Neutrosophic Sets and Systems, vol. 69/2024 {Special Issue on Neutrosophy and Plithogeny: Fundamentals and Applications} Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva-Vázquez, Said Broumi, 2024-07-01 A special issue of the International Journal in Information Science and Engineering Neutrosophic Sets and Systems vol 69 2024 is dedicated to the Neutrosophic approaches in research on the occasion of the international and multidisciplinary conference held at the Universidad Cesar Vallejo in Lima Peru on July 8 and 9 This event marks a significant milestone as it is the first time that the Andean region and Latin America host scholars and researchers dedicated to studying various theoretical and applicative issues in the expansive and diverse field of Neutrosophic approaches Since its conception Neutrosophic theory has proven to be an interdisciplinary and innovative field notably growing with the introduction of several generalizations of Neutrosophic Sets such as Plithogenic Sets Hypersoft Sets IndetermSoft Sets SuperHyperSoft Sets and MultiAlism These advanced conceptualizations have further expanded the versatility and application range of Neutrosophic theory allowing its

adoption in an ever increasing spectrum of disciplines The conference with its international and multidisciplinary character has brought together experts and scholars from various fields providing a unique platform for the discussion and exchange of ideas on the multiple applications of Neutrosophic approaches This special issue also addresses how scientific production in Neutrosophy focuses on social issues specific to Latin American philosophy In the regional context of Latin America it is possible to state that Neutrosophic tools and knowledge are used for the identification analysis and resolution of social problems offering unique approaches or distinctive contributions to the field of Neutrosophy influenced by its cultural and philosophical context Neutrosophic science in Latin America shows a clear pattern of how scientific production addresses social problems standing out for its innovative approaches that reflect the cultural and philosophical particularities of the region This approach has allowed Neutrosophy not only to advance in theoretical terms but also to provide practical and contextually relevant solutions to social challenges This special issue compiles works presented at the conference reflecting the richness and diversity of current research in this field We hope that these articles not only contribute to the advancement of knowledge in Neutrosophic theory but also inspire new research and applications in multiple disciplines **The**

Ross, 2024-10-18 For centuries research has been conducted on the therapeutics of Brassicaceae plants and their health promoting effects Cato the Elder 234 149 BCE documented their properties in his work *De agri cultura* and recommended using cabbage to compress wounds swelling burns and bone dislocations For arthritis he recommended chopped raw cabbage mixed with coriander and cured cabbage mixed with vinegar and honey In a groundbreaking discovery in the 1990s scientists at Johns Hopkins University isolated sulforaphane from broccoli revealing its potent anticancer properties This naturally occurring compound has proven highly effective safe and tolerable and holds immense promise as a chemoprevention agent It has the potential to combat various cancers including breast prostate gastrointestinal melanoma lung brain and bladder But its potential does not stop there It also shows promise in treating cardiovascular and neurodegenerative diseases and diabetes offering hope for those affected The cancer protecting properties of Brassica plants are mediated through compounds that induce a variety of physiological processes including antioxidant action detoxifying enzymes inducing apoptosis and cell cycle regulation Glucosinolate breakdown products can affect several stages of cancer

development including the inhibition of activation enzymes phase I and the induction of detoxification enzymes phase II Isothiocyanates and indole products formed from glucosinolates regulate cancer cell development by regulating target enzymes controlling apoptosis inhibiting angiogenesis metastasis and the migration of cancer cells and blocking the cell cycle Sulforaphane found in abundance in broccoli sprouts plays a crucial role in upregulating the transcriptional activity of specific genes and restoring epigenetic alterations This is particularly significant as it modifies epigenetic pathways by targeting histone deacetylases and DNA methyltransferases These modifications in turn alter gene transcription and expression particularly in the case of cancers This intricate process of gene regulation is a fascinating study area making broccoli sprouts a compelling component of the epigenetic diet Sulforaphane induces the cytoprotective enzyme NQO1 The inducible expression of NQO1 is regulated principally through the Keap1 Nrf2 ARE signaling pathway The activation of the Nrf2 Keap1 signaling pathway heralds the beneficial actions of drugs known to affect Nrf2 signaling such as dimethyl fumarate an FDA approved treatment for multiple sclerosis and bardoxolone methyl for chronic kidney disease There is optimism that the overall strategies are moving forward Sulforaphane rich broccoli sprout extracts provide one avenue toward this end
