Pink, George W. Noblit, 2008-09-03 It is evident that urban education has become the central focus of educators at the present time In the U S for example almost one third of all school age children attend schools in large urban school districts It is in these urban schools where the diversity of cultures and languages is highest and where student learning is most problematic What has emerged from recent work to improve urban schools is the insight that there is no one size fits all panacea Rather we have discovered that the local context shapes in critically important ways what will be effective at the school level The universality of the problematics with urban education together with the importance of understanding the local or situated context of improvement interventions brings into sharp focus the importance and timeliness of an undertaking like the International Handbook of Urban Education An important focus of the International Handbook of Urban Education will be the interrogation of both the social and political factors that lead to different problem posing and subsequent solutions within each region An important question to be answered for example is what it takes in terms of resources political will and policy actions to improve urban education *Gender Inequalities, Households and the Production of Well-Being in Modern Europe* Tindara Addabbo, Marie-Pierre Arrizabalaga, Alastair Owens, 2016-04-22 Feminist scholars have long pointed out the relevance of the unpaid work that goes on within European households in sustaining the

well being of the continent's populations. However, care work and domestic labour continue to be largely unremunerated and unequally distributed by gender. This unique volume of interdisciplinary essays casts new light on the roles that households play in securing the well being of individuals and families, uncovering the processes of bargaining and accommodation and conflict and compromise that underpin them. Contributors put gender at the centre of their analyses, demonstrating the uneven experiences of men and women as both providers and receivers of welfare in European households in both the past and the present. As European states grapple with changing family forms, a growing population of dependent people, increased participation of women in labour markets and a profound shift in the nature and organisation of work, this book makes a timely contribution to our understanding of the critical role played by households in mediating processes of economic and social change. It offers new challenges to scholars, researchers and policy makers eager to address gender inequalities and enhance well being. This book is the second of four volumes being published as part of Ashgate's Gender and Well Being series that arise from a programme of international symposia funded by the European Science Foundation under the auspices of COST European Cooperation in the field of Scientific and Technical Research.

The Routledge Handbook of Endangered and Minority Languages Weixiao Wei, James Schnell, 2025-02-20. The Routledge Handbook of Endangered and Minority Languages addresses the urgent need for comprehensive language documentation and a deeper understanding of language identity, emphasizing the preservation of endangered languages. This book argues that safeguarding linguistic diversity enriches global cultural heritage and knowledge. By meticulously documenting minority languages, we not only preserve words and grammar but also the unique cultural narratives they carry. The book also introduces new language learning paradigms that recognize the complexities of multilingual societies, advocating for educational systems that embrace the diverse linguistic backgrounds of students. These approaches aim to create more inclusive and effective learning environments by valuing multilingualism. Exploring the fluid nature of language identity, the book examines how sociopolitical contexts and technology influence it, calling for policies that respect linguistic rights and promote social cohesion. It presents case studies from diverse regions, including the Pacific, Nordic countries, Cornwall, Pakistan, the UAE, and more, offering practical strategies for language preservation and revitalization. Groundbreaking insights into the use of digital tools, social media, and AI in language preservation, along with the challenges and successes of various revitalization efforts, make this book a valuable resource for researchers, educators, and policymakers committed to fostering linguistic diversity and equity worldwide.
