Global Energy Justice Problems Principles And Practices:

Global Energy Justice Benjamin K. Sovacool, Michael H. Dworkin, 2014-09-29 We need new ways of thinking about and approaching the world's energy problems Global energy security and access is one of the central justice issues of our time with profound implications for happiness welfare freedom equity and due process This book combines up to date data on global energy security and climate change with fresh perspectives on the meaning of justice in social decision making Benjamin K Sovacool and Michael H Dworkin address how justice theory can help people to make more meaningful decisions about the production delivery use and effects of energy Exploring energy dilemmas in real life situations they link recent events to eight global energy injustices and employ philosophy and ethics to make sense of justice as a tool in the decision making process They go on to provide remedies and policies that planners and individuals can utilize to create a more equitable and just energy future

Energy Justice Raya Salter, Carmen G. Gonzalez, Elizabeth Ann Kronk Warner, 2018-11-30 Energy Justice US and International Perspectives is a pioneering analysis of energy law and policy through the framework of energy justice While climate change has triggered unprecedented investment in renewable energy the concept of energy justice and its practical application to energy law and policy remain under theorized This volume breaks new ground by examining a range of energy justice regulatory challenges from the perspective of international law US law and foreign domestic law The book illuminates the theory of energy justice while emphasizing practical solutions that hasten the transition from fossil fuels and address the inequities that plague energy systems

Research Handbook on Energy, Law and Ethics Malik R. Dahlan, Rosa M. Lastra, Gustavo Rochette, 2022-11-22 This Research Handbook offers crucial ethical perspectives on navigating the increasingly complex and contested landscape of contemporary energy law Taking an interdisciplinary approach it brings together diverse scholarship and expertise from academia international organizations legal practice and the judiciary to address wide ranging issues linking energy and law to ethical drivers such as wealth peace and war development climate change and use and abuse of natural resources

Global Energy Politics Thijs Van de Graaf, Benjamin K. Sovacool, 2020-05-07 Ever since the Industrial Revolution energy has been a key driver of world politics From the oil crises of the 1970s to today's rapid expansion of renewable energy sources every shift in global energy patterns has important repercussions for international relations In this new book Thijs Van de Graaf and Benjamin Sovacool uncover the intricate ways in which our energy systems have shaped global outcomes in four key areas of world politics security the economy the environment and global justice Moving beyond the narrow geopolitical focus that has dominated much of the discussion on global energy politics they also deftly trace the connections between energy environmental politics and community activism The authors argue that we are on the cusp of a global energy shift that promises to be no less transformative for the pursuit of wealth and power in world politics than the historical shifts from wood to coal and from coal to oil This ongoing energy transformation will not only upend the global balance of power it could also fundamentally transfer

political authority away from the nation state empowering citizens regions and local communities Global Energy Politics will be an essential resource for students of the social sciences grappling with the major energy issues of our times

The Challenge for Energy Justice Raphael J Heffron,2021-10-26 Written by one of the world s leading scholars in the field this book provides a unique perspective on the connections between energy justice and human rights Taking an interdisciplinary approach the author offers an accessible discussion about the implementation of energy justice in practice The book explores the rise of justice issues in the energy sector the interdisciplinary nature of energy justice the economics of energy justice and provides a practical case study on distributive justice The penultimate chapter focuses on human rights and energy justice in a world first and explores the topic from the perspective of the opportunity of last resort This opportunity of last resort is the national courts and is the place where societies can seek to have justice enforced through a variety of human rights being protected Finally energy justice risks are highlighted alongside the author s proposed framework for the next generation of energy justice scholars

Handbook on Energy Justice Stefan Bouzarovski,Sara Fuller,Tony G. Reames,2023-05-09 Offering a unique and critical perspective on energy justice this Handbook delves into an emerging field of inquiry encapsulating multiple strands of scholarship on energy systems Covering key topics including generation transmission distribution and demand it explores fundamental questions surrounding policy climate change security and social movements

Crawford,2020-09-21 This volume presents an in depth analysis of climate change problems and discusses the proliferation of renewable energy worldwide in conjunction with such important questions as social justice and economic growth providing an interdisciplinary approach to sustainable development Exploring various responses to human induced climate change the book offers a critical reflection on climate change and clean energy and highlights the fundamental problems of international energy justice and human rights Examining these and other climate related issues from legal business political and scientific perspectives the volume also analyzes the impact of economic factors and policies on climate change mitigation and adaptation

Legal Challenges at the End of the Fossil Fuel Era Daniel Iglesias Márquez,Clara Esteve-Jordà,Beatriz Felipe Pérez,2024-09-24 This edited collection proposes a wide range of approaches to address the legal issues pertaining to the end of the fossil fuel era While the fossil fuel era is coming to an end both because of the inherent limits of its resources and because of the need to prevent to further pump out CO2 in an already saturated atmosphere the legal dispositions to ensure an ordered and rational shift toward cleaner energy still need to be developed Not only in relation to CO2 emissions themselves but also in relation to the manifold issues related to environmental justice in an era of global climate change and global warming This book is unique in that it provides a theoretical framework but also works to address cutting edge issues through a series of case studies

