Eco City Planning Policies Practice And Design:

Eco-city Planning Tai-Chee Wong, Belinda Yuen, 2011-05-02 Eco city planning is a key element of urban land use planning in perspective and of ongoing debate of environmental urban sustainable development with a spatial and practical dimension The conceptual basis of ecological planning is that we can no longer afford to be merely human centred in approach Instead the interdependency of human and non human species has forced us to appreciate the rights and intrinsic values of non human species in our pursuit for a sustainable ecosystem This volume has as approach an emphasis on environmental planning policies whereby for example energy saving anti pollution measures use of non car modes construction of green buildings safeguarding of nature and natural habitats in urban areas and use of more renewable resources are promotional norms Their aims and leading outcome serve to protect the Earth from adverse effects of global warming and different sources of pollution threatening the quality of life of human societies *Eco-city Planning* Tai-Chee Wong, Belinda

Sustainability and the City Lauren Curtright, Doris Bremm, 2017-07-28 Sustainability and the City Urban Poetics and Politics contributes to third generation discourse on sustainable development by considering through a humanistic lens theories and practices of sustainability in a wide range of urban cultures It demonstrates cities inextricability from discussions on sustainability because not only is the world urbanizing at an unprecedented rate but also cities are primary locations of the circulation of excess capital socioeconomic divisions and hierarchies political resistance friction between human and non human worlds and the confluence of art policy and identity formation in placemaking With essays by scholars working in a variety of fields from architecture to literature to music to sociology this collection maintains that any hope for achieving urban sustainability will require taking seriously the ways in which cities are imagined Efforts to make cities sustainable must fully incorporate the humanities because critical endeavors and creative expressions that fall within the purview of the humanities are vital to closing the conceptual gulf as well as the practical gap between human and non human conservation Even if the environmental humanities embrace cities critics must ask whether coalescing the terms sustainability and city may actually obstruct human action to combat climate change which from some angles seems

impending self imposed apocalypse To examine the urban turn Sustainability and the City attends to culture Essays in the first part of the collection approach urban sustainability from various disciplinary vantage points to emphasize history ideology pedagogy and critical theory The second part of the collection analyzes urban commons on four different continents Finally the collection moves from a diverse set of interpretations of on the ground urban phenomena to a compilation of readings of sustainability in different media and genres sound art drama fiction and film set in or evocative of cities The collection carves out a place for artists and critics to help realize social justice in cities which generate remarkable power but power that is too often and too easily used destructively unfairly and wastefully despite cities unique capacities to inspire and sustain humanity

Eco-Cities and the Transition to Low Carbon Economies Federico Caprotti, 2014-12-02 The author examines the two most advanced eco city projects the Sino Singapore Tianjin Eco City in China and Masdar City in Abu Dhabi These are the most notable attempts at building new eco cities to both face up to the crises of the modern world and to use the city as an engine for transition to a low carbon economy

Urban Planning, Management and Governance in Emerging Economies Jan Fransen, Meine P. van Dijk, Jurian Edelenbos, 2021-06-25 Exploring how urban professionals plan manage and govern cities in emerging economies this insightful book studies the actions and instruments they employ It highlights how the paradigms of interventions and approaches to urban management are shifting indicating that urban governance is becoming increasingly important in dealing with wicked issues like climate change and social and economic inequalities in cities

The Global Foundations of Public Relations Robert E. Brown, Burton St. John III, Jenny Zhengye Hou, 2021-09-27 The Global Foundations of Public Relations Humanism China and the West explores the growing humanistic turn in public relations processes and proposes that this has compelling parallels in the roots of Chinese philosophies As the leader of growth and power across the Pacific Rim public relations in China is not developing in isolation from the West but via mutual accommodations and culturally complex interactions By collecting cases and reflections on PR practices from both Chinese and Western scholars the chapters propose that Chinese philosophies are playing a role in the development of modern Chinese PR practices and focusing less on the obvious differences and contracts seek to highlight their spiritual philosophical and political confluences The conclusions drawn enhance and advance our understanding of public relations globally This innovative work is of interest to educators and researchers in the fields of public relations strategic communications and public diplomacy

Sustainable Development and Local Government in South Korea Youngah Guahk, 2025-06-20 This book addresses one of the key issues of our time the process of sustainable transition in modern industrial societies by looking at the dynamics associated with this objective at the decentralised local level in South Korea The creation of eco cities is a crucial aspect in the ongoing urbanisation of East Asia and this book investigates specific examples of Korean local governments embarking on the path towards sustainable urban development and assesses their achievements Making use of a wide range of sources and data collection methods the book studies two diverse cases in great

depth Suwon City and Jeju Province By systematically comparing the aims strategies and decision making processes in these two examples the book illuminates the relative roles played by local leaders central government civil society representatives and even international organisations Highlighting the challenges driving forces and limitations impacting sustainable transition at the local level this book will be a valuable resource to students and scholars of Korean politics decentralisation urban governance sustainable development and city planning

