cultural connections through religion science music and sport ligaments of globalization including rubber drugs and the automobile and moments of particular importance from the Atlantic Revolutions to 1989 Rethinking Ideology in the Age of Global Discontent Barrie Axford, Didem

Buhari-Gulmez, Seckin Baris Gulmez, 2017-12-01 Over the last decade anti government demonstrations worldwide have

brought together individuals and groups that were often assumed unlikely to unite for a common cause due to differences in ideological tendencies. They have particularly highlighted the role of youth, women, social media and football clubs in establishing unusual alliances between far left and far right groups and/or secular and religious segments of the society. In this wide-ranging volume, the contributors question to what extent political ideologies have lost their explanatory power in contemporary politics and society. This book aims to contribute to the ongoing debates about the relationship between ideology and public protests by introducing the global context that allows the comparison of societies in different parts of the world in order to reveal the general patterns underlying the global era. Tackling a highly topical issue, this book will be of particular interest to students and scholars of international relations, social movements and globalization. **Routledge**

Handbook of Cosmopolitanism Studies Gerard Delanty, 2012-05-23 Pt 1 Cosmopolitan theory and approaches pt 2 Cosmopolitan cultures pt 3 Cosmopolitics pt 4 World varieties of cosmopolitanism *Chinese Globalization* Jiaming Sun, William Scott Lancaster, 2013 This book examines the explicit effects of global connectivity on local culture and society in post-reform mainland China. It focuses on individual-level globalization in China and how global socialization impacts local residents' behaviors, lifestyle, value orientation and the consequence of local transformation. Asking questions such as: What types of individual global connections have emerged and developed in China over the last three decades? What aspects of local transformations are influenced by such global connections? How does the impact of global connections vary across different aspects of local communities and institutions? Jiaming Sun uses an original micro-level relational approach to analyse how different types of individual global connections may make a difference and constitute certain outcomes of local transformation, the outcome being that global connections are capable of facilitating local transformation across different spatial, economic and cultural settings. **Philosophical Aspects of Globalization: A Multidisciplinary Inquiry**
