message He is here to warn us of an ever increasing problem that is about to impact us all **Intergenerational Education for Adolescents towards Liveable Futures** David Lloyd, Kathryn Paige, Richard Smith, 2019-06-13 This volume will provide eco socially oriented science and environmental educators with a diverse set of examples of how science and environmental learning for students and their co learner teachers can be enacted in ways which contribute to their understanding of commitment to and capabilities towards living for a more eco socially just and therefore more sustainable world Science and environmental learning is set within a challenging framework one that entails critical transdisciplinary learning and acting and values all the human and other than human beings sharing Earth s rich but finite resources The text asserts that ethical contemporary science and environmental education which practitioners might find within science technology engineering and mathematics STEM will have at centre stage not merely more factual knowledge but also the development of learners affect and behaviour towards acting for eco social justice This will demand that learners more fully appreciate not only the necessity to transition swiftly to living within planetary boundaries but also the requirements of ethical living that humans share health and well being more equally with their own and all other species Further the book proposes that eco socially responsible science and environmental education must be set within a transdisciplinary and integral framework one in which curriculum and pedagogy are embedded in everyday practice In this transition project from unsustainable inequities to eco social justice teachers and community leaders need to work with their students citizens in envisioning preferable futures and developing shared knowledge values dispositions courage and capabilities to work towards such futures and in genuine attempts at affecting them Responsible Finance and Digitalization Panu Kalmi, Tommi Auvinen, Marko Järvenpää, 2022-09-30 The aftermath of the 2008 crisis has substantially increased the regulation of banks and insurance companies and curtailed their risk taking which has shifted much of the risk to their clients firms and consumers At the same time digitalization has encouraged the entry of new firms combining finance and technological innovation a phenomenon known as FinTech The emergence of non bank financial entities has contributed to the fragmentation of financial services and also opened up new markets Furthermore the growing emphasis on corporate social responsibility has made it increasingly important for financial organizations to care about their public image Drawing together these diverse strands this book examines how the financial sector is evolving and how the existing actors are adapting to the institutional change and to the challenges from new actors and competitors It also addresses the issue of how financial organizations are providing fixes to the challenges at the systemic level and how a healthier more diverse and socially responsible financial sector is beneficial to the operations of the market economy as a whole While there are books that address each of these issues and also books that look at organizational diversity there are few that investigate their interconnectedness Responsible Finance and Digitalization offers a topical overview of the changes that are taking place in the financial sector and how the financial sector itself can contribute to solving global challenges It equips both students at

MBA and other levels and practitioners with analytical tools to reflect on this change and to take appropriate action to ensure that their organization can successfully navigate it and create value Managerial Accountant's Compass Gary

Oliver, 2018-10-09 This is the first detailed view of the managerial accountant's role and responsibilities in organization setting. Its aim is to foster role development, the opportunity to work at an advanced level of practice. Accounting studies develop technical skills associated with topics and responding to defined scenarios but provide very little guidance on what to recognize and approaching the broad problems or challenges under conditions of uncertainty. It is a double first because it provides the managerial accountant's compass as a general purpose analytical framework for managerial accounting independent of any selected theory and method. The metaphor of a compass creates a mental schema for its four points named 1 goals and principles 2 boundaries and constraints 3 methods and models and 4 collegial relationships. Dynastic Chinese and some other Central Asian cultures view the center as a fifth principal direction giving a total of five points. The center represents a high standard ethical conduct and self care or moral compass. Managerial Accountant's Compass offers an integrated and systematic guide to approaching situations that are constantly changing. It gives a protective starting pattern which produces new meanings and awareness of the ambiguity and uncertainty for each situation. Ultimately the managerial accountant's compass can help you make more effective sense of yourself, your expertise and your practice in the organization where you work which should open career opportunities *Transitions from Education to Work* Roslyn

Cameron, Subas Dhakal, John Burgess, 2017-11-22 Labour markets are becoming more dynamic in response to pressures from globalisation, new technologies and trade agreements as well as cross border migration, inter generation differences, changing education imperatives and employer expectations. By focusing on several Asia Pacific countries, this book explores the differences in their workforces, ageing or abundant in labour but lacking in skilled employees. One similarity these countries share is the difficulty in attracting and retaining employees with the required skillset and capabilities and these constraints can stymie national economic growth and long term development. This book brings together national and international perspectives on employability challenges faced by selected countries in the Asia Pacific region. While the region is forecast to enjoy high growth in the coming decade, a recurring challenge is addressing skill shortages and ensuring effective transition from training colleges and universities into employment. Consequently, the book focuses on the roles of multiple stakeholders, primarily governments, education providers and employers in more effectively addressing these key socio economic challenges **Reusable and Sustainable Building Materials in Modern Architecture** Koç, Gülşah, Christiansen,

Bryan, 2018-11-02 Designing buildings and physical environments depends on social structure, social needs, economic data, environment and technological development. Planning these environments is heavily influenced by cultural and regional need, the existing environment and the materials available. *Reusable and Sustainable Building Materials in Modern Architecture* is an essential reference source that discusses the shaping of building design through culture and materials as well as the

influence of environment on building design Featuring research on topics such as passive design ecological design and urban design this book is ideal for academicians specialists and researchers seeking coverage on culture environment and building design
