Global Business Cycles and Developing Countries Eri Ikeda,2019-09-17 This book investigates how global business cycles impact the economies of developing countries Global business cycles the wave like movements of economic expansion followed by contraction in aggregate economic activities impact all economies comprising the global economy The patterns being shown in developing countries correspond increasingly to those in the global north and yet there is a relative dearth of studies exploring whether global business cycles exist and how they operate in developing economies This book explores how cycles operate at the global and sub global developing country levels with a particular focus on the level of development and the structure of the economies Drawing an important distinction between cycles and fluctuations the book criticises mainstream conceptualisation and identification of cycle phenomena and instead proposes an alternative conception and methodology for the identification of cycles Along the way the book also delves into the manufacturing and rise of China and other potential competitors in the industrial arena as increasingly important drivers of global cycles and global economic growth This book will be an important read for researchers and upper level students of development economics and international political economy

The Oxford Handbook of Structural Transformation Célestin Monga,Justin Yifu Lin,2019-02-07 The Oxford Handbook of Structural Transformation addresses the economics of structural transformation around the world It deals with major themes which include history and context critical issues and concepts methodological foundations main theoretical approaches policy issues some illuminating country experiences of structural transformation and important debates on the respective roles of the market and the state in that process The historical record provides a challenge for economists to understand the success of the rising economic powers some of them initially considered unlikely candidates for prosperity and the stagnation or decline of others Five major questions emerge Why has so much divergence

occurred among nations of the world since the Industrial Revolution and particularly during the 20th century Why has the pattern changed recently with the emergence of a few developing economies e g the multi polar world and can it be sustained What are the key drivers strategies and policies to foster structural transformation in various different country contexts and in a constantly evolving global economy How could low and middle income countries avoid development traps and learn from past experiences whilst exploiting the new opportunities offered by the Fourth Industrial Revolution What is the role of various development stakeholders and other important players in facilitating sustained economic convergence among nations This book addresses these questions bringing the rigor usefulness and multi disciplinary scope of the Oxford Handbook series to a critical topic in economics The Oxford Handbook of Structural Transformation is an essential reference work and a stimulus to new research and creativity across all branches of the social sciences [Africa's Economic Partnership with China](#) Mussie Delelegn Arega,2022-11-30 This book examines how increasing Africa China relations in the fields of trade development finance and investment have impacted productive capacities and structural economic transformation in sub Saharan Africa SSA The book argues that statistical and empirical evidence shows that China s influence has not substantially altered the fundamentals in Africa and instead outlines a framework of policy conclusions and recommendations to help achieve transformational growth and development Despite increased Chinese investments in transport energy communications and manufacturing sub Saharan Africa is yet to see tangible economic and development benefits according to the multidimensional Productive Capacities Index PCI External trade is dogged by the same problems as during the colonial era with primary commodities dominating exports to China and industrial or manufacturing products dominating imports thereby leaving the region exposed to external economic shocks The book considers whether there are lessons to be learned from the experience of Asian countries such as Vietnam proposing pragmatic coordinated non ideological and non confrontational policy approaches to development This book will be of interest to researchers policymakers advisors academics and practitioners with an interest in development in Africa and China s increasing role in the continent **Economics of Growth and Development** Bhavya Bhagat,Sakshi Gupta,2025-07-23 *China and Africa* Daniel Large,2021-08-25 China has gone from being a marginal to a leading power in Africa in just over two decades Its striking ascendancy in the continent is commonly thought to have been primarily driven by economic interests especially resources like oil This book argues instead that politics defines the new era of China Africa relations and examines the importance of politics across a range of areas from foreign policy to debt development and the Xi Jinping incarnation of the China model Going beyond superficial depictions of China s engagement as predatory or benign this book explores how Africa is and isn t integral to China s global ambitions from the Belt and Road Initiative to strategic competition with the United States It demonstrates how African actors constrain shape and use China s engagement for their own purposes As China seeks to protect its more established interests and Chinese citizens it also shows how security has become a

particularly notable new area of engagement This innovative book provides a comprehensive and up to date guide to contemporary China Africa relations It will be essential reading for students and scholars working on global politics development and international relations Routledge Handbook of the Extractive Industries and Sustainable Development Natalia Yakovleva,Edmund Nickless,2022-05-30 The Routledge Handbook of the Extractive Industries and Sustainable Development provides a cutting edge comprehensive overview of current trends challenges and opportunities for metal and mineral production and use in the context of climate change and the United Nations Sustainable Development Agenda 2030 Minerals and metals are used throughout the world in manufacturing construction infrastructure production of electronics and consumer goods Alongside this widespread use extraction and processing of mineral resources take place in almost every nation at varying scales both in developing countries and major developed nations The chapters in this interdisciplinary handbook examine the international governance mechanisms regulating social environmental and economic implications of mineral resource extraction and use The original contributions from a range of scholars examine the relevance of the mining industry to the United Nations Sustainable Development Goals SDGs reviewing important themes such as local communities Indigenous peoples gender equality and fair trade showing how mining can influence global sustainable development The chapters are organised into three sections Global Trends in Mineral Resources Consumption and Production Technology Minerals and Sustainable Development and Management of Social Environmental and Economic Issues in the Mining Industry This handbook will serve as an important resource for students and researchers of geology geography earth science environmental studies engineering international development sustainable development and business management among others It will also be of interest to professionals in governmental international and non governmental organisations that are working on issues of resource governance environmental protection and social justice **Demystifying the World**
