Global History Packet:

Teaching Recent Global History Diana B. Turk, Laura J. Dull, Robert Cohen, Michael R. Stoll, 2014-03-05 Teaching Recent Global History explores innovative ways to teach world history beginning with the early 20th century. The authors' unique approach unites historians, social studies teachers, and educational curriculum specialists to offer historically rich, pedagogically innovative, and academically rigorous lessons that help students connect with and deeply understand key events and trends in recent global history. Highlighting the best scholarship for each major continent, the text explores the ways that this scholarship can be adapted by teachers in the classroom in order to engage and inspire students. Each of the eight main chapters highlights a particularly important event or theme, which is then complemented by a detailed discussion of a particular methodological approach. Key features include: An overarching narrative that helps readers address historical arguments; Relevant primary documents or artifacts plus a discussion of a particular historical method well suited to teaching about them; Lesson plans suitable for both middle and secondary level classrooms; Document-based questions and short bibliographies for further research on the topic. This invaluable book is ideal for any aspiring or current teacher who wants to think critically about how to teach world history and make historical discussions come alive for students. **Teaching**

Global History Alan J. Singer, 2012-04-27 Teaching Global History challenges prospective and beginning social studies teachers to formulate their own views about what is important to know in global history and why. It explains how to organize the curriculum around broad social studies concepts and themes and student questions about humanity, history, and the contemporary world. All chapters include lesson ideas, a sample lesson plan with activity sheets, primary source documents, and helpful charts, graphs, photographs, and maps. High school students' responses are woven in throughout. Additional material corresponding to each chapter is posted online at http://people.hofstra.edu/alan_j_singer. The traditional curriculum tends to highlight the Western heritage and to race through epochs and regions, leaving little time for an in-depth exploration of concepts and historical themes for the evaluation of primary and secondary sources and for students to draw their own historical conclusions. Offering an alternative to such pre-packaged textbook outlines and materials, this text is a powerful resource for promoting thoughtful reflection and debate about what the global history curriculum should be and how to teach it.

The Bibliographical Guide to the Global History of Philosophy, Provincializing Global History James Livesey, 2020-01-07 A microhistory of eighteenth-century systemic change that places ordinary French lives alongside global advances. Provincializing Global History explores the subtle transformation of the coastal province of the Languedoc in the eighteenth century. Mining a wealth of archival sources, James Livesey unveils how provincial elites and peasant households unwittingly created new practices. Managing local political institutions, establishing new credit systems, building networks of natural historians, and introducing new plants and farm machinery to the region opened up the inhabitants of the province to new norms and standards. The practices were gradually embedded in daily life and allowed the province to negotiate the new

worlds of industrial society and capitalism

Maritime History as Global History Maria Fusaro, Amélia

Polónia, 2017-10-18 This study aims to provide new insights into the connections between maritime history and global history. It demonstrates the significance of maritime activity as a conduit of global exchange by examining local national and international interdependencies and trade networks and a broad range of time periods, geographical areas and various sub-divisions of maritime historical research. It is composed of ten essays with an introductory chapter and concluding chapter. The first five essays discuss the effects of globalisation on shipping in the early modern period; the following three discuss maritime transportation and the economics of industrialisation from the nineteenth century to the present day; the next discusses the impact of global entrepreneurialism on maritime history; the penultimate discusses the connections and variables between maritime and global history; and the concluding chapter examines the theoretical assumptions surrounding the two disciplines using the globalisation of Early Modern Spain as a case study to do so. The study demonstrates that the core strength of maritime history is its essential place in global history and that the process of globalisation began at sea.

Food In Global

History Raymond Grew, 2018-02-19 Social scientists study food in many different ways. Historians have most often studied the history of specific foods; anthropologists have emphasized the role of food in religious rituals and group identities; sociologists have looked primarily at food as an indicator of social class and a factor in social ties; and nutritionists have focused on changing patterns of consumption and applied medical knowledge to study the effects of diet on public health. Other scholars have studied the economic and political connections surrounding commerce in food. Here these perspectives are brought together in a single volume.

