*American Book Publishing Record*, 2006 **Theorizing Legal Punishment** Richard L. Lippke, 2024-02-06 This book systematically defends an account of the institution of legal punishment that draws on both retributive and crime prevention thinking The work argues that legal punishment censures convicted offenders and thus morally communicates with them any victims and the broader community while also serving to reduce future crime The expressive or retributive element is assigned the lead role in this mixed account because it better captures the notion that members of society are to be held morally accountable for their failures to abide by defensible criminal prohibitions of various kinds Despite this it is conceded that the reduction of crime plays a vital role in justifying the institution of legal punishment and the book contains extended discussion of how and why this is so Beyond its explication of the aims of legal punishment and their respective roles within a mixed theory the study devotes separate chapters to sentencing criminal procedure and the imposition of fees and collateral legal consequences on individuals who have been convicted of crimes and fully served their sentences In these ways the work moves beyond discussion of the abstract aims of legal punishment to details of the institution's internal structure and operations The many historical deficiencies and failures of the institution are duly noted and the challenges they pose for punishment theorizing are examined The book closes with discussion of the limited success of punishment institutions in apprehending convicting and punishing those who violate the law including many who do so in serious ways Alternatives to reliance on legal punishment institutions are briefly examined In the end retention of such institutions is urged although it is suggested that we ought to have modest expectations about their ultimate success The work will be of interest to those working in the areas of Legal Philosophy and Criminology *The Glannon Guide to Civil Procedure* Joseph W. Glannon, 2013

Hasen, 2010-01-01 Examples builds student understanding step by step moving from the basics to the more complex and allowing students to apply the law to particular fact patterns allows students to study chapters in any order demystifies the language of remedies using straightforward and student friendly examples charts and illustrations shows students how to do the math related to issues such as computing compensatory damages present value and constructive trusts offers compatibility with all major remedies books including those that approach remedies through public law and those that approach it through private law remains the only book in the field to provide both black letter law and examples and answers to build student knowledge the level of complexity builds as examples continue in each chapter discusses major remedies cases Hadley v Baxendale State Farm v Campbell Sullivan v O Connor provides detailed coverage of the draft Restatement Third of Restitution and gives

detailed analyses of remedies issues under Article 2 of the Uniform Commercial Code      *The AALS Directory of Law Teachers* ,2007      Answering for Crime R A Duff,2007-11-16 In this long awaited book Antony Duff offers a new perspective on the structures of criminal law and criminal liability His starting point is a distinction between responsibility understood as answerability and liability and a conception of responsibility as relational and practice based This focus on responsibility as a matter of being answerable to those who have the standing to call one to account throws new light on a range of questions in criminal law theory on the question of criminalisation which can now be cast as the question of what we should have to answer for and to whom under the threat of criminal conviction and punishment on questions about the criminal trial as a process through which defendants are called to answer and about the conditions bars to trial given which a trial would be illegitimate on questions about the structure of offences the distinction between offences and defences and the phenomena of strict liability and strict responsibility and on questions about the structures of criminal defences The net result is not a theory of criminal law but it is an account of the structure of criminal law as an institution through which a liberal polity defines a realm of public wrongdoing and calls those who perpetrate or are accused of perpetrating such wrongs to account
