### **Political and Economic Change in the**

**Automobile Industry** Claudio Cosentino, 2009-10-20 Inhaltsangabe Definition of problem This paper deals with the future strategic orientation of manufacturers of luxury cars The sociological political ecological technological and economic environmental factors and their influence on corporate orientation will be highlighted and analysed This fundamental problem for car niche brands is investigated through the example of Maserati an upmarket brand which has become like no other both a trendsetter and a victim of the expectations of its patrons and customers and is now struggling for market shares together with its parent company This paper will initially highlight influencing factors and also the need for efficiency in manufacture and production as well as the new tasks and challenges arising from legislation Macroeconomic factors such as the shrinking purchasing power in developed countries like the U S due to inflation and stagflation worries which result from the daily rise in raw material prices exert just as great an influence on car sales figures as the growing number of super rich in Third World countries The question concerning the shift of target markets arises Do the raw materials inhibit sales for these products Or is the clientele immune What innovations are demanded and are they compatible with the attributes associated with super sports cars and luxury cars Ferrari Maserati Lamborghini and even Aston Martin are manufacturers

who boast that they make cars with horrendous power ratings fuel consumption and emission levels Their customers love the sound of the engines comparable as they are with aircraft engines They produce engines with eight ten or even twelve cylinders epitomising power but at the same time are more suitable for the race track than for the road if one compares their figures with those of classic mass market cars The customers rate performance and sound higher than fuel consumption per litre and environmental awareness These are geared to basic male instincts Beauty of form brute force and eroticism are mostly described in terms of beautiful women or sins or mythological mental attributes The marketing is concerned with lifestyle passion and the child in people the Freudian id A man simply wants to own these mighty projectiles forget common sense The owner of such a car is according to this car's marketing image the one who has created it He is successful healthy rich and good looking A majority of the world's male

### **Emerging-market Multinational Enterprises in East Central Europe**

Ágnes Szunomár, 2020-11-23 The rise of multinational enterprises MNEs from emerging markets is topical important and poses a number of questions and challenges that require considerable attention in the future from academia as well as business management The recent takeovers of high profile companies in developed or developing countries by non European emerging market MNEs EMNEs such as Lenovo Wanhua China Hindalco India CVRD Brazil Cemex Mexico Lukoil Russia etc as well as the greenfield or brownfield investments of emerging companies such as Huawei ZTE Tata Pepco etc show a new trend where new kind of firms become major players globally EMNEs have become important players in several regions around the globe ranging from the least developed countries of Africa through the developing markets in Latin America and Asia to the developed countries of the United States or the European Union including East Central European ECE countries EMNEs presence on the global level has resulted in numerous studies in the international literature but those research results barely cover EMNEs activities in the ECE region in the East Central European EU member countries including the

Czech Republic Hungary Poland Slovakia and Slovenia The existing books typically focus on the investment activity of a single country or region such as China or East Asia but a comprehensive analysis is still missing in this regard The novelty of this edited volume is that it aims at exploring EMNEs location determinants strategies activities and challenges in East Central Europe by discussing its anomalies to the traditional theories as well as to other types of MNEs in the ECE region The authors focus on EMNEs not only from China but from other important emerging countries too such as Russia India South Korea Taiwan Turkey Brazil or South Africa