Global History and New Polycentric Approaches Manuel Perez Garcia, Lucio De

Sousa, 2017-12-06 This book is open access under a CC BY 4.0 license. Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline had evolved in various historiographies from Anglo-Saxon to southern European and its emergence in Asia with the rapid development of the Chinese economy. It motivates the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography which have been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly mobility, diversity and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on

how global history has penetrated in western and eastern historiographies moving the pivotal axis of analysis from national perspectives to open new venues of global history

The No-Nonsense Guide to World History Chris Brazier, 2011-08-16
Most people's knowledge of world history is hazy and incomplete at best. This updated No Nonsense Guide gives a full picture revealing the hidden histories and communities left out of conventional history books from the civilizations of Africa, Asia, and Latin America to the history of women. The new final chapter includes material on the financial crisis and the world response to climate change. Chris Brazier is co-editor at New Internationalist. His previous books include *Vietnam: The Price of Peace*. He is principal writer for UNICEF's *The State of the World's Children* report.

A Global History of Ginseng Heasim Sul, 2022-07-08
Sul's history of the international ginseng trade reveals the cultural aspects of international capitalism and the impact of this single commodity on relations between the East and the West. Ginseng emerged as a major international commodity in the seventeenth century when the East India Company began trading it westward. Europeans were drawn to the plant's efficacy as a medicine, but their attempts to transplant it for mass production were unsuccessful. Also, due to a failure of extracting its active ingredients, Western pharmacology disparaged ginseng in the process of modernization. In the meantime, ginseng was discovered on the American continent and became one of the United States' key exports to Asia, and particularly China, but never cultivated a significant domestic market. As such, historicizing the ginseng trade provides a unique perspective on the impact of both culture and economics on international trade. A compelling interdisciplinary history of over five centuries of East-West trade and cultural exchange, this book will be invaluable to students and scholars of transnational history and a fascinating read for anyone interested in the history of international trade.

The Global Imperative Robert P. Clark, 2018-02-12
Robert Clark delves into 100 millennia of human history to create a unified and consistent explanation for humankind's inner need to spread itself across the globe. He examines key events from different eras, such as the voyages of the Chinese treasure fleet, the shaping of the Aztec's trade system in Mesoamerica, the role of steam-powered transport in the supply of an English city, the rise of the gas-powered engine, and the digitization of information in the computer age, melding them together to form a framework for understanding the process of globalization. Drawing on a variety of academic disciplines, including the physical sciences, biology, anthropology, geography, economics, political science, sociology, and demography, Clark reveals the spread of humans and their cultures to be part of an ongoing struggle to supply the energy needs of an increasingly large and complex society. Entropy and thermodynamics, terms often ignored or misunderstood by social science students, clearly frame a fascinating vision of humans' inherent tendency toward a globalized world. Although human expansion has drawn increasing attention in the last several decades, as this tumultuous century has progressed, Clark shows that the process of globalization is not a recent concept. From the very roots of the species, humankind has been driven by a range of internal and external factors to expand in order to survive the increasing complexity of human civilization.

How to Write the Global History of Knowledge-Making Johannes Feichtinger, Anil

Bhatti,Cornelia Hülbauer,2020-03-02 This multidisciplinary collection of essays provides a critical and comprehensive understanding of how knowledge has been made moved and used by whom and for what purpose To explain how new knowledge emerges this volume offers a two fold conceptual move challenging both the premise of insurmountable differences between confined autarkic cultures and the linear nation centered approach to the spread of immutable stocks of knowledge Rather the conceptual focus of the book is on the circulation amalgamation and reconfiguration of locally shaped bodies of knowledge on a broader global scale The authors emphasize that the histories of interaction have been made less transparent through the study of cultural representations thus distorting the view of how knowledge is actually produced Leading scholars from a range of fields including history philosophy social anthropology and comparative culture research have contributed chapters which cover the period from the early modern age to the present day and investigate settings in Africa Asia and Europe Their particular focus is on areas that have largely been neglected until now In this work readers from many disciplines will find new approaches to writing the global history of knowledge making especially historians scholars of the history and philosophy of science and those in culture studies