State-of-the-Art Indonesia Energy Transition Dinita Setyawati,2023-06-03 This book discusses how people can come together to address current energy justice and access poverty problems by examining the relationship between energy

systems and society in diverse energy sources The novelty of this book is that this is the only complete guide for readers who wish to understand the status of Indonesia's energy transition and renewable energy development Energy programs that are explored are the ones prioritized by government administrations including coal nuclear power solar energy green electricity and geothermal energy Based on extensive fieldwork and empirical data the book combines insights from historical data on energy subsidies and economic diversification current empirical data on social acceptance of new energy technologies and contemporary studies that forecast the implications of the transition to the coal industry and fossil fuel subsidies It asks how Indonesia has enacted policies that support energy transition How do the public and civil society view those policies What are the implications for broader themes and discussions on energy sources technology systems policies and service Strategies are suggested to advance a sustainable transition in the developing world that will mitigate developmental risks associated with the transition away from fossil fuels while encouraging decision making in a sustainable and socially just manner This book is an informative and engaging read for a general audience as well as a valuable resource for scholars researchers and students in environmental and energy studies

Just Climate Futures Carolyn Snell, Lucie

Middlemiss, Kelli Kennedy, Emily Morrison, Anne Owen, Samanthi Themini, Tania Carregha, Yekaterina

Chzhen, 2025-08-14 If we are to meet Net Zero targets both climate policies and our daily lives require significant change The transition towards Net Zero will lead to inevitable trade offs between social economic and environmental objectives and this transition could disproportionately impact households already struggling with poverty and precarity This book takes a deep dive into the ways families and communities are or could be impacted by the implementation of climate policy It demonstrates that participation in Net Zero requires people to be economically culturally socially and politically engaged and provides a practical roadmap to encourage and support a truly just transition

Energy Justice Elena V. Shabliy, Martha J. Crawford, Dmitry Kurochkin, 2022-03-19 This book offers an insight into climate change mitigation and adaptation strategies and discusses energy justice issues within this framework The concepts of sustainability and sustainable development have become popular among local communities international policymakers and researchers In addition to these important topics themes such as climate justice environmental justice global energy justice ecological justice sustainable justice and procedural justice remain attractive to scholars and researchers internationally In this book scholars elaborate on various responses to human induced climate change calling for action mitigation and adaptation and

encouraging further thorough analysis and research in the field Greenovation Joan Fitzgerald, 2020-02-27 Collectively cities take up a relatively tiny amount of land on the earth yet they emit 72 percent of greenhouse gas emissions Clearly cities need to be at the center of any broad effort to reduce climate change In Greenovation the eminent urban policy scholar Joan Fitzgerald argues that too many cities are only implementing random acts of greenness that will do little to address the climate crisis She instead calls for greenovation using the city as a test bed for adopting and perfecting green technologies for more energy efficient buildings transportation and infrastructure more broadly Fitzgerald contends that while many city mayors cite income inequality as a pressing problem few cities are connecting climate action and social justice another aspect of greenovation Focusing on the biggest producers of greenhouse gases in cities buildings energy and transportation Fitzgerald examines how greenovating cities are reducing emissions overall and lays out an agenda for fostering and implementing urban innovations that can help reverse the path toward irrevocable climate damage Drawing on interviews with practitioners in more than 20 North American and European cities she identifies the strategies and policies they are employing and how support from state provincial and national governments has supported or thwarted their efforts A uniquely urban focused appraisal of the economic political and social debates that underpin the drive to go green Greenovation helps us understand what is arguably the toughest policy problem of our era the increasing impact of anthropocentric climate change on modern social life **Conflicts in Urban Future-Making** Monika

Grubbauer, Alessandra Manganelli, Louis Volont, 2024-11-22 Under conditions of heightened uncertainty cities face enormous challenges in responding to contemporary crises The contributors to this volume explore the conflictual dynamics that arise when urban futures are imagined negotiated and materialized Through the lens of urban future making they provide a timely analysis of the conflicts that shape planning projects architectural interventions and new experiments in the built environment Their analyses show how urban future making is conditioned by conflicting governance arrangements actor constellations and power dynamics offering rich insight into the critical role of professionals as key agents of urban transformation **Energy Law: An Introduction** Raphael J. Heffron, 2021-06-23 The aim of this short text is simply to

introduce a reader to this topic It is intended for a global audience and rather than being restricted to potential energy law students of a particular country It is also written for students of other disciplines such as geographers social scientists and engineers It should also be engaging to those in a variety of professional practices who want an accessible background to and overview of the subject The first edition of Energy Law An Introduction was a great success and this extended second edition is expected to be just as successful It is used widely as a core text in energy law courses across the world and this second issue adds further discussion on important topics such as energy law principles and drivers Further it highlights issues of energy justice a growing and an emergent topic which is also at the core of the energy law principles and the key drivers of why new energy law is formulated The text aims to outline the principles and central logic behind energy law Therefore

readers from across the world should be able to use it as a guide to thinking about energy law in their own countries. A variety of examples from many different countries are included in the text and while examples and comparisons are mainly from the EU and US they represent good examples of more advanced and innovative energy law. For those readers who seek further or more in depth knowledge this text will only serve as an introduction. However a key focus of the book is to direct the reader where they to look for further information and within the book there are suggested extra readings, the key recommended journals to read and other sources of information based on institutions who publish further material in this area. Overall this second edition of Energy Law: An Introduction aims to inspire students and others to contribute to try and improve energy law across the world and enable us all to contribute in our own small way to delivering a just and sustainable energy world for future generations.
