Climate Change and Critical Agrarian Studies Ian Scoones, Saturnino M. Borras Jr., Amita Baviskar, Marc Edelman, Nancy Lee Peluso, Wendy Wolford, 2023-11-30 Climate change is perhaps the greatest threat to humanity today and plays out as a cruel engine of myriad forms of injustice violence and destruction The effects of climate change from human made emissions of greenhouse gases are devastating and accelerating yet are uncertain and uneven both in terms of geography and socio economic impacts Emerging from the dynamics of capitalism since the industrial revolution as well as industrialisation under state led socialism the consequences of climate change are especially profound for the countryside and its inhabitants The book interrogates the narratives and strategies that frame climate change and examines the institutionalised responses in agrarian settings highlighting what exclusions and inclusions result It explores how different people in relation to class and other co constituted axes of social difference such as gender race ethnicity age and occupation are affected by climate change as well as the climate adaptation and mitigation responses being implemented in rural areas The book in turn explores how climate change and the responses to it affect processes of social differentiation trajectories of accumulation and in turn agrarian politics Finally the book examines what strategies are required to confront climate change and the underlying political economic dynamics that cause it reflecting on what this means for agrarian struggles across the world The 26 chapters in this volume explore how the relationship between capitalism and climate change plays out in the rural world and in particular the way agrarian struggles connect with the huge challenge of climate change Through a huge variety of case studies alongside more conceptual chapters the book makes the often missing connection between climate change and critical agrarian studies The book argues that making the connection between climate and agrarian justice is crucial The chapters in this book were originally published in *The Journal of Peasant Studies* The Open Access version of this book available at <https://www.taylorfrancis.com/books/oa-edit/10.4324/9781003467960/climate-change-critical-agrarian-studies-ian-scoones-saturnino-borras-jr-amita-baviskar-marc-edelman-nancy-lee-peluso-wendy-wolford> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license A version of the open access title is also available on the OAPEN platform <https://library.oapen.org/handle/20.500.12657/85297>

An urgent and extraordinary book Weaving a philosophical analysis of Heidegger Agamben and Foucault Jan draws out the implications of their thought for a radical analysis of the ontological politics of Islam and Pakistan Whether writing about the Ulama and Deoband schools blasphemy laws the military beards or the Bamiyan Buddhas Jan provokes and challenges our thinking while unearthing the ground on which Pakistan and our world are built Joel Wainwright Department of Geography Ohio State University USA In this exceptionally inventive and important book Jan shows us that the problems besetting political life in Pakistan are part of a more troubling crisis in modern forms of power Challenging accounts that cordon off political Islam from the West Jan discloses their fundamental indistinction and thus through his practice of critical ontology reorients our understanding of how power and violence are at work in the world Joshua Barkan Department of Geography University of Georgia USA *The Metacolonial State* presents a novel rethinking of the relationship between Islam and the Political Key to the text is an original argument regarding the biopoliticization of Islam and the imperative need for understanding sovereign power and the state of exception in resolutely ontological terms Through the formulation of a critical ontology of political violence *The Metacolonial State* endeavors to shed new light on the signatures of power undergirding postcolonial life while situating Pakistan as a paradigmatic site for reflection on the nature of modernity s precarious present The cross disciplinary approach of Dr Jan s work is certain to have broad appeal among geographers historians anthropologists postcolonial theorists and political scientists among others At the same time his explication of critical ontology with its radical reading of the interlacement of history power and the event promises to add a bold new dimension to social science research on Islamism and biopolitics **Production of Disaster and Recovery in**

Post-Earthquake Haiti Juliana Svistova, Loretta Pyles, 2018-02-21 Natural disasters have long been seen as naturally generated events but as scientific technological and social knowledge of disasters has become more sophisticated the part that people and systems play in disaster events has become more apparent *Production of Disaster and Recovery in Post Earthquake Haiti* demonstrates how social processes impact disasters as they unfold through the distribution of power and resources the use of discourses and images of disaster and the economic and social systems and relations which underlie affected communities The authors show how these processes played out in post earthquake Haiti to set in motion the

mechanics of the disaster industrial complex to re produce disasters and recovery rather than bring sustainable change The book reveals that disaster and recovery rhetoric helped create fertile conditions for neoliberal disaster governance militarized and digital humanitarianism non profiteering and disaster opportunism to flourish while further disenfranchising marginalized populations However the Haiti earthquake as is the case with all disaster sites was ripe with mutual aid community building and collective action all of which further local resilience The authors seek to re construct dominant discourses policies and practices to advance equitable participatory partnerships with local community actors and propose a praxis for a people s recovery as an action oriented framework for resisting the transnational disaster industrial machinery The authors argue for new synergies in policymaking and program development that can respond to emergencies and plan for true long term sustainable development after disasters that focuses as much on humans and the natural world as it does on economic progress Production of Disaster and Recovery in Post Earthquake Haiti will be of great interest to students and scholars of disaster studies humanitarian studies development studies Haitian studies geography and environmental studies as well as to non governmental organizations humanitarians and policymakers
