Apple, 2009-12-16 These programs are designed to assist migrant students to become proficient in English *Global Crises, Social Justice, and Education* Michael W. Apple, 2009-12-16 Education cannot be understood today without recognizing that nearly all educational policies and practices are strongly influenced by an increasingly integrated international economy Reforms in one country have significant effects in others just as immigration and population tides from one area to another have tremendous impacts on what counts as official knowledge and responsive and effective education But what are the realities of these global crises that so many people are experiencing and how do their effects on education resonate throughout the world *Global Crises Social Justice and Education* looks into the ways we understand globalization and education by getting specific about what committed educators can do to counter the relations of dominance and subordination around the world From some of the world's leading critical educators and activists this timely new collection provides thorough and detailed analyses of four specific centers of global crisis the United States Japan Israel Palestine and Mexico Each chapter engages in a powerful and critical analysis of what exactly is occurring in these regions and counters with an equally compelling critical portrayal of the educational work being done to interrupt global dominance and subordination Without settling for vague ideas or romantic slogans of hope *Global Crises Social Justice and Education* offers real concrete examples and strategies that will contribute to ongoing movements and counter hegemonic struggles already active in education today *Social Justice Education, Globalization, and Teacher Education* Lydiah Nganga, John Kambutu, 2015-11-01 The primary purpose of this book is to serve as a resource in teacher preparation programs It is also intended to serve as an instructional resource in P 12 education The book will be especially useful in methods of teaching and foundational courses both at the elementary and secondary education levels The book contains pertinent instructional topics units and lessons in global education and social justice themes The secondary purpose of this book is to serve as a resource for graduate students and researchers whose interest is global and social justice education This unique book provides for an interdisciplinary approach to teacher education Additionally this book is intended to create a deeper sense of relevancy to issues of curriculum in teacher education Together global educators and social justice educators can forge pedagogical content knowledge that bridges the gap between affirming one's own identity and maintaining unity with the whole thus exemplifying a robust notion of social justice Consequently content in this book will help pre service teachers to gain confidence and deeper knowledge around issues of global interest responsibilities and uncertainties associated with their role as teachers who will teach children within the intersection of local and international neighborhoods **Leadership, Ethics and Schooling for Social Justice** Richard Niesche, Amanda Keddle, 2015-07-24 Issues of social justice and equity in the field of educational leadership have become more salient in recent years The unprecedented diversity uncertainty and rapid social change of the contemporary global era are generating new and

unfamiliar equity questions and challenges for schools and their leaders In order to understand the moral and ethical complexity of work undertaken in the name of social justice and equity in diverse contexts this book uses a range of different theoretical tools from the work of Michel Foucault Rather than a prescriptive best practice approach to leadership and social justice this book draws on Foucault s four fold ethical framework and specifically the notions of advocacy truth telling and counter conduct to critically examine the leadership work undertaken in case studies in schools in Australia and England Our approach makes transparent the ethical work that leaders in these contexts conduct on themselves towards creating schools that can address the equity challenges of the present climate It illuminates and enables critical analysis of the moral imperatives shaping the equity work of school leaders and in particular the possibilities for transformative leadership that can work to create schools and school systems that are more socially just Overall the book s key aims are to Provide an innovative and comprehensive theorising of leadership for social justice in contemporary times Explicate the utility of key elements of Foucault s theorising of the ethical self to the domain of educational leadership and Provide significant practical insight into the social justice possibilities of school leadership in contemporary times through two in depth case studies
