Stromquist, Karen Monkman, 2000-09-06 The effects of globalization have long been dealt with in terms of economic and technological consequences but what about the influence on education Though still not a precise concept what we understand as Globalization is bringing forth numerous and profound changes in the economic cultural and political life of nations With increased opportunities for interaction and learning education around the world is rapidly becoming transformed The essays contained in this comprehensive yet readable book strive to provide a thorough examination of the impact these changes are having on how education is defined whom it serves and how it is assessed around the world *Globalization and Education* is organized into three sections The first addresses conceptual and theoretical issues underlying such notions as globalization internationalization and multilateralism The second presents empirical data from various countries and provides examples of shifts and transformations within a specific level or modality of the educational system The third looks at the totality of educational changes taking the nation as the unit of analysis *Globalization and Education* Nelly P. Stromquist, Karen Monkman, 2014 We offer in this book a collection of chapters that reflect a broad range of issues linking globalization to education in an accessible yet theoretically grounded and detailed form The authors analyze phenomena on the global plane in local spaces and in the connections between the global and the local New developments such as the growing impact of technology on education the emergence of new policy actors the growing expansion and segmentation of higher education the salience of human rights among others are emerging as powerful agendas shaping all levels of education In fundamental ways the forces of globalization challenge the previous approaches and theories of national development Recognizing the areas of convergence dissonance and conflict should help us grasp with greater clarity the implications of globalization for education and knowledge in the XXI century The contributors to this book include both well known scholars in the field of comparative education as well as young scholars The chapters present a balanced geographical coverage in terms of authors and the countries regions examined The second edition has been thoroughly updated throughout and contains seven new chapters The expanding interest in the intersection of education and globalization has brought up several new topics including the salience of global education policies notably EFA the expansion and differentiation of higher education the

emphasis on work related training the increasing role of non state actors such as the transnational corporations and greater attention to human rights Also in this new edition is a chapter on qualitative methodologies especially suitable to the understanding of the intersection of globalization and education

Globalization Nicholas Sun-keung Pang, 2006 Bringing together a group of international authors this book attempts to examine the effects of globalization on educational policies and practices under the following themes 1 the roles of educational research in the era of globalization and how comparative education can contribute to such investigation 2 the relationships between the development of higher education and globalization in different countries and 3 the impacts of globalization on school education and how schools can respond to the challenges ahead

Education in a Globalized World Nelly P. Stromquist, 2002 The seemingly amorphous phenomenon we call globalization involves concrete realities that make it a major source of social change in our contemporary world Bringing globalization alive for students this book uses examples and perspectives from economics technology and mass media to show how globalization is producing unprecedented impacts on education and culture Education at all levels from primary school to university education is undergoing a world wide transformation of its objectives values and practices New technologies and communication practices have promoted the West's optimism that market forces can replace the former governmental responsibilities for social welfare and the inclusion of diverse cultures New emphasis on competition quality control parental choice marketing and the linkage of education to work means that schools all over the world face innovations and challenges to established practices Meanwhile the worldwide expansion of entertainment and advertising media convey notions of individualism and consumerism that are changing definitions of gender and solidarity among social groups This book offers a vivid introduction to these complex changes recognizing the role of the state while explaining new forces like transnational corporations and nongovernmental organizations Stromquist points to governmental and school policies that can actively shape the future of education at a time of rapid change

Marcucci, 2017-10-13 This book is guided through the powerful ideological frameworks of culture and social reproduction and looks specifically to the role of schooling as a vehicle for catalysing change **Transnational Education Crossing 'Asia' and 'the West'** Le-Ha Phan, 2016-10-04 In this book Phan Le Ha identifies and discusses four growing self sustained sustaining fundamental phenomena in transnational education TNE namely 1 the planned evolving and transformative mediocrity behind the endorsement of English medium education legitimized by the interactive Asia the West relationship 2 the strategic employment of the terms Asia Asian and West Western by all stakeholders in their perceptions and construction of choice quality rigour reliability and attractiveness of programs courses and locations 3 the adjusted desire for an imagined and often misinformed West among various stakeholders of transnational education and 4 the assigned and self realized ownership of English by otherwise normally on the margin groups of speakers A focus on how these phenomena impact questions of identity and desire in TNE is a running theme The above phenomena are discussed against the backdrop of the rise of Asia sentiment and how this

sentiment has played out in interactions and relationships between the West and Asia and among Asian institutions and various entities Phan Le Ha's examination of the identified phenomena in TNE has been informed by her multi-layered engagement with the dialectic of the Asia the West relationship her critical take on certain pro Asia and decolonisation scholarship and her interdisciplinary and multidisciplinary approach to theorise the field and the specific topic under scrutiny Phan Le Ha shows that the current Asia chooses not necessarily by force but largely by will and often with an informed and well articulated agency to go with the idea of the West and often desires an affiliation with the West either directly or indirectly something that is getting more intense in the context of globalization regionalization and commercialization of education The rise of Asia has made the idea of the West even more looked for in Asia TNE in Asia in many ways is the transforming and dynamic transit point a layover that facilitates entry into a wanted destination the West and or the idea of the West The West and Asia need one another more than ever in the context of the internationalization and commercialization of higher education What's more the West and Asia have hardly ever been mutually exclusive but have rather been in an eventful love and obsession relationship with each other This is the very dialectic proposition that Phan Le Ha takes throughout this book while paying specific attention to transnational higher education in the greater Asian region including the Middle East following her several research projects conducted in the region since 2005 to date Transnational Education Crossing the West and Asia explores English Internationalisation of Higher Education and Identity Increasing Academic Monolingualism and English only Package Transnational Education and Dream Realization From the Philippines to Vietnam From Afghanistan to Dubai From Everywhere in Asia to Thailand Desiring International Transnational Education Theorisation of Key Concepts and Next Steps from Here The book will be of interest to researchers in the field of transnational education Asia education and education policy