**Economy of Automotive Industrialization in East Asia** Richard F. Doner, Gregory W. Noble, John Ravenhill, 2021-04-21

East Asia is a powerhouse of automobile production Yet across the region national automobile industries have had strikingly different patterns of development Despite starting from equally low levels of performance and initially similar strategies countries have experienced vastly different results From Thailand's success as an assembly hub for foreign automakers and China's unexpected achievements in building its own car industry to South Korea's impressive development of an integrated industry to the Philippines persistent weakness these divergent paths offer a fascinating window into the determinants of economic growth The Political Economy of Automotive Industrialization in East Asia provides a political explanation for why development strategies and performance have been so uneven within one of the world's most important regions Utilizing interviews and original language research from multiple nations this book explains that factors such as market size and neoclassical economic policies alone cannot explain these patterns of development Richard F Doner Gregory W Noble and John Ravenhill instead highlight the significance of two sets of factors countries very different capabilities for implementing policies and the political forces that help to explain the emergence of effective institutions Through cross national analyses of China Taiwan South Korea Indonesia Malaysia the Philippines and Thailand the book sets up a clear structure for understanding industrial development and how it enables or constrains the capabilities of domestic firms Brief comparisons with Brazil Mexico and other developing countries confirm the utility of the analytic framework and demonstrate how it is superior both to accounts in mainstream economics and much of political science which fail to give sufficient emphasis to the role of public and public private institutions or provide an explanation of the political bases of those institutions In a world where auto assemblers and suppliers are facing new challenges in an ever evolving industry such as the transition to electric and autonomous vehicles this book offers a crucial perspective on the centrality of institutional capacities and political economy By tracing the divergent trajectories of seven nations The Political Economy of Automotive Industrialization in East Asia offers lessons beyond the automobile industry that illustrate the broader importance of institutions to economic growth

**The Urban Transport Crisis in Emerging Economies** Dorina Pojani,Dominic Stead,2016-11-18 This edited volume discusses urban transport issues policies and initiatives in twelve of the world s major emerging economies Brazil China Colombia India Indonesia Iran Mexico Nigeria Russia South Africa Turkey and Vietnam countries with large populations that have recently experienced large changes in urban structure motorization and all the associated social economic and environmental impacts in positive and negative senses Contributions on each of these twelve countries focus on one or more major cities per country This book aims to fill a gap in the transport literature that is crucial to understanding the needs of a large portion of the world s urban population especially in view of the southward shift in economic power Readers will develop a better understanding of urban transport problems and policies in nations where development levels are below those of richer countries mainly in the northern hemisphere but where the rate of economic growth is often increasing at a faster rate than the wealthiest nations

**Shifting to a Higher Gear: The Saga of Malaysia's National Carmaker Proton** Pritish Bhattacharya,Francis E Hutchinson,2024-05-03 Proton has been a vital part of Malaysia s industrialization journey and a key pillar of its modernization drive Launched in 1983 to fulfil then Prime Minister Mahathir Mohamad s vision of a pride infused national car company the state owned Proton grew quickly and captured a dominant share of the country s domestic car market aided in no small measure by generous protective measures and subsidies However in the subsequent decades the car giant lost market share and power due to a variety of challenges such as non market performance requirements less effective protection and growing competition from a second national car firm and from global car companies The automaker has had a variety of ownership structures over time but was resolutely kept in domestic hands public and private This did increase control over the corporation but did so at the expense of exposure to and adoption of leading edge technology This impasse was resolved in 2017 when Proton sold a 49.9 per cent share to the Chinese auto firm Geely The joint venture has rejuvenated the carmaker which has begun to reconquer market share through a number of popular SUVs Despite this the Malaysian auto market is becoming increasingly competitive Going forward Proton will need to begin to export significantly to expose its vehicles to new niche markets as well as global

standards obtain and retain skilled workers and continue to rationalize costs in its supply chains and distributorships

Technology Transfer and Economic Growth in Sub-Sahara African Countries Nathaniel O. Agola, 2016-03-21 This book provides a pragmatic analytical model grounded on the solid idea that technologies and the accompanying implementation efforts only make sense if they are successfully deployed in markets The analytical model also provides an exhaustive analysis of all critical variables at the global regional and national levels which contribute to failure or success of technology transfer efforts The model is validated by an incisive analysis of technology transfer experiences of Japan Korea Singapore Taiwan province of China and Malaysia While this book finds that these East Asian countries have had both diverging and converging models and experiences with technology transfer the enduring and fundamental aspects of technology transfer in specific industrial sectors and economic growth in these countries is then used to draw lessons for African countries This book therefore is a timely and compelling piece of research work that provides valuable answers to the increasingly urgent question of how African countries can industrialize through technology transfer to meet their economic development and growth ideals
