Global food security Great Britain: Parliament: House of Commons: International Development Committee, 2013-06-04. The International Development Committee calls for concerted action to curb food wastage in the UK and for expansion of DFID's bilateral nutrition programmes with a particular focus on pregnancy and early years as part of wider efforts to improve global food security. There is scope for the Government to launch a national consumer campaign to reduce domestic food waste also setting national targets to curb food waste within the UK food production and retail sectors. Agriculturally produced biofuels are having a major detrimental impact on global food security by driving higher and more volatile food prices. EU targets requiring 10 per cent of transport energy to be drawn from renewable sources by 2020 are likely to cause dramatic food price increases and the Government should revise its domestic Renewable Transport Fuel Obligation to specifically exclude agriculturally produced biofuels. Looking at the impact of rising world population, the Committee praises DFID's significant efforts to meet the considerable unmet need for contraception in many developing nations and urges the UK government to maintain a keen focus on women's reproductive rights within its development assistance programmes. MPs also flag the longer term barriers to development posed by systematic undernutrition. The Committee expresses concern that large corporations are buying up large areas of land in many developing countries previously farmed by smallholders. UK domiciled corporations should be required to be transparent about land deals. Lastly, MPs focus on the key role that smallholder farmers will play in feeding a growing global population and in reducing rural poverty.

Climate Change and Global Food Security Rattan Lal, Norman Uphoff, B.A. Stewart, David O. Hansen, 2005-05-26. In order to feed their burgeoning populations, developing nations will need to double cereal production by the year 2050. This increase will have to come from existing land as little potential exists for bringing new land under cultivation, a daunting prospect when one realizes that increased use and significantly higher concentrations of carbon.

Sustaining Global Food Security Robert Zeigler, 2019-10-09. Population growth alone dictates that global food supplies must increase by over 50% in coming decades. Advances in technology offer an array of opportunities to meet this demand but history shows that these can be fully realised only within an enabling policy environment. *Sustaining Global Food Security* makes a compelling case that recent technological breakthroughs can move the planet towards a secure and sustainable food supply only if new policies are designed that allow their full expression. Bob Zeigler has brought together a distinguished set of scientists and policy analysts to produce well-referenced chapters exploring international policies on genetic resources, molecular genetics, genetic engineering, crop breeding and

protection remote sensing the changing landscape of agricultural policies in the world's largest countries and trade Those entering the agricultural sciences and those who aspire to influence public policy during their careers will benefit from the insights of this unique set of experiences and perspectives COVID-19 and global food security: Two years later McDermott, John, Swinnen, Johan, 2022-03-07 Two years after the onset of the COVID 19 pandemic the health economic and social disruptions caused by this global crisis continue to evolve The impacts of the pandemic are likely to endure for years to come with poor marginalized and vulnerable groups the most affected In COVID 19 Global Food Security Two Years Later the editors bring together contributions from new IFPRI research blogs and the CGIAR COVID 19 Hub to examine the pandemic's effects on poverty food security nutrition and health around the world This volume presents key lessons learned on food security and food system resilience in 2020 and 2021 and assesses the effectiveness of policy responses to the crisis Looking forward the authors consider how the pandemic experience can inform both recovery and longer term efforts to build more resilient food systems **Global Food Security Governance** Jessica Duncan, 2015-03-24 In 2007 8 world food prices spiked and global economic crisis set in leaving hundreds of millions of people unable to access adequate food The international reaction was swift In a bid for leadership the 123 member countries of the United Nations Committee on World Food Security CFS adopted a series of reforms with the aim of becoming the foremost international inclusive and intergovernmental platform for food security Central to the reform was the inclusion of participants including civil society and the private sector across all activities of the Committee Drawing on data collected from policy documents interviews and participant observation this book examines the re organization and functioning of a UN Committee that is coming to be known as a best practice in global governance Framed by key challenges that plague global governance the impact and implication of increased civil society engagement are examined by tracing policy negotiations within the CFS in particular policy roundtables on smallholder sensitive investment and food price volatility and negotiations on the Voluntary Guidelines on the Responsible Governance of Tenure of Land Fisheries and Forests in the Context of National Food Security and the Global Strategic Framework for Food Security and Nutrition The author shows that through their participation in the Committee civil society actors are influencing policy outcomes Yet analysis also reveals that the CFS is being undermined by other actors seeking to gain and maintain influence at the global level By way of this analysis this book provides empirically informed insights into increased participation in global governance processes Achieving Global Food Security: The Caribbean Experience And Beyond Mohamed Irfaan Ali, 2024-09-20 This book examines the current food security challenges in the small states with a focus on the Caribbean The work is in the conjuncture of the Covid 19 pandemic and other global shocks including the disruption in the global supply chains and the increase in climate related events These events have led to an increase in global prices including the price of food and fertilisers This book starts by examining the global food security crisis considering the aftereffects of the shocks then provides a macro overview of the region by focusing on its

ability to invest in agriculture The results indicate that private sector investment in agriculture has experienced only a slight increase despite creeping inflation This has exacerbated vulnerabilities in food security which deteriorated in 2020 undoing nearly a decade of progress in the face of climate change Detailed attention is paid to food vulnerabilities in 14 Caribbean countries In the final chapter a series of policy measures are outlined to strengthen the region's food security position with a particular focus on innovation and the region's comparative advantages

Food Security in an Uncertain World Andrew Schmitz, P. Lynn Kennedy, Troy G. Schmitz, 2015-12-15 International trade agreements are central to food security Food security and poverty are also linked Even with increased productivity problems attached to food security cannot be solved without significant changes in income distribution
