Gis Organisations And People A Socio Technical Approach Gis For Beginners:

GIS, Organisations and People James Petch, 2019-08-08 GIS projects have previously been viewed primarily as technical exercises but it is now evident that the success of GIS projects depends as much upon organisational issues as upon technicalities GIS projects have socio organisational contexts which must be taken into account if such projects are to succeed The book presents an overview of the human side of GIS both individual and organisational **GIS, Organisations, and People** Derek E. Reeve, 1999 *Geospatial Semantics and the Semantic Web* Naveen Ashish, Amit P. Sheth, 2011-06-11 The availability of geographic and geospatial information and services especially on the open Web has become abundant in the last several years with the proliferation of online maps geo coding services geospatial Web services and geospatially enabled applications The need for geospatial reasoning has significantly increased in many everyday applications including personal digital assistants Web search applications local aware mobile services specialized systems for emergency response medical triaging intelligence analysis and more *Geospatial Semantics and the Semantic Web Foundations Algorithms and Applications* an edited volume contributed by world class leaders in this field provides recent research in the theme of geospatial semantics This edited volume presents new information systems applications that have potential for high impact and commercialization Also special effort was made by the contributors to focus on geospatial ontology development related standards geospatial ontology alignment and integration and algorithmic techniques for geospatial semantics Case studies and examples will be provided throughout this book as well as possibilities for future research *Spatial Data Infrastructures at Work* Ezra Dessers, 2013-07-04 Spatial data identifies the geographic location of natural and constructed features and boundaries on Earth and has become increasingly important in various administrative practices In order to facilitate access use and sharing of spatial data among organisations information is brought together in clustered initiatives known as Spatial Data Infrastructures SDIs In *Spatial Data Infrastructures at Work* Ezra Dessers introduces spatial enablement as a key concept to describe the realisation of SDI objectives in the context of individual public sector processes Drawing on four years of research Dessers argues that it has become essential even unavoidable to manage and re design inter organisational process chains in order to further advance the role of SDIs as an enabling platform for a spatially enabled society Detailed case studies illustrate that the process he describes is the setting in which one can see the SDI at work This book is must read material for academics practitioners and policymakers dealing with sdi and spatial enablement By extension the book will also be of great interest to anyone confronted with societal issues that call for an integrated approach implying in depth cooperation between multiple organisations **Geographic Information Management in Local Government** Ian Gilfoyle, Peter Thorpe, 2016-04-19 As early pioneers in the use of digital geographic data many local governments in the UK were ahead of their counterparts in central government and the private sector in the application of GIS technology To meet current challenges local authorities must coordinate the latest technology with effective information

Geographic Information Systems to Spatial Data Infrastructures Ian Masser, 2019-09-25 This book draws on author's wealth of knowledge working on numerous projects across many countries It provides a clear overview of the development of the SDI concept and SDI worldwide implementation and brings a logical chronological approach to the linkage of GIS technology with SDI enabling data The theory and practice approach help understand that SDI development and implementation is very much a social process of learning by doing The author masterfully selects main historical developments and updates them with an analytical perspective promoting informed and responsible use of geographic information and geospatial technologies for the benefit of society from local to global scales Features Subject matter spans thirty years of the development of GIS and SDI Brings a social science perspective into GIS and SDI debates that have been largely dominated by technical considerations Based on a world wide perspective as a result of the author's experience and research in the USA Australia Canada Brazil Peru China India Korea Malaysia and Japan as well as most European countries Draws upon professional and academic experience relating to pioneering UK and European GIS research initiatives Includes updated historical material with an analytical perspective explaining what was done right and what didn't work

