- l. understands and makes practical applications of social science issues and trends;
- m. knows how and other practices to represent geographic, political, historical, economic, and cultural features, distributions, and relationships;
- n. communicates the value of social studies education to students, parents/guardians, colleagues, and the community.

Social Studies Content

The purpose of social studies instruction is to help students develop the ability to make informed and reasoned decisions for the public good as citizens of a culturally diverse, democratic society. An integrated study of social studies will promote the type of civic competence required of citizens of a democratic society. The common focus of social studies is human behavior. A well-informed social studies curriculum will:

- have clear goals and objectives;
- cover subject matter that interests students;
- cover a broad number of ideas and topics in depth, rather than superficially covering many topics;
- include a variety of instructional resources;
- have an emphasis on relationships among ideas, people, places, and events.

Elementary grades provide the foundation for an understanding of history, geography, economics, government, citizenship, culture, science technology, and society, and social studies skills. Content for social studies gradually moves from home, school, and community to increased understanding of the greater community, state, nation, and world. The focus gradually shifts outward from the self to the larger world.
