

A large, reddish-brown pipeline stretches from the bottom left towards the horizon, curving slightly to the right. The landscape is arid and hilly, with dry, brownish soil and sparse vegetation. The sky is a pale, clear blue. The overall scene suggests a large-scale infrastructure project in a developing or arid region.

## **Global Project Finance Human Rights And Sustainable Development:**

Global Project Finance, Human Rights and Sustainable Development Sheldon Leader, David Ong, 2011-08-18 Many infrastructure projects around the world are funded through the project finance method which combines private financing with public sector backing from multilateral finance institutions such as the World Bank This examination of the theoretical and practical implications of such funding begins with a discussion of the relationship between the financial structuring of these projects and finance policy and legal disciplines especially in the form of investment law human rights and environmental law A number of case studies are then examined to provide practical insights into the application or otherwise of human rights and sustainable development objectives within such projects While these theoretical perspectives do not conclude that the project finance method detracts from the application or implementation of human rights and sustainable development objectives they do highlight the potential for the prioritisation of investment returns at the expense of human rights and environmental protection standards

Blockchain Technology in Project Finance Witold Srokosz, Paweł Lenio, Grzegorz Sobiecki, 2025-01-31 There is currently no comprehensive scientific study that addresses the problem of financing projects using Distributed Ledger blockchain Technology DLT that are not themselves embedded in the blockchain ecosystem particularly in the context of long term and capital intensive investments This book fills this gap It poses a number of research questions such as what financing model mechanism is the most effective in the long term where very large financial resources are concerned are there appropriate legal regulations in place and can DLT blockchain technology provide usability and solutions that can be used in the process of financing capital intensive investments The book ultimately shows that it is possible to build a legal and economic model that would effectively enable the financing of long term and capital intensive investments based on a specially prepared integrated platform operating on the basis of blockchain technology As a result of the mechanisms of smart contracts the platform would enable the issuance and service of tokens including equity

tokens but also auxiliary and payment or utility tokens and the automation of relations between stakeholders It would also allow the creation of a virtual decentralized autonomous organization DAO that would control the implementation of the project and a decentralized exchange that would enable token trading The core readership for the book is academics scholars and researchers in the fields of economics finance and law particularly those focused on blockchain technology distributed ledger systems and innovative financing mechanisms for large scale investments Policymakers and regulators involved in developing policies and legal frameworks for blockchain technology cryptocurrencies and financial innovation would find it to be a practical reference The Open Access version of this book available at [www.taylorfrancis.com](http://www.taylorfrancis.com) has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license

**International Investment Law and Development** Stephan W. Schill, Christian J. *Corporate Accountability under Socio-Economic Rights* Jernej Letnar Čerňič, 2018-08-14 In recent decades corporations have increasingly accepted that they have obligations to respect the socio economic rights of individuals whose rights to livelihoods education food health housing and water are affected by the actions of corporations on a daily basis Despite this it is often difficult for victims to bring corporations to court for violations of their socio economic rights Domestic constitutional systems provide at best fragile and limited protections against adverse corporate activities while international responses have been lacking in creating obligations and accountability for corporations under socio economic rights The urgency of bolstering corporate accountability for socio economic rights is therefore apparent In light of this this book asks whether corporations are required to observe socio economic rights and if they are accountable for any violations In doing so it identifies and analyzes the theoretical foundations and the existing scope of corporate accountability arising from socio economic rights at both national and international levels Through careful analysis Jernej Letnar Čerňič exposes the stark need for greater clarity in the obligations and accountability of corporations advocating a normative framework for corporate accountability for socio economic rights in national legal orders which builds on existing mechanisms

*Transitional Justice* Sabine Michalowski, 2014-06-23 Corporate Accountability in the Context of Transitional Justice explores how corporations can be held accountable for their role in past human rights violations when a country is making a transition from conflict or repression to peace and democracy It breaks new ground in theorizing the linkages between the areas of transitional justice and corporate accountability and analyzing problems frequently arising where the two fields meet in practice for example where the role of corporations in past human rights violations is examined by truth and reconciliation commissions or in the course of litigation The book provides an overview of the current trends in law and in legal and political discussion relating to both areas as well as in depth analysis of how tools of corporate accountability and transitional justice can complement each other in order to achieve the best outcomes for bringing justice to victims and lasting peace to societies The authors bring extensive experience from diverse professional backgrounds and jurisdictions to provide the first sustained attempt to address this link The book will be of interest to scholars practitioners policymakers and activists working in the areas of transitional justice corporate accountability and business and human rights
