Gender and Conversion Narratives in the Nineteenth Century Kirsten Rüther, Angelika Schaser, 2016-03-03 Addressing an important social and political issue which is still much debated today this volume explores the connections between religious conversions and gendered identity against the backdrop of a world undergoing significant social transformations Adopting a collaborative approach to their research the authors explore the connections and differences in conversion experiences tracing the local and regional rootedness of individual conversions as reflected in conversion narratives in three different locations Germany and German missions in South Africa and colonial Australia at a time of massive social changes in the 1860s Beginning with the representation of religious experiences in so called conversion narratives the authors explore the social embeddedness of religious conversions and inquire how people related to their social surroundings and in particular to gender order and gender practices before during and after their conversion With a concluding reflective essay on comparative methods of history writing and transnational perspectives on conversion this book offers a fresh perspective on historical debates about religious change gender and social relations

**Globalization** Jürgen Osterhammel, Niels P. Petersson, 2005 Globalization has become a popular buzzword for explaining today's world The expression achieved terminological stardom in the 1990s and was soon embraced by the general public and integrated into numerous languages But is this much discussed phenomenon really an invention of modern times In this work Jürgen Osterhammel and Niels Petersson make the case that globalization is not so new after all Arguing that the world did not turn global overnight the book traces the emergence of globalization over the past seven or eight centuries In fact the authors write the phenomenon can be traced back to early modern large scale trading for example the silk trade between China and the Mediterranean region the shipping routes between the Arabian Peninsula and India and the more frequently traveled caravan routes of the Near East and North Africa all conduits for people goods coins artwork and ideas Osterhammel and Petersson argue that the period from 1750 to 1880 an era characterized by the development of free trade and the long distance impact of the industrial revolution represented an important phase in the globalization phenomenon Moreover they demonstrate how globalization in the mid twentieth century opened up the prospect of global destruction though nuclear war and ecological catastrophe In the end the authors write today's globalization is part of a long running transformation and has not ushered in a global age radically different from anything that came before This book will appeal to historians economists and anyone in the social sciences who is interested in the historical emergence of globalization

**Globalization in World History** Peter N. Stearns,2023-11-03 Globalization in World History examines major changes in global interactions from 1000 CE onward and defines four major turning points that have accelerated the process of globalisation It argues that although the term is a relatively new one the process of globalisation has roots much further back in time The book covers a wide geographical and chronological range while still being concise and accessible enough to use for undergraduate courses The book is applicable to and used in a variety of courses such as history of globalization world history economic history social and cultural history international relations and political science Anchored around transition and turning point chapters the structure of the book highlights key moments and patterns in the process of globalization while also helping students understand globalization as a constantly developing feature of world history A Big History of Globalization Julia Zinkina,David Christian,Leonid Grinin,Ilya Ilyin,Alexey Andreev,Ivan Aleshkovski,Sergey Shulgin,Andrey Korotayev,2019-04-12 This book presents the history of globalization as a network based story in the context of Big History Departing from the traditional historic discourse in which communities cities and states serve as the main units of analysis the authors instead trace the historical emergence growth interconnection and merging of various types of networks that have gradually encompassed the globe They also focus on the development of certain ideas processes institutions and phenomena that spread through those networks to become truly global The book specifies five macro periods in the history of globalization and comprehensively covers the first four from roughly the 9th 7th millennia BC to World War I For each period it identifies the most important network related developments that facilitated or even spurred on such transitions and had the greatest impacts on the history of globalization By analyzing the world system s transition to new levels of complexityand connectivity the book provides valuable insights into the course of Big History and the evolution of human societies

**Global Economic History** Robert C. Allen, 2011-09-15 Why are some countries rich and others poor In 1500 the income differences were small but they have grown dramatically since Columbus reached America Since then the interplay between geography globalization technological change and economic policy has determined the wealth and poverty of nations The industrial revolution was Britain's path breaking response to the challenge of globalization Western Europe and North America joined Britain to form a club of rich nations by pursuing four policies creating a national market by abolishing internal tariffs and investing in transportation erecting an external tariff to protect their fledgling industries from British competition banks to stabilize the currency and mobilize domestic savings for investment and mass education to prepare people for industrial work Together these countries pioneered new technologies that have made them ever richer Before the Industrial Revolution most of the world's manufacturing was done in Asia but industries from Casablanca to Canton were destroyed by western competition in the nineteenth century and Asia was transformed into underdeveloped countries specializing in agriculture The spread of economic development has been slow since modern technology was invented to fit the needs of rich countries and is ill adapted to the economic and geographical conditions of poor countries A few countries Japan Soviet Russia South Korea Taiwan and perhaps China have nonetheless caught up with the West through creative responses to the technological challenge and with Big Push industrialization that has achieved rapid growth through investment coordination Whether other countries can emulate the success of East Asia is a challenge for the future ABOUT THE SERIES The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area These pocket sized books are the perfect way to get ahead in a new subject quickly Our expert authors combine facts analysis perspective new ideas and enthusiasm to make interesting and challenging topics highly readable

Globalization William R. Nester, 2010 International politics began with the emergence of the first organized states thousands of years ago Global politics is more recent it appeared about five centuries ago when the European powers began to mesh the world's far corners together through conquest and trade Today we live on a planet characterized by globalization or the ever more complex economic cultural technological and environmental interdependence among all people everywhere Until recently globalization's development was slow Although countries increasingly traded allied and negotiated with each other the divisions among them far outweighed the ties and nations often settled their conflicts with war or the threat of war However since 1945 despite or more likely because of the Cold War globalization has developed rapidly and profoundly Today all humans are formally tied to all others through their country's membership in the United Nations and numerous other international organizations along with the immediate benefits of global trade telecommunications travel and the internet Yet globalization has a dark side it destroys as well as creates jobs wealth and lives while every human lives under the shadow of potential nuclear and ecological extinction How did humanity reach a stage of history so filled with such an array of prospects and perils Globalization A Short History of the Modern World explores that all powerful force for good and

evil from the Renaissance through today and beyond      *A Brief History of Globalization* Alex MacGillivray, 2006-01-10  
Globalization is fast becoming the most over used and least understood word in the world The accelerating political economic cultural and environmental interconnections that it describes are powerful and controversial But what does it really mean Ever since Pythagoras first imagined the world as a sphere revolving around the sun our planet has been shrinking This book covers globalization from all angles from 15th century explorations to the rise of the multi national corporation from the Great Wall of China to the birth of the football World Cup Opening the lid on the complex economics behind the controversies MacGillivray gives equal play to technology and culture politics and war Alex MacGillivray is an activist inquisitive enough to find out where globalization has come from and a historian rash enough to say where it is going next Rich in detail wide ranging in scope and even handed in its assessment of the benefits and dangers of globalization here is the full story of how a mysterious flat earth became a global village      **Globalization** Habibul Haque Khondker, 2001      **Competing Visions of World Order** Sebastian Conrad, Dominic Sachsenmaier, 2015-12-19 Bringing together scholars from around the world this first book in the Palgrave Macmillan Transnational History Series raises the question of how we can get away from the contemporary language of globalization so as to identify meaningful global ways of defining historical events and processes in the late Nineteenth and Twentieth centuries
