Globalization Women And Health In The 21st Century:

Globalization, Women, and Health in the Twenty-First Century I. Kickbusch, K. Hartwig, J. List, 2005-12-10 We are still only beginning to understand the increasingly complex set of interdependencies among gender health and globalization This book brings together a diverse group of distinguished scholars and activists to explore the new risks and freedoms for men and women in a global society and their health determinants They map the gendered impact of these processes and present a health landscape that takes us beyond nation states into trans border flows of capital people goods and services Each chapter begins with a global analysis of specific trends followed by two In Perspective pieces by authors from contrasting disciplines and geographies

Physicians at War Fritz Allhoff, 2008-03-22 This paper offers a brief examination of ethical health issues arising from military operations and outlines which if any of these ethical health issues apply to current Australian Defence Force ADF military operations The transparency of military operations provided through real time global media reporting and the Internet has raised public awareness of incidents that can be viewed broadly as ethical issues or dilemmas While many of these issues are not new it is the changing context of post cold war military operations and scale and demand of humanitarian operations that places new requirements on how the ADF best addresses these potential issues before they become critical incidents In identifying potential ethical issues arising from military health operations it is recognized that military health personnel operate within a command and control organizational structure and associated culture It is also recognized that the complexity of the issues and the environment within which military health personnel are expected to operate will raise ethical health issues not likely to be encountered to the same degree by those health practitioners operating in the average suburban practice or hospital except when health personnel are confronted with large scale emergencies such as those encountered with recent terrorist attacks and massacres

Women and Health Marlene B. Goldman, Rebecca Troisi, Kathryn M. Rexrode, 2012-12-31 Women and Health is a comprehensive reference that addresses health issues affecting women of all ages from adolescence through maturity It goes far beyond other books on this topic which concentrate only on reproductive health and has a truly international perspective It covers key issues ranging from osteoporosis to breast cancer and other cancers domestic violence sexually transmitted diseases occupational hazards eating disorders heart disease and other chronic illnesses substance abuse and societal and behavioral influences on health In this second edition of Women and Health chapters thoughtfully explore the current state of women s health and health care including the influences of sex and gender on the occurrence of a wide variety of diseases and conditions All chapters have been extensively updated and emphasize the epidemiology of the condition the etiology occurrence primary and secondary prevention screening risk factors surveillance changing trends over time and critical analysis of the diagnostic and treatment options and controversies Treatment sections in each chapter have been expanded to create a stronger dialogue between epidemiologists and women s health practitioners Saves researchers and clinicians time in quickly accessing the very latest

details on a broad range of women's health issues as opposed to searching through thousands of journal articles Provides a common language for epidemiologists public health practitioners and women's health specialists to discuss the behavioral cultural and biological determinants of women's health Researchers and medical specialists will learn how the gender specific risks and features of one organ system's diseases affect the health of other organ systems For example Hormone replacement therapy used to treat imbalance within the endocrine system is also being used to prevent and treat cardiovascular disease Drugs developed for type 2 diabetes are now being used in chemoprevention Orients the non gerontologist about the importance of considering the entire life cycle of women within research designs and treatment plans Professors teaching courses in women's health will use slides and additional materials to structure lectures courses students will use slides as a unique resource to study for exams

Governance, Globalization and Public Policy Patricia Kennett, 2008 Governance Globalization and Public Policy is concerned with exploring the nature of the policy arena in the context of globalization and the reconstitution of the state The contributors to this book seek to broaden extend and integrate theoretical conceptual and substantive policy debates The book begins by exploring the concepts and perspectives associated with globalization and governance the relationship between them and the repercussions for public policy and the state It also considers developments at the global and regional levels and the implications of the emergence of new regulatory regimes in the context of liberalization and privatization The focus then turns to a broad range of substantive areas of public policy such as human rights health and health care housing markets poverty security and counter terrorism Together the chapters provide a thorough integrated insight into the relationship between global processes governance and public policy across a range of policy domains Providing a comprehensive analysis of patterns and processes of governance in specific areas of public policy this book will be of great interest to students undertaking programmes in social policy social administration public policy and political science as well as researchers and academics concerned with the policymaking process

