Rethinking Globalism Manfred B. Steger,2004 What is the hottest American export since 9 11 The contributors to this provocative volume contend that it is Western style globalism the dominant free market ideology that determines everything from most favored nation status to the declaration of war In this much needed post September 11 analysis an interdisciplinary team of authors shows how central concepts like globalization liberty free markets and free trade are increasingly being subordinated to and lumped together with the war on terrorism led by the U S and its allies The authors here hailing from all five continents contend that globalism is being adapted to particular social and political contexts in various parts of the world Nonetheless the impact of globalization with an ideological twist can be devastating as military operations and propaganda supplant transnational trade initiatives as the focal point of global exchange And ironically the post 9 11 framework contains a major ideological contradiction Social forces otherwise profiting from expanded global mobility and interchange must come to grips with necessary limitations on certain aspects of globalization This volume was handcrafted to outline the major lines of inquiry proposed for the new Globalization series edited by Manfred B Steger and Terrell Carver Writing in accessible engaging prose the contributors to this anchor volume consider themselves critical globalization theorists who seek to provide readers with a better understanding of how dominant beliefs about globalization fashion their realities and how these ideas can be changed to bring about more equitable social arrangements Books in the series will share the same perspective and goals

Vulnerability Henk ten

Have,2016-04-08 Alongside globalization the sense of vulnerability among people and populations has increased We feel vulnerable to disease as new infections spread rapidly across the globe while disasters and climate change make health increasingly precarious Moreover clinical trials of new drugs often exploit vulnerable populations in developing countries that otherwise have no access to healthcare and new genetic technologies make people with disabilities vulnerable to discrimination Therefore the concept of vulnerability has contributed new ideas to the debates about the ethical dimensions of medicine and healthcare This book explains and elaborates the new concept of vulnerability in today s bioethics Firstly Henk ten Have argues that vulnerability cannot be fully understood within the framework of individual autonomy that dominates mainstream bioethics today it is often not the individual person who is vulnerable rather that his or her vulnerability is created through the social and economic conditions in which he or she lives Contending that the language of vulnerability offers perspectives beyond the traditional autonomy model this book offers a new approach which will enable bioethics to evolve into a global enterprise This groundbreaking book critically analyses the concept of vulnerability as a global phenomenon It will appeal to scholars and students of ethics bioethics globalization healthcare medical science medical research culture law and politics

Regionalism, Globalisation and International Order Jens-Uwe Wunderlich, 2016-03-23 New

regionalism and globalization have been prominent themes in academic and political debates since the beginning of the 1990s. Despite the considerable amount of scholarly attention that the new regionalism has received in recent years, its full empirical and theoretical potential has yet to be fully investigated. This illuminating study provides an overview of new avenues in theorizing regionalism and proposes a consolidated framework for analysis and comparison. Offering a comparative historical perspective of European and Southeast Asian regionalism, it presents new and imaginative insights into the theory and practice of regionalism and the links between regional developments, globalization, and international order.

The Effect of Globalization on World Poverty and Income Inequality Kelvin Okundaye, 2018-03-05. Bachelor Thesis from the year 2016 in the subject Politics. Topic: Globalization. Political Economics. grade 1.7. University of Mannheim. language: English. abstract: In this paper, we will try to determine if any of the theoretical camps are right and if so, which one. We will first review current literature to clarify which arguments frame the respective pro and con attitudes towards globalization. This will include theoretical approaches as well as previous studies done in the field. We will then empirically analyze the issue ourselves with the newest available data. To do so, we will first need to establish practicable definitions of globalization, poverty, and inequality, and then try to find relationships between these factors. Lastly, we will interpret our results. To conclude, we will summarize our findings and discuss any limitations of our research.

The Oxford Handbook of Transnational Feminist Movements Rawwida Baksh, Wendy Harcourt, 2015-03-25. The Oxford Handbook of Transnational Feminist Movements explores the historical, political, economic, and social contexts in which transnational feminist movements have emerged and spread, and the contributions they have made to global knowledge, power, and social change over the past half century. The publication of the handbook in 2015 marks the fortieth anniversary of the United Nations International Women's Year, the thirtieth anniversary of the Third World Conference on Women held in Nairobi, the twentieth anniversary of the Beijing Declaration and Platform for Action, and the fifteenth anniversaries of the Millennium Development Goals and of UN Security Council Resolution 1325 on women, peace, and security. The editors and contributors critically interrogate transnational feminist movements from a broad spectrum of locations in the global South and North, feminist organizations and networks at all levels (local, national, regional, global), and wider civil society organizations and networks (governmental and multilateral agencies and academic and research institutions among others). The handbook reflects candidly on what we have learned about transnational feminist movements: What are the different spaces from which transnational feminisms have operated, and in what ways? How have they contributed to our understanding of the myriad formal and informal ways in which gendered power relations define and

inform everyday life To what extent have they destabilized or transformed the global hegemonic systems that constitute patriarchy From a position of fifty years of knowledge production activism working with institutions and critical reflection the handbook recognizes that transnational feminist movements form a key epistemic community that can inspire and provide leadership in shaping political spaces and institutions at all levels and transforming international political economy development and peace processes The handbook is organized into ten sections each beginning with an introduction by the editors The sections explore the main themes that have emerged from transnational feminist movements knowledge theory and praxis organizing for change body politics health and well being human rights and human security economic and social justice citizenship and statebuilding militarism and religious fundamentalisms peace movements UNSCR 1325 and postconflict rebuilding feminist political ecology and digital age transformations and future trajectories
