*Economic interests and the origins of electoral systems* Thomas R. Cusack, Torben Iversen, David W. Soskice, 2007

*Routledge Handbook of Comparative Political Institutions* Jennifer Gandhi, Rubén Ruiz-Rufino, 2015-04-10 The Routledge Handbook of Comparative Political Institutions HCPI is designed to serve as a comprehensive reference guide to our accumulated knowledge and the cutting edge of scholarship about political institutions in the comparative context. It differs from existing handbooks in that it focuses squarely on institutions but also discusses how they intersect with the study of mass behaviour and explain important outcomes drawing on the perspective of comparative politics. The Handbook is organized into three sections. The first section, consisting of six chapters, is organized around broad theoretical and empirical challenges affecting the study of institutions. It highlights the major issues that emerge among scholars defining, measuring, and analyzing institutions. The second section includes fifteen chapters, each of which handles a different substantive institution of importance in comparative politics. This section covers traditional topics such as electoral rules and federalism as well as less conventional but equally important areas including authoritarian institutions, labor market institutions, and the military. Each chapter not only provides a summary of our current state of knowledge on the topic but also advances claims that emphasise the research frontier on the topic and that should encourage greater investigation. The final section, encompassing seven chapters, examines the relationship between institutions and a variety of important outcomes such as political violence, economic performance, and voting behavior. The idea is to consider what features of the political, sociological, and economic world we understand better because of the scholarly attention to institutions. Featuring contributions from leading researchers in the field from the US, UK, Europe, and elsewhere, this Handbook will be of great interest to all students and scholars of political institutions, political behaviour, and comparative politics. Jennifer Gandhi is Associate Professor, Department of Political Science, Emory University. Rubén Ruiz-Rufino is Lecturer in International Politics, Department of Political Economy, King's College London.

**The Oxford Handbook of Transformations of the State** Stephan Leibfried, Evelyne Huber, Matthew Lange, Jonah D. Levy, Frank Nullmeier, John D. Stephens, 2015-06-11. This Handbook offers a comprehensive treatment of transformations of the state from its origins in different parts of the world and different time periods to its transformations since World War II in the advanced industrial countries, the post-Communist world, and the Global South. Leading experts in their fields from Europe and North America discuss conceptualizations and theories of the state and the transformations of the state in its

engagement with a changing international environment as well as with changing domestic economic social and political challenges The Handbook covers different types of states in the Global South from failed to predatory rentier and developmental in different kinds of advanced industrial political economies corporatist statist liberal import substitution industrialization and in various post Communist countries Russia China successor states to the USSR and Eastern Europe It also addresses crucial challenges in different areas of state intervention from security to financial regulation migration welfare states democratization and quality of democracy ethno nationalism and human development The volume makes a compelling case that far from losing its relevance in the face of globalization the state remains a key actor in all areas of social and economic life changing its areas of intervention its modes of operation and its structures in adaption to new international and domestic challenges

*The Politics of Place and the Limits of Redistribution* Melissa Ziegler Rogers, 2015-10-14 Numerous scholars have noticed that certain political institutions including federalism majoritarian electoral systems and presidentialism are linked to lower levels of income redistribution This book offers a political geography explanation for those observed patterns Each of these institutions is strongly shaped by geography and provides incentives for politicians to target their appeals and government resources to localities Territorialized institutions also shape citizens preferences in ways that can undermine the national coalition in favor of redistribution Moreover territorial institutions increase the number of veto points in which anti redistributive actors can constrain reform efforts These theoretical connections between the politics of place and redistributive outcomes are explored in theory empirical analysis and case studies of the USA Germany and Argentina

Timing & Turnout Sarah F. Anzia, 2013-12-03 Public policy in the United States is the product of decisions made by more than 500 000 elected officials and the vast majority of those officials are elected on days other than Election Day And because far fewer voters turn out for off cycle elections that means the majority of officials in America are elected by a politically motivated minority of Americans Sarah F Anzia is the first to systemically address the effects of election timing on political outcomes and her findings are eye opening The low turnout for off cycle elections Anzia argues increases the influence of organized interest groups like teachers unions and municipal workers While such groups tend to vote at high rates regardless of when the election is held the low turnout in off cycle years enhances the effectiveness of their mobilization efforts and makes them a proportionately larger bloc Throughout American history the issue of election timing has been a contentious one Anzia s book traces efforts by interest groups and political parties to change the timing of elections to their advantage resulting in the electoral structures we have today Ultimately what might seem at first glance to be mundane matters of scheduling are better understood as tactics designed to distribute political power determining who has an advantage in the electoral process and who will control government at the municipal county and state levels

