**The World** Richard Haass, 2021-05-11 The New York Times Bestseller A superb introduction to the world and global issues. Richard Haass has written something that is brief, readable and yet comprehensive, marked throughout by his trademark intelligence and common sense. Fareed Zakaria: An invaluable primer from Richard Haass, president of the Council on Foreign Relations that will help anyone, expert and non-expert alike, navigate a time in which many of our biggest challenges come from the world beyond our borders. We live in a global era in which what happens thousands of miles away often affects our lives. Although the United States is bordered by two oceans, those oceans are not moats. And the so-called Vegas rule, what happens there stays there, does not apply. Globalization can be both good and bad, but it is not something that individuals or countries can opt out of. The choice we face is how to respond. The World focuses on history, what makes each region of the world tick, the many challenges globalization presents and the most influential countries, events and ideas to provide readers with the background they need to make sense of this complicated and interconnected world.

Global Warming William C. Burns, 1997 The Petroleum Papers Geoff Dombicki, 2022-09-20 A WASHINGTON POST BEST BOOK OF THE YEAR. An essential read. The Washington Post Essential. This book belongs on the shelf next to *Merchants of Doubt*, *Dark Money* and *Kochland*. Roy Scranton, author of *Learning to Die in the Anthropocene*: The petroleum industry is guilty of a Big Tobacco style public cover up, according to this vivid exposé. Publishers Weekly STARRED Review: Burning fossil fuels will cause catastrophic global warming; this is what top American oil executives were told by scientists in 1959. But they ignored that warning. Instead, they developed one of the biggest, most polluting oil sources in the world: the oil sands in Alberta, Canada. As investigative journalist Geoff Dombicki reveals in this explosive book, the decades-long conspiracy to keep the oil sands flowing into the U.S. would turn out to be one of the biggest reasons for the world's failure to stop the climate crisis. In *The Petroleum Papers*, Dombicki draws from confidential oil industry documents to uncover for the first time how companies like Exxon, Koch Industries and Shell built a global right-wing echo chamber to protect oil sands profits: a misinformation campaign that continues to this day. He also tells the high-stakes stories of people fighting back: a Seattle lawyer who brought down Big Tobacco and is now going after Big Oil; a Filipina activist whose family drowned in a climate disaster; and a former Exxon engineer pushed out for asking hard questions. With experts now warning we have less than a decade to get global emissions

under control The Petroleum Papers provides a step by step account of how we got to this precipice and the politicians and companies who deserve our blame Published in Partnership with the David Suzuki Institute *Climate Change* Joseph Romm,2022 This chapter focuses on climate science as it applies to what science can tell us about the changes we have observed to date and what caused them The goal is to answer the key questions that people ask about the science A Global Warming Primer Jeffrey O.