Eco and Low-Carbon New Towns in China Yang

Fu,Xiaoling Zhang,2020-12-30 This book examines the sustainability transition theory in the context of urbanization in China tracing the development of eco and low carbon cities It examines how ideas on building eco cities and low carbon cities travel from nation to nation how they are adopted in the Chinese administrative context and what role inter scalar actors play in getting the ideas transferred translated and operationalized on the ground Offering an overarching theoretical framework that incorporates all urban sustainability experiments in China the book conducts a comprehensive analysis of the master plans of these new towns and summarizes the normative transition targets of sustainable urban experiments It explores how they differ from each other and how they influence transition dynamics in practice By examining four eco and low carbon new towns deemed representative of current major approaches to sustainability transition management in China the book provides a detailed depiction of generic transition management and explains the different transitional trajectories for each type of sustainable urban experiment It demonstrates how subnational level and city level transitions mediate the national transition Through a thorough inquiry into inter scalar dynamics institutional arrangements and techno social innovations in sustainable urban experiments the book links generalized transition rules and specific contexts to present a full view of the challenges failures and territorial problems of eco and low carbon new towns This book makes a novel contribution to the study of Chinese urbanization by revisiting issues and problems of contemporary urban China The reflection on these urban issues will provide implications to policymakers professionals and the common reader interested in the future sustainable urbanism in China

Elements of Sustainable Architecture Rosa Urbano Gutiérrez,Laura de la Plaza

Hidalgo,2019-12-06 For sustainable architecture to become a reality the way we design buildings needs to change Many architects are concerned that sustainable technologies may interfere with a building s aesthetic appearance and so these are often added on once the design process is complete Elements of Sustainable Architecture solves this dilemma by helping students to develop the design skills they need to create sustainable buildings ensuring that ecological considerations are applied throughout the design process Restoring the primacy of aesthetics and creativity to sustainable design the book focuses on strategies that have the greatest impact on building design It also shows the influence of sustainability considerations on choices about aspects such as composition form space tectonics materials colour textures proportion and position Specifically designed to offer a new way of understanding architecture the book introduces students to the basic principles and methods of sustainable design features current examples and inspiring case studies to support learning step

by step presents information in a visually appealing intuitive easy to understand way includes over 500 high quality colour diagrams drawings sketches and photographs A clear visual introduction to creating aesthetically beautiful and sustainable buildings this is essential reading for students in sustainable architecture courses

Low Carbon Cities Steffen Lehmann, 2014-09-15 Low Carbon Cities is a book for practitioners students and scholars in architecture urban planning and design It features essays on ecologically sustainable cities by leading exponents of urban sustainability case studies of the new directions low carbon cities might take and investigations of how we can mitigate urban heat stress in our cities microclimates The book explores the underlying dimensions of how existing cities can be transformed into low carbon urban systems and describes the design of low carbon

cities in theory and practice It considers the connections between low carbon cities and sustainable design social and individual values public space housing affordability public transport and urban microclimates Given the rapid urbanisation underway globally and the need for all our cities to operate more sustainably we need to think about how spatial planning and design can help transform urban systems to create low carbon cities and this book provides key insights

Place-making and Urban Development Pier Carlo Palermo, Davide Ponzini, 2014-12-05 The regeneration of critical urban areas through the redesign of public space with the intense involvement of local communities seems to be the central focus of place making according to some widespread practices in academic and professional circles Recently new expertise maintains that place making could be an innovative and potentially autonomous field competing with more traditional disciplines like urban planning urban design architecture and others This book affirms that the question of making better places for people should be understood in a broader sense as a symptom of the non contingent limitations of the urban and spatial disciplines It maintains that research should not be oriented only towards new technical or merely formal solutions but rather towards the profound rethinking of disciplinary paradigms In the fields of urban planning urban design and policy making the challenge of place making provides scholars and practitioners a great opportunity for a much needed critical review Only the substantial reappraisal of long standing technical cultural institutional and social premises and perspectives can truly improve place making practices The pressing need for place making implies trespassing undue disciplinary boundaries and experimenting a place based approach that can innovate and integrate planning regulations strategic spatial visioning and urban development projects Moreover the place making challenge compels urban experts and policy makers to critically reflect upon the physical and social contexts of their interventions In this sense facing place making today is a way to renew the civic and social role of urban planning and urban design