Socio-Economic Applications of Geographic Information Science David Kidner, Gary Higgs, Sean White, 2002-12-05 To date

no one volume in the Innovations in GIS series has been given over to solely highlighting the use of up to date GIS based techniques in a range of socio economic applications This monograph redresses this gap The book begins with a short introductory chapter on the fundamental principles of GIS followed by an examination of recent *Introduction to Geographic Information Systems* Falguni Mukherjee, 2024-12-23 Geographic information systems GIS is a rapidly advancing field that has become thoroughly integrated into our society and inseparable from our daily lives Today GIS is used by professionals in many different disciplines and fields such as public health disaster management law enforcement environmental management resource allocation forestry geology and more In this full color textbook author Falguni Mukherjee equips students with GIS and spatial thinking skills applicable to this wide range of disciplines and fields preparing them for success in countless professions This comprehensive grounded introduction to the basics of geographic information systems and science is written in a clear and accessible style making the complex and sophisticated field of GIS and spatial thinking comprehensible for beginners Up to date with current GIS trends and incorporating exercises using a number of GIS software Mukherjee covers a wide array of topics including the history of GIS geospatial data models and analysis projections and coordinate systems database management systems cartography ethics in GIS GIS project management principles GIS and society and digital transformation Features of this exciting brand new text include Chapter opening learning objectives to guide students course goals Helpful study aids such as key terms bolded in the text and compiled both at the end of each chapter and in a comprehensive glossary End of chapter questions and activities utilizing GIS software to promote active learning and build useful skills A stunning full color art program with detailed maps figures tables and photos to engage students as visual learners **The Development of an Integrated Planning and Decision**

Support System (IPDSS) for Land Consolidation Demetris Demetriou, 2013-11-01 This book provides an extensive review of three interrelated issues land fragmentation land consolidation and land reallocation and it presents in detail the theoretical background design development and application of a prototype integrated planning and decision support system for land consolidation The system integrates geographic information systems GIS and artificial intelligence techniques including expert systems ES and genetic algorithms GAs with multi criteria decision methods MCDM both multi attribute MADM and multi objective MODM The system is based on four modules for measuring land fragmentation automatically generating alternative land redistribution plans evaluating those plans and automatically designing the land partitioning plan The presented research provides a new scientific framework for land consolidation planning both in terms of theory and practice by presenting new findings and by developing better tools and methods embedded in an integrated GIS environment It also makes a valuable contribution to the fields of GIS and spatial planning as it provides new methods and ideas that could be applied to improve the former for the benefit of the latter in the context of planning support systems From the 1960s ambitious research activities set out to observe regarding IT support of the complex and time consuming redistribution

processes within land consolidation without any practically relevant results until now This scientific work is likely to close that gap This distinguished publication is highly recommended to land consolidation planning experts researchers and academics alike Prof Dr Ing Joachim Thomas Münster Germany Planning support systems take new scientific tools based on GIS optimisation and simulation and use these to inform the process of plan making and policy This book is one of the first to show how this can be consistently done and it is a triumph of demonstrating how such systems can be made operational Essential reading for planners analysts and GI scientists Prof Michael Batty University College London **Spatial**

Information and the Environment Peter Halls, 2003-09-02 There is considerable current academic interest in the interface between geographical information systems GIS and the environment This new monograph explores the process from start to finish It begins with information acquisition in the environment and moves on to tool and techniques for manipulating the information visualisation and navigation methods for exploring it and computation and modelling techniques for its analysis It then concludes with a survey of decision support for its application Spatial Information and the Environment is the eighth book in the Innovations in GIS series initiated in 1994 The series is in essence derived from a selection of the presentations made at the annual GIS Research UK conference 2000 held in York and has now changed its focus by concentrating on a single topic making each text distinctive GIS for Group Decision Making Piotr Jankowski, Timothy Nyerges, 2001-01-18 In

today's society it is very common for decisions that influence us all to be made by a combination of interested parties all with their own agenda In this instance how can we be sure that the decision is the correct one not just decided by the group with the most political influence or most money Such groups have now become fundamental deci Research and Theory in Advancing Spatial Data Infrastructure Concepts Harlan Joseph Onsrud, 2007 Spatial data infrastructures SDIs have come a long way in the last two decades **Geographic Information Systems for the Social Sciences** Steven J.