African Families at the Turn of the 21st Century Baffour K. Takyi, Yaw Oheneba-Sakyi, 2006-03-30 The institution of family has been central to the well being of African societies over the years African families have undergone significant transformation caused by the interplay of indigenous Arabic Islamic and European Christian cultures The juxtaposition of these three cultures in the lives of African peoples captures the triple heritage image of the continent At the same time modernization urbanization and migration have played and continue to play significant roles in the transformation of families across the continent While it is true that the traditional family has changed in many ways and that African families are continuously confronted with new challenges the renowned contributors to this volume recognize that the African family continues to adapt to emerging structural changes In the new millennium a host of issues and challenges has emerged each

with the potential to weaken or threaten the survival of the traditional African family These include the HIV AIDS pandemic a growing elderly population declining governmental support and economic decay How the post colonial family reacts to these threats and challenges has the potential to either maintain or undermine the family s role as a major organizing principle in Africa The institution of family has been central to the well being of African societies over the years African families have undergone significant transformations caused by the interplay of indigenous Arabic Islamic and European Christian cultures The juxtaposition of these three cultures in the lives of African peoples captures the triple heritage image of the continent At the same time modernization urbanization and migration have played and continue to play a role in the transformation of families across the continent While it is true that the traditional family has changed in many ways and that African families are continuously confronted with new challenges the contributors to this volume recognize that the African family has adapted to the emerging structural changes In the new millennium a host of issues and challenges have the potential to weaken or threaten the survival of the traditional African family These include the HIV AIDS pandemic which seems to afflict the young and able bodied a growing elderly population declining governmental support and economic decay How the post colonial family reacts to these threats and challenges has the potential to either maintain or undermine the family s role as a major organizing principle in Africa Profound transitions have occurred in family structure and processes since the post colonial period This work points to some of the documented transformations in African family life including the changing modes of decision making due to the establishment of a cash crop economy nuptial patterns changing maternal roles an increasing age at marriage and declining fertility a growing number of households headed by women an increase in the rate of marital instability and dissolution and changing patterns of mate selection and family relations

Women's Health in Clinical Practice Amy Lynn Clouse, Katherine Sherif, 2010-01-01 This book clearly elucidates many of the key issues found in the disparate literature on sex based differences in health and illness It provides primary care clinicians with a practical up to date source of information that can lead to optimal targeted care for women Among the topics examined in this comprehensive volume are treating and preventing osteoporosis diabetes cervical cancer eating disorders and more

Feminism Seduced Hester Eisenstein, 2015-12-03 In a pioneering reinterpretation of the role of mainstream feminism Eisenstein shows how the ruling elites of developed countries utilize women s labor and the ideas of women s liberation and empowerment to maintain their economic and political power both at home and abroad Her explorations range from the abolition of welfare as we know it and the ending of the family wage in the United States to the creation of export processing zones in the global South that depend on women s nimble fingers and from the championing of microcredit as a path to women s empowerment in the global South to the claim of women s presumed liberation in the West as an ideological weapon in the war on terrorism Eisenstein challenges activists and intellectuals to recognize that international feminism is at a fateful crossroads and argues that it is crucial for feminists to throw in their lot with the progressive forces that are seeking

alternatives to globalized corporate capitalism

Women's Health and Menopause Rodolfo Paoletti, P.G. Crosignani, P.

Kenemans, N.K. Wenger, Ann S. Jackson, 2007-07-11 The population structure in the world is rapidly changing to the extent that in 75 years we will face a tripling of the elderly population. Although women are favored in terms of life expectancy they also live with a longer period of disability approximately twice that of aging men as well as with the enemies of all the elderly: cardiovascular disease, cancer, and dementia. Menopause is the endocrine event that overlaps with aging, potentially worsening both the quality of life and the risks of disease in women. While the effect of hormone replacement therapy (HRT) on menopausal symptoms is generally viewed as rapid and consistent and is thereby accepted by the scientific community, its relationship to the other aforementioned chronic conditions associated with menopause is considered variable and controversial. In analyzing these complex issues, this volume yields new and significant insights into both the study of menopause-related disorders and their treatment by illustrating the most recent information on mechanisms of actions of new estrogen receptors and on the use of sophisticated techniques of statistical analysis for population-based studies.
