Globalization And Children Globalization And Children:

Globalization and Children Natalie Hevener Kaufman,Irene Rizzini,2007-05-08 ALLISON JAMES Globalization seems to be the word on everyone's lips with politicians as much as academics extolling its benefits as well as its contradictions For some globalization means in practice that whether in Bangkok or Boston in London or Rio as travelers from wealthy countries they can be sure to find the beer the pizzas and the jeans that they can at home they can be both at home and away simultaneously For others though globalization has had rather different often less beneficial consequences In their everyday lives people have come to find themselves tied in albeit in often unseen ways into larger economic and political systems over which they have no control yet these systems cause radical changes often for the worse rather than the better in the pattern of their daily lives And it is those who have least voice whose lives are usually affected the most In this book attention is drawn systematically really for the first time to a consideration of how processes of globalization variously impact upon the lives of children Such an approach is not only most welcome in the field of childhood studies but also long overdue It will at last enable us to begin to contextualize in a broader framework some of the many issues to do with children's rights and participation which have long been discussed as separate and discrete issues within childhood studies *Global Childhoods* Stuart Aitken,2013-09-13 This astute book initiates a broad discussion from a variety of different disciplines about how we place children nationally globally and within development discourses Unlike other books of its kind it does not seek to dwell solely on the abiding complexities of local comparisons Rather it elaborates larger concerns about the changing nature of childhood young people's experiences their citizenship and the embodiment of their political identities as they are embedded in the processes of national development and globalization In particular this book concentrates on three main issues nation building and developing children child participation and activism in the context of development and globalization and children's live in the context of what has been called the end of development These are relatively broad research perspectives that find focus in what the authors term reproducing and developing children as a key issue of national and global concern They further argue that understanding children and reproduction is key to understanding globalization

Transnational Constitutionalism Franziska Humbert,2024-02-12 The Open Access publication of this book has been made possible by the Swiss National Science Foundation Is the current structure of international law still adequate to solve global problems such as child labour This book argues for more coherence between human rights and trade law analysing the world trade law compatibility of topical trade measures on forced child labour such as the US Tariff Act of 1930 or the proposal for an EU Forced Labour Regulation mainly under the GATT non discrimination principles and the policy exceptions clause Discussing theories such as constitutionalism and pluralism Franziska Humbert develops the idea of a New Legal Humanism as a cognitive frame for the global legal order Beyond the Dyad Michael Lewis,K. Takahashi,2005-01-01 There is

consensus among social scientists that human beings from infants to elderly people develop social relationships with multiple significant others In fact everyday observations of individuals reveal that even infants interact not only with their mother but also with a variety of significant others However the attachment theory which has dominated theories and empirical studies of social relationships has argued for a narrower framework In this special issue four theoretical papers each of which provides models of social interaction that go beyond the mother child dyad are presented They theoretically contrast the attachment with the mother to relationships with multiple significant others and show that models assessing multiple relationships to others are more predicative of subsequent social and emotional adjustment Commentaries including attachment theorists and anthropologists to deepen the discussion are also presented Researchers and students in developmental psychology clinical psychology and psychiatry as well as teachers nurses and parents interested in these discussions will find in this issue essential theories that go beyond the mother child dyad
