Carbon Kate Ervine,2018-10-15 Carbon is the political challenge of our time While critical to supporting life on Earth too much carbon threatens to destroy life as we know it with rising sea levels crippling droughts and catastrophic floods sounding the alarm on a future now upon us How did we get here and what must be done In this incisive book Kate Ervine unravels carbon s distinct political economy arguing that to understand global warming and why it remains so difficult to address we must go back to the origins of industrial capitalism and its swelling dependence on carbon intensive fossil fuels coal oil and natural gas to grease the wheels of growth and profitability Taking the reader from carbon dioxide as chemical compound abundant in nature to carbon dioxide as greenhouse gas from the role of carbon in the rise of global capitalism to its role in reinforcing and expanding existing patterns of global inequality and from carbon as object of

environmental governance to carbon as tradable commodity Irvine exposes emerging struggles to decarbonize our societies for what they are battles over the very meaning of democracy and social and ecological justice *Global Fever* William H. Calvin, 2010-08-09

Teaching Climate Change Vandana Singh, 2023-12-21 Teaching Climate Change Science Stories Justice shows educators how climate change can be taught from any disciplinary perspective and in a transdisciplinary way drawing on examples from the author's own classroom The book sets out a radical vision for climate pedagogy introducing an innovative framework in which the scientific essentials of climate change are scaffolded via three transdisciplinary meta concepts Balance Imbalance Critical Thresholds and Complex Interconnections Author Vandana Singh grounds this theory in practice drawing on examples from her own classroom to provide implementable ideas for educators and to demonstrate how climate change can be taught from any disciplinary perspective in a transdisciplinary way The book also explores the barriers to effective climate education at a macro level focusing on issues such as climate misinformation misconception the exclusion of social and ethical concerns and a focus on technofixes Singh uses this information to identify four key dimensions for an effective climate pedagogy in which issues of justice are central scientific technological the transdisciplinary the epistemological and the psychosocial This approach is broad and flexible enough to be adapted to different classrooms and contexts Bridging the social and natural sciences this book will be an essential resource for all climate change educators practicing in both formal and informal settings as well as for community climate activists

The Science and Politics of Global Climate Change Andrew Dessler, Edward A. Parson, 2010-02-18 The second edition of Dessler and Parson's acclaimed book provides an integrated treatment of the science technology economics policy and politics of climate change Aimed at the educated non specialist and at courses in environmental policy or climate change the book clearly lays out the scientific foundations of climate change the issues in current policy debates and the interactions between science and politics that make the climate change debate so contentious and confusing This new edition is brought completely up to date to reflect the rapid movement of events related to climate change In addition all sections have been improved in particular a more thorough primer on the basic science of climate change is included The book also now integrates the discussion of contrarian claims with the discussion of current scientific knowledge extends the discussion of cost and benefit estimates and provides an improved glossary
