## **Global Prescriptions Gendering Health And Human Rights:**

**Global Prescriptions** Rosalind P. Petchesky, 2003-08 *Global Prescriptions* is a critical yet optimistic analysis of the role of transnational women's groups in setting the agendas for women's health in international and national settings. The book reviews a decade of women's participation in UN conferences, transnational networks, national advocacy efforts, and sexual and reproductive health provision, assessing both their strengths and weaknesses. It critiques the Cairo, Beijing, and Copenhagen conference documents and World Bank, WHO, and health sector reform policies. It also offers case studies of national level reform and advocacy efforts and appraises the controversy concerning TRIPS trade and essential AIDS drugs. The author takes into account the formidable political and ideological forces confronting global justice movements and also offers a sobering reassessment of transnational women's NGOs themselves and such problems as NGOization, fragmentation, and donor dependency. Petchesky argues that the power of women's transnational coalitions is only as great as their organic connection with grassroots social movements.

**The Gender Imperative** Betty A. Reardon, Asha Hans, 2018-07-27 This collection of essays by feminist scholar activists addresses the crucial problem of human security in a world of heavily armed, militarized states. It describes the gendered aspects of human security excluded from the realist militarism that dominates current security policy in most nation states. The book deepens and broadens current security discourses, encouraging serious consideration of alternatives to the present global security system that functions to advantage state security over human security, a system the contributors perceive to be rooted in the patriarchal nature of the nation state. This second edition will be of interest to academics and students of gender studies, women's studies, international studies, development studies, human rights, security studies, peace studies, and peace education.

Highlighting the importance of intersecting social hierarchies, e.g. gender, class, and ethnicity, for understanding health inequities and their implications for health policy, contributors detail and recommend policy approaches and agendas that incorporate but go beyond commonly acknowledged issues relating to women's health and gender equity in health.
