Cinema and Social Change in Germany and Austria

Gabriele Mueller, James M. Skidmore, 2012-08-30 During the last decade contemporary German and Austrian cinema has grappled with new social and economic realities The cinema of consensus a term coined to describe the popular and commercially oriented filmmaking of the 1990s has given way to a more heterogeneous and critical cinema culture Making the greatest artistic impact since the 1970s contemporary cinema is responding to questions of globalization and the effects of societal and economic change on the individual This book explores this trend by investigating different thematic and aesthetic strategies and alternative methods of film production and distribution Functioning both as a product and as an agent of globalizing processes this new cinema mediates and influences important political and social debates The contributors illuminate these processes through their analyses of cinema's intervention in discourses on such concepts as national cinema the effects of globalization on social mobility and the emergence of a global culture The essays illustrate the variety and inventiveness of contemporary Austrian and German filmmaking and highlight the complicated interdependencies between global developments and local specificities They confirm a broader trend toward a more complex critical and formally diverse cinematic scene This book offers insights into the strategies employed by German and Austrian filmmakers to position themselves between the commercial pressures of the film industry and the desire to mediate or even attempt to affect social change It will be of interest to scholars in film studies cultural studies and European studies

Global Governance Diplomacy Jean-Robert Leguey-Feilleux, 2017-03-01 Nations even the most powerful cannot cope by themselves with many of the problems confronting them Collective efforts are needed and diplomacy is a key element in this process This text examines how diplomacy serves global governance how the diverse international actors use it and what it accomplishes The focus is on diplomatic practice looking at the diverse methods used by the international actors involved and how they contribute to its effectiveness The first section examines how various levels of international actors practice diplomacy Nation states are still key actors and they use many methods in embassies international conferences international organizations summit meetings and more International organizations are both a forum for multilateral diplomacy and a major set of international actors still growing in significance for global governance diplomacy In addition a multiplicity of regional or limited membership institutions play a role in global governance At the transnational level there is the increasing role of civil society institutions and nongovernmental organizations in international affairs This is where a new kind of international actors is found unevenly contributing to global governance diplomacy beyond the control of public authorities The second

section explores the functional level looking at how diplomacy operates in five areas of global governance peace and security economic governance social issues human rights and environmental protection Each of these presents different challenges for global governance diplomacy and requires the development of different diplomatic strategies and new techniques Some of the issues are more amenable to global governance while others such as the eradication of global poverty remain fairly intractable The text extends beyond the usual description of diplomatic apparatus and dynamics to explore diplomacy at work in specific current policy areas that are very relevant to the present debates in international politics **Gendered**

Paradoxes Fida J. Adely, 2012-09-15 In 2005 the World Bank released a gender assessment of the nation of Jordan a country that like many in the Middle East has undergone dramatic social and gender transformations in part by encouraging equal access to education for men and women The resulting demographic picture there highly educated women who still largely stay at home as mothers and caregivers prompted the World Bank to label Jordan a gender paradox In *Gendered Paradoxes* Fida J Adely shows that assessment to be a fallacy taking readers into the rarely seen halls of a Jordanian public school the al Khatwa High School for Girls and revealing the dynamic lives of its students for whom such trends are far from paradoxical Through the lives of these students Adely explores the critical issues young people in Jordan grapple with today nationalism and national identity faith and the requisites of pious living appropriate and respectable gender roles and progress In the process she shows the important place of education in Jordan one less tied to the economic ends of labor and employment that are so emphasized by the rest of the developed world In showcasing alternative values and the highly capable young women who hold them Adely raises fundamental questions about what constitutes development progress and empowerment not just for Jordanians but for the whole world *The 'Postmodern Turn' in the Social Sciences* Simon Susen, 2015-07-23

Isolationist States in an Interdependent World Helga Turku, 2016-05-06 States that withdraw from the international system provide insight into an unexplored area of international relations in terms of rationality self interest power politics cooperation and alliances Indeed isolationism in an interdependent state system goes against the logic of modern society and state systems Using historical comparative and inductive analysis Helga Turku explains why states may choose to isolate themselves both domestically and internationally using comparative historical analysis to flesh out isolationism as a concept and in practice The book examines extreme forms of self imposed domestic and international isolation in an interdependent international system noting the effects on both the immediate interests of a ruling regime and the long term national interests of the state and the populace

The Border Crossed Us Josue David Cisneros, 2014-02-28 Explores efforts to restrict and expand notions of US citizenship as they relate specifically to the US Mexico border and Latina o identity Borders and citizenship go hand in hand Borders define a nation as a territorial entity and create the parameters for national belonging But the relationship between borders and citizenship breeds perpetual anxiety over the purported sanctity of the border the security of a nation and the integrity of civic identity In The Border Crossed Us Josue David Cisneros addresses these themes as they relate to the US Mexico border arguing that issues ranging from the Mexican American War of 1846 1848 to contemporary debates about Latina o immigration and border security are negotiated rhetorically through public discourse He explores these rhetorical battles through case studies of specific Latina o struggles for civil rights and citizenship including debates about Mexican American citizenship in the 1849 California Constitutional Convention 1960s Chicana o civil rights movements and modern day immigrant activism Cisneros posits that borders both geographic and civic have crossed and recrossed Latina o communities throughout history the book s title derives from the popular activist chant We didn t cross the border the border crossed us and that Latinas in the United States have long contributed to struggled with and sought to cross or challenge the borders of belonging including race culture language and gender The Border Crossed Us illuminates the enduring significance and evolution of US borders and citizenship and provides programmatic and theoretical suggestions for the continued study of these critical issues
