**Changing Geopolitics of Global Communication** Daya Thussu, 2024-07-31 *Changing Geopolitics of Global Communication* examines the rapidly evolving dynamics between global communication and geopolitics. As an intersection between communication and international relations, it bridges the existing gap in scholarship and highlights the growing importance of digital communication in legitimizing and promoting the geopolitical and economic goals of leading powers. One central theme that emerges in the book is the continuity of asymmetries in power relations that can be traced back to 19th century European imperialism manifested in its various incarnations from liberal to neo liberal to digital imperialism. The book includes a discussion of the post Cold War US led transformation of the hardware and software of global communication and how it has been challenged by the rise of the rest, especially China. Other key issues covered include the geopolitics of image wars, weaponization of information, and the visibility of discourses emanating from outside the Euro Atlantic zone. The ideas and arguments advanced here privilege a reading of geopolitical processes and examples from the perspective of the global South. Written by a leading scholar of global communication, this comprehensive and transdisciplinary study adopts a holistic approach and will be of interest to the global community of scholars, researchers, and commentators in communication and international relations, among other fields.

**Foundations of Global Communication** Kai Hafez, Anne Grüne, 2022-05-30 This book provides a wide ranging theoretical and empirical overview of the disparate achievements and shortcomings of global communication. This exceptionally ambitious and systematic project takes a critical perspective on the globalization of communication. Uniquely, it sets media globalization alongside a plethora of other globalized forms of communication, ranging from the individual to groups, civil society groupings, commercial enterprises, and political formations. The result is a sophisticated and impressive overview of globalized communication across various facets, assessing the phenomena for the extent to which they live up to the much hyped claims of globalization's potential to create a globally interdependent society. The setbacks of globalization, such as right wing populism and religious fundamentalism, can only be understood if the shortcomings of global communication are taken more seriously. Covering all types of cross border global communication in media, political and economic systems, civil societies, social media, and lifeworlds of the individual, this unique book is invaluable for students and researchers in media, communication, globalization, and related areas.