**The Political Geography of Inequality** Pablo Beramendi, 2012-03-26 This book addresses two questions why some political systems have more centralized systems of interpersonal redistribution than others and why some political unions make larger

efforts to equalize resources among their constituent units than others This book presents a new theory of the origin of fiscal structures in systems with several levels of government The argument points to two major factors to account for the variation in redistribution the interplay between economic geography and political representation on the one hand and the scope of interregional economic externalities on the other To test the empirical implications derived from the argument the book relies on in depth studies of the choice of fiscal structures in unions as diverse as the European Union Canada and the United States in the aftermath of the Great Depression Germany before and after Reunification and Spain after the transition to democracy **The SAGE Handbook of Political Science** Dirk Berg-Schlosser, Bertrand Badie, Leonardo

Heaman, David Tough, 2020-09-17

Canadians can never not argue about taxes From the Chinese head tax to the Panama Papers from the National Policy to the Canada United States Mexico Agreement tax grievances always inspire private resentments and public debates But if resentment and debate persist the terms of the debate have continually altered and adapted to reflect changing social economic and political conditions in Canada and the wider world The centenary of income tax is the occasion for Canadian scholars to wrestle with past and present debates about tax equity efficiency and justice Who Pays for Canada explores the different ways governments can and should tax their peoples and evaluates how well Canada has done so It brings together a diverse group of perspectives from academia law economics political science history geography philosophy and accountancy and from the wider world of activists and public servants It asks how Canada compares to other countries and how other countries especially the United States influence Canadian tax policies It also surveys internal tax tensions and politics through the lenses of region and jurisdiction as well as race class and gender Reasoning from tax perplexities and reforms in the past and the present it argues that fair taxation requires an informed populace and a democratically inclined public will Above all this book serves as a reminder that it is not only what counts as fair that is important but how fairness is evaluated Revealing how closely tax policy is tied to mainstream politics human rights and morality Who Pays for Canada represents new perspectives on a matter of tremendous national urgency **The Oxford Handbook of Skills and Training** Chris

Warhurst, Ken Mayhew, David Finegold, John Buchanan, 2017 Skills and workforce development are at the heart of much research on work employment and management But are they so important To what extent can they make a difference for individuals organizations and nations How are the supply and more importantly the utilization of skill currently evolving What are the key factors shaping skills trajectories of the future This Handbook provides an authoritative consideration of issues such as these It does so by drawing on experts in a wide range of disciplines including sociology economics labour industrial relations human resource management education and geography The Handbook is relevant for all with an interest in the changing nature and future of work employment and management It draws on the latest scholarly insights to shed new light on all the major issues concerning skills and training today While written primarily by leading scholars in the field it is equally relevant to policy makers and practitioners responsible for shaping the development of human capability today and into the future

Herzberg,2019-05-29 The political process focuses on the ways that people come together to engage in collective decision making in a variety of contexts The central elements of the political process include the formation of rules the subsequent interactions that take place within those rules and the evolution of rules over time Scholars working in the area of Virginia political economy e g James Buchanan and Gordon Tullock emphasize the importance of applying the tools of economics to non market settings including politics Scholars in this tradition focus on both politics and economics to understand the formation of political rules constitutional political economy as well as the subsequent play within those rules public choice Scholars in the Bloomington School most notably Elinor and Vincent Ostrom have emphasized three important aspects of the political process and political order The first is the distinction between rules in form and rules in use The rules in form refer to codified rules while the rules in use refer to the rules that people actually follow in their daily lives Together these dynamics generate the political order The chapters in this volume explore and engage the key thinkers and ideas of the Virginia and Bloomington schools of political economy The diversity in topics and approaches will make the volume of interest to readers in a variety of fields including economics entrepreneurship history political science and public policy

Inequality in the Workplace Jiyeoun Song,2014-02-25 The past several decades have seen widespread reform of labor markets across advanced industrial countries but most of the existing research on job security wage bargaining and social protection is based on the experience of the United States and Western Europe In Inequality in the Workplace Jiyeoun Song focuses on South Korea and Japan which have advanced labor market reform and confronted the rapid rise of a split in labor markets between protected regular workers and underprotected and underpaid nonregular workers The two countries have implemented very different strategies in response to the pressure to increase labor market flexibility during economic downturns Japanese policy makers Song finds have relaxed the rules and regulations governing employment and working conditions for part time temporary and fixed term contract employees while retaining extensive protections for full time

permanent workers In Korea by contrast politicians have weakened employment protections for all categories of workers In her comprehensive survey of the politics of labor market reform in East Asia Song argues that institutional features of the labor market shape the national trajectory of reform More specifically she shows how the institutional characteristics of the employment protection system and industrial relations including the size and strength of labor unions determine the choice between liberalization for the nonregular workforce and liberalization for all as well as the degree of labor market inequality in the process of reform
