Global Food Futures Feeding The World In 205:

Global Food Futures Brian Gardner, 2013-08-01 By 2050 the world will be faced with the enormous challenge of feeding 9 billion people despite being affected by climate change rising energy costs and pressure on food growing land and other major resources How will the world produce 70% more food by 2050 to feed a projected extra 2.3 billion people What will be the impact of food shortages and high prices on areas in crisis such as sub Sahara Africa Where will future production growth come from And how do we balance the need for environmental protection with sustainable agricultural production methods This is the first text to present a scholarly balanced approach to the contentious area of food production and supply up to 2050 offering a readable and well informed account which tackles the global food situation in all its totality from agricultural production technological advance dietary concerns population changes income trends environmental issues government food and agriculture policy trade financial markets macroeconomics and food security Highly accessible and written by a specialist author with experience as an agricultural analyst policy advisor and researcher Global Food Futures synthesises the key issues in one volume

Global Food Futures Brian Gardner, 2013 **Agrobiodiversity Management for Food Security** Jillian M. Lenné, David Wood, 2011 Agrobiodiversity provides most of our food through our interaction with crops and domestic animals Future global food security is firmly anchored in sound science based management of agrobiodiversity This book presents key concepts of agrobiodiversity management critically reviewing important current and emerging issues including agricultural development crop introduction practical diversity in farming systems impact of modern crop varieties and GM crops conservation climate change food sovereignty and policies It will also address claims and misinformation in the subject based on sound scientific principles *Professionals in food chains* Svenja

Springer, Herwig Grimm, 2023-08-07 Within the public debate surrounding food people often contend that the key to meeting current challenges is changing consumer behaviour Professionals and practitioners such as farmers retailers veterinarians or researchers only occupy the limelight during media coverage of so called food scandals If we are to better understand and negotiate current and future problems in the food supply chain it will be essential to pay more attention to the role and position of professionals involved *Professionals in food chains* addresses questions as What are the main ethical challenges for professionals in the food supply chain Who within this complex field holds responsibility for what What does it mean for the food related professions to operate in an atmosphere of immense social tension and high expectations Which virtues are required to do a good job In brief What can be said about the roles responsibilities and ethics of professionals across this dynamic field This book brings together work by scholars from a wide range of disciplines addressing a broad spectrum of topics pertaining to professionals in the food supply chain Topics covered include general issues on professional roles and responsibility sustainable food supply chains novel approaches in food production systems current food politics the ethics of consumption veterinary ethics pedagogical educational and research ethics as well as aquacultural agricultural animal and

food ethics The Spirit of the Soil Paul B. Thompson, 2017-05-25 In this second edition of *The Spirit of the Soil* Agriculture and Environmental Ethics Paul B Thompson reviews four worldviews that shape competing visions for agriculture Productionists have sought increasing yields to make two seeds grow where only one grew before while traditional visions of good farming have stressed stewardship These traditional visions have been challenged by two more worldviews a call for a total cost accounting for farming and an advocacy for a holistic perspective Thompson argues that an environmentally defensible systems approach must draw upon all four worldviews recognizing their flaws and synthesizing their strengths in a new vision of sustainable agriculture This classic 1995 study has been thoroughly revised and significantly expanded in its second edition with up to date examples of agriculture s impact on the environment These include extensive discussions of new pesticides and the effects of animal agriculture on climate and other areas of the environment In addition a new final chapter discusses sustainability which has become a dominant idea within environmental studies and agrarian political philosophy
