Global Democracy and Its Difficulties Anthony J.

Langlois,Karol Edward Soltan,2008-08-18 Explores the most fundamental challenges to democracy in an era of globalization and addresses universal values human rights and development global constitutionalism institutional complexity and challenges to the Democratic State

The Constitutionalization of International Law Jan Klabbers,Anne Peters,Geir

Ulfstein,2009-10 The book examines one of the most debated issues in current international law to what extent the international legal system has constitutional features comparable to what we find in national law This question has become increasingly relevant in a time of globalization where new international institutions and courts are established to address

international issues Constitutionalization beyond the nation state has for many years been discussed in relation to the European Union This book asks whether we now see constitutionalization taking place also at the global level The book investigates what should be characterized as constitutional features of the current international order in what way the challenges differ from those at the national level and what could be a proper interaction between different international arrangements as well as between the international and national constitutional level Finally it sketches the outlines of what a constitutionalized world order could and should imply The book is a critical appraisal of constitutionalist ideas and of their critique It argues that the reconstruction of the current evolution of international law as a process of constitutionalization against a background of and partly in competition with the verticalization of substantive law and the deformalization and fragmentation of international law has some explanatory power permits new insights and allows for new arguments The book thus identifies constitutional trends and challenges in establishing international organisational structures and designs procedures for standard setting implementation and judicial functions

Institutional Supports for the International Rule of Law Charles Sampford, Ramesh Thakur, 2014-08-27 The rule of law is widely seen as the cornerstone of any effective polity and increasingly a vital component of the international political system If the international rule of law were to be strengthened it would greatly contribute to trade security human rights and global cooperation in a range of fields Yet in many areas the rule of law seems almost absent in international affairs This book explores the institutions that support the effectiveness of the rule of law domestically It focuses on the extent to which similar institutions already exist at international level and analyses the possibility of their further development The authors speculate on how the international rule of law might be advanced in the future thereby suggesting potential strategies for strengthening the international rule of law Adopting an interdisciplinary approach and combining the fields of international relations politics and law this book covers a range institutions including UN Security Council International Court of Justice Human rights machinery Regional human rights International Criminal Court World Trade Organization International Tribunal for the Law of the Sea UN Department of Peacekeeping Operations It will be of strong interest to students and scholars of international relations international organisations global governance international law migration law international peace and security law applied ethics political economy political science and sociology
