Global Energy Governance Andreas Goldthau, Jan Martin Witte, 2010-03-01 A Brookings Institution Press and Global Public Policy Institute publication The global market for oil and gas resources is rapidly changing Three major trends the rise of new consumers the increasing influence of state players and concerns about climate change are combining to challenge existing regulatory structures many of which have been in place for a half century Global Energy Governance analyzes the energy market from an institutionalist perspective and offers practical policy recommendations to deal with these new challenges Much of the existing discourse on energy governance deals with hard security issues but neglects the challenges to global governance Global Energy Governance fills this gap with perspectives on how regulatory institutions can ensure reliable sources of energy evaluate financial risk and provide emergency response mechanisms to deal with interruptions in supply The authors bring together decisionmakers from industry government and civil society in order to address two central questions What are the current practices of existing institutions governing global oil and gas on financial markets How do these institutions need to adapt in order to meet the challenges of the twenty first century The resulting governance oriented analysis of the three interlocking trends also provides the basis for policy recommendations to improve global regulation Contributors include Thorsten Benner Global Public Policy Institute Berlin William Blyth Chatham House Royal Institute for International Affairs London Albert Bressand School of International and Public Affairs Columbia University Dick de Jong Clingendael International Energy Programme Ralf Dickel Energy Charter Secretariat Andreas Goldthau Central European University Budapest and Global Public Policy Institute Berlin Enno Harks Global Public Policy Institute Berlin Wade Hoxtell Global Public Policy Institute Berlin Hillard Huntington Energy Modeling Forum Stanford University Christine Jojarth Center on Democracy Development and the Rule of Law Stanford University Frederic Kalinke Department of Politics and International Relations Oxford University Wilfrid L Kohl School of Advanced International Studies Johns Hopkins University Jamie Manzer Global Public Policy Institute Berlin Amy Myers Jaffe James A Baker Institute for Public Policy Rice University Yulia Selivanova Energy Charter Secretariat Tom Smeenk Clingendael International Energy Programme Ricardo Soares de Oliveira Department of Politics and International Relations Oxford University Ronald Soligo Rice University Joseph A Stanislaw Deloitte LLP and The JAStanislaw Group LLC Coby van der Linde Clingendael International Energy Programme Jan Martin Witte Global Public Policy Institute Berlin Simonetta Zarrilli Division on International Trade and Commodities United Nations Conference on Trade and Development

**International Energy Governance** Rafael Leal-Arcas, Andrew Filis, Ehab S. Abu Gosh, 2014-11-28 Selected legal deficiencies relating to

international energy governance are identified in this salient book The currently fragmented and multi layered international energy governance regime is exposed and reviewed If governance were streamlined for *Global Energy Governance in a Multipolar World* Dries Lesage, Thijs Van de Graaf, 2016-04-22 Multipolar governance permits a number of important states to have significantly more economic and political clout than others but among them there is hardly any hierarchy The new energy challenge with its intricate socio economic ecological and international political considerations is a multi dimensional multi level and multi actor issue that requires a minimum of central political steering because neither the invisible hand of the market nor unilateral or bilateral power politics are capable to bring about sustainable solutions Global Energy Governance in a Multipolar World investigates the relationship between the emergence of a multipolar world order and the enormous challenges of global energy governance that the world is facing in the 21st century It reflects on fundamental questions such as how the main consuming countries can avoid conflict over scarce resources how they will cooperate to bring about open energy markets energy conservation and efficiency and how they can promote renewable energy sources

*Global Energy Governance* Jan Martin Witte, 2010 **The Global Energy Challenge** Caroline Kuzemko, Andreas Goldthau, Michael Keating, 2017-10-07 The supply and demand of energy its security and environmental sustainability are increasingly central issues in the contemporary world This broad ranging new text provides an international and interdisciplinary introduction to today s political economic security policy and technological challenges set in a clear historical context *The Handbook of Global Energy Policy* Andreas Goldthau, 2016-11-14 This is the first handbook to provide a global policy perspective on energy bringing together a diverse range of international energy issues in one volume Maps the emerging field of global energy policy both for scholars and practitioners the focus is on global issues but it also explores the regional impact of international energy policies Accounts for the multi faceted nature of global energy policy challenges and broadens discussions of these beyond the prevalent debates about oil supply Analyzes global energy policy challenges across the dimensions of markets development sustainability and security and identifies key global policy challenges for the future Comprises newly commissioned research by an international team of scholars and energy policy practitioners China's Global Energy Expansion Xiaohan Gong, 2024-10-03 Should Chinese energy investments be excluded from the liberal economic system based on geopolitical assessments only This book explores the potential regulatory control by the Chinese government over foreign energy investments to achieve their perceived strategic objectives Host states in which Chinese energy companies make investments have increasingly opposed Chinese energy investments in their national security reviews based on concerns that these investments have strategic objectives The book analyses China s investment related law regulations and energy policies to examine how overseas energy investment making is governed The book also explores the role of the Chinese government in energy investment promotion and protection Uniquely the examination of China s potential regulatory control provides an objective criterion rather than geopolitical considerations for

