100% Love Daniel Marques, 2013-01-05 Love the topic of thousands of novels for many centuries as well as one of the most discussed subjects in our society today is still being widely misunderstood As the number of single people in world increases scientists have tried to identify the causes that make anyone fall in love without any success What they did find were tendencies that this book reorganized in order to lead into a specific path Love is basically a subjective experience

depending foremost on personal assumptions Nevertheless if we combine what many experts have found it s possible to reach a certain number of practical deductions With this information we can dramatically increase our chances of finding the ideal partner With such idea in mind the steps here presented describe a combination of scientifically proven facts that intend to show the easiest and quickest way to find true love The informational content is useful for both women and men as it clarifies the interaction of thoughts and behaviors between both genders while describing the whole picture of the seduction and dating game leading to fulfilling relationships This said it s worth mentioning that even though a 100% match is always possible personal decisions dictate the future of any relationship and they re often too personal to be analyzed even though we can always understand them something this book helps doing as well Love is an experience of self acknowledgment and it s based on this principle that this book proposes a self analysis on our attitude towards finding it and believing that it s real
