Reinert, 2020-08-27 This book is designed for a one semester course in international economics primarily targeting non economics majors and programs in business international relations public policy and development studies It has been written to make international economics accessible to both students and professionals Assuming a minimal background in economics and mathematics the textbook goes beyond the usual trade finance dichotomy to address international trade international production and international finance and takes a practitioner point of view rather than a standard academic one introducing students to the material needed to become effective analysts in international economic policy This new edition features such additional topics as global production and global capital flows migration the Ricardian model and international organizations like the IMF Examples have been updated to include recent developments Brexit for example and all charts include the latest data The website for the text can be found at <http://ie.gmu.edu> **The Impact of Incomplete Contracts on Economics** Philippe Aghion, Mathias Dewatripont, Patrick Legros, Luigi Zingales, 2015-12-22 The 1986 article by Sanford J Grossman and Oliver D Hart titled A Theory of Vertical and Lateral Integration has provided a framework for understanding how firm boundaries are defined and how they affect economic performance The property rights approach has provided a formal way to introduce incomplete contracting ideas into economic modeling The Impact of Incomplete Contracts on Economics collects papers and opinion pieces on the impact that this property right approach to the firm has had on the economics profession **Macroeconomic Measurement Versus Macroeconomic Theory** Merijn Knibbe, 2019-12-06 Ideally scientific theory and scientific measurement should develop in tandem but in recent years this has not been the case in economics There used to be a time when leading economists or their students established or led statistical offices and took care that the measurements were consistent with the theory and vice versa Not anymore Macroeconomic theorists and macroeconomic statisticians do not even speak the same language any longer They do use the same words such as consumption investments or unemployment but the meanings can often be different This book maps the differences between macroeconomic theory and measurement and explores them in some detail while also tracking their intellectual historical and in some cases ideological origins It also explores the possible policy implications In doing so the book draws on two separate strands of literature which are seldom used in unison macro

statistical manuals and theoretical macro papers By doing so the book contributes to the effort to bridge the gap between them without compromising on the idea that a meaningful science of economics should in the end be based upon individual people and households and their social and cultural embedding instead of a representative consumer or Robinson Crusoe figure This work is essential reading for students economists statisticians and professionals **Cross-Border Outsourcing**