host states to assess the nature of Chinese energy investments The book helps readers to open the black box of Chinese energy investments from a regulatory perspective It is a useful resource for researchers as well as practising lawyers assisting their Chinese clients through national security reviews or when trying to determine whether China's SOEs can bring cases before investor state arbitration tribunals **International Resource Politics in the Asia-Pacific** Jeffrey David Wilson, 2017-06-30 Resource security is a new battleground in the international politics of the Asia Pacific With demand for minerals and energy surging disputes are emerging over access and control of scarce natural resource endowments Drawing on critical insights from political economy this book explains why resources have emerged as a source of inter state conflict in the region [Research Handbook on EU Energy Law and Policy](#) Rafael Leal-Arcas, 2024-09-06 This thoroughly revised second edition presents a comprehensive overview of the most important contemporary research in EU energy law and policy The Research Handbook brings together a diverse array of experts highlighting the multifaceted nature of this continually developing field **Energy Cooperation in South Asia** Mirza Sadaqat Huda, 2020-04-13 This book analyses the key political challenges to regional energy cooperation in South Asia It argues that investment in the planning of regional energy projects can increase their viability and also drive integration and peacebuilding Regional cooperation has been substantiated by academics and multilateral development banks as one of the most viable solutions to South Asia's crippling energy crisis However three decades of national and regional efforts have failed to develop a single multilateral energy project or foster high levels of bilateral cooperation Using data collected through extensive interviews with policymakers in India Bangladesh Pakistan and Nepal this book identifies the specific roadblocks to energy cooperation including domestic politics and the failure of leadership on multiple levels and evaluates how these political challenges determine regional interactions on energy securitisation environmental cooperation and human rights Huda then undertakes case studies on four transnational energy projects to highlight specific policy recommendations to overcome these challenges suggesting planning mechanisms through which the significant issue of energy cooperation in South Asia can be addressed This book will be of great interest to students and scholars of energy security and geopolitics natural resource governance and South Asian politics **The Routledge Handbook of Energy Security** Benjamin K. Sovacool, 2010-12-16 This Handbook examines the subject of energy security its definition dimensions ways to measure and index it and the complicating factors that are often overlooked The volume identifies varying definitions and dimensions of energy security including those that prioritize security of supply and affordability alongside those that emphasize availability energy efficiency trade environmental quality and social and political stewardship It also explores the various metrics that can be used to give energy security more coherence and also to enable it to be measured including recent attempts to measure energy security progress at the national level with a special emphasis placed on countries within the Organization of Economic Cooperation and Development OECD countries within Asia and industrialized countries worldwide This Handbook

The Oxford Handbook of Energy Politics Kathleen J. Hancock, Juliann Emmons Allison, 2020-12-02 The global regional and local energy landscape has changed dramatically in the twenty first century Many factors have affected what we know about energy a consensus among scientists on climate change and related support for renewable energy evolving energy and resource extraction technologies growing resource demand in the developing world new regional and global energy governance actors new major fossil fuel discoveries on land and underwater in states that have previously been under resourced rising interest in corporate social responsibility in energy companies and the need for energy justice The Oxford Handbook of Energy Politics synthesizes the diverse literature on these topics to provide a foundational resource for teaching and research on critical energy issues in international relations and comparative politics Through chapters authored by both scholars and practitioners the Handbook further develops the energy politics scholarship and community and generates sophisticated new work that will benefit all who work on energy issues      **Global Energy Dilemmas** Mike

Bradshaw, 2013-11-20 Today s global energy system faces two major challenges how to secure the supply of reliable and affordable energy and how to rapidly transform to a low carbon efficient and environmentally harmless energy supply In this rigorous and illuminating book Michael Bradshaw explores the key aspects of the current global energy dilemma and examines how it is playing out across the major regions and countries of the world The book begins by charting the development of the current global energy system exploring its key characteristics with a focus upon energy security and the relationship between energy economic development and climate change The next four chapters offer in depth analyses of four distinct global energy dilemmas in different parts of the world the challenge of sustaining affluence and decarbonising energy services in the high energy economies of the developed world the legacies of the centrally planned economy and the

consequences of liberalisation in the post socialist world growing energy demand and emissions growth associated with the emerging regions and finally the quest to provide universal access to modern energy services in the developing world in a manner that is both economically and environmentally sustainable Identifying the governance structures and policy options available to tackle the global energy dilemma the book concludes that only an integrated approach sensitive to regional issues can reconcile the interests and needs of those facing differing energy challenges across the world today **Russia's**

**Foreign Energy Policy** Kenan Aslanli,2023-08-31 This book examines Russia s multidimensional foreign energy policy and the emerging and ongoing conflicts with energy consuming and transit countries Russia s Foreign Energy Policy examines whether the interdependence patterns shaped through various channels such as foreign trade investment finance technology and social interactions between Russia and energy importing countries could prevent energy based conflict Drawing on semi structured expert interviews Kenan Aslanli challenges the one sided conventional wisdom that focusses on foreign policy ambitions and overlooks the peculiarities of the energy dimension Instead Aslanli highlights the complexity of contemporary energy affairs using a holistic approach that goes beyond geopolitics He examines various energy types such as crude oil natural gas and nuclear and considers a diverse range of actors which include energy companies and international organizations Using examples from Europe Asia and the Middle East Aslanli demonstrates how the Russian strategy of using energy resources as a tool or energy weapon for foreign policy goals has a diminishing return in the long run This book will be of great interest to students and scholars of energy policy foreign policy and Russian studies more broadly **Handbook**
