Globalization as Evolutionary Process George Modelski, Tessaleno Devezas, William R. Thompson, 2007-12-20 The term globalization has gained widespread popularity yet most treatments are either descriptive and or focused on changes in economic interconnectivity In this volume the concept is seen in broader terms as leading international experts from a range of disciplines develop a long term analysis to address the problems of globalization The editors and contributors develop a framework for understanding the origins and trajectory of contemporary world trends constructing testable and verifiable models of globalization They demonstrate how the evolutionary approach allows us to view globalization as an enterprise of the human species as a whole focusing on the analytical problem of global change and the rules governing those changes The emphasis is not on broad based accounts of the course of world affairs but selectively on processes that reshape the social of the human species the making of world opinion and the innovations that animate these developments Chapters are clustered into four foci One emphasizes the interpretation of globalization as an explicitly evolutionary process A second looks at historical sequences of such phenomena as population growth or imperial rise and decline as processes that can be modeled and not purely described The third cluster examines ongoing changes in economic processes especially information technology A final cluster takes on some of the challenges associated with forecasting and simulating the complexities of globalization processes This innovative and important volume will be of interest to students and scholars across the social sciences concerned with the phenomenon of globalization

globalization *Global Brain Singularity* Cadell Last, 2020-07-30 This book introduces readers to global brain singularity through a logical meditation on the temporal dynamics of the universal process Global brain singularity is conceived of as a future metasystem of human civilization that represents a qualitatively higher coherence of order To better understand the potential of this phenomenon the book begins with an overview of universal history The focus then shifts to the structure of human systems and the notion that contemporary global civilization must mediate the emergence of a commons that will transform the future of politics economics and psychosocial life in general In this context the book presents our species as biocultural evolutionary agents attempting to create a novel and independent domain of technocultural evolution that affords us new levels of freedom Lastly the book underscores the internal depths of the present moment structured by a division between subject and object The nature of the interaction between subject and object would appear to govern the mechanics of a spiritual process that is key to understanding the meaning of singularity inclusive of observers Given its scope the book will appeal to readers interested in systems approaches to the emerging world society especially historians philosophers and social scientists Globalization and the Global Politics of Justice Barry K. Situating Global Resistance Lara Montesinos Coleman, Karen Tucker, 2013-09-13 The book examines some of the ways in which contemporary forms of political dissent are situated within processes of global ordering Grounded in analysis of concrete practices of discipline and dissent in specific contexts it explores the ways in which resistance can be shaped by dominant ways of thinking seeing or enacting politics and by the multiform relations of power at play in the making of global order The contributions written from a variety of disciplinary backgrounds address themes such as the processes through which particular sorts of resisting subjects are produced the politics of knowledge in which resisting practices are embedded the ways in which visual technologies are deployed within and towards oppositional practices and the politics of gender race and class within spaces of contestation The volume thus opens up space for critical reflection and inter disciplinary dialogue on what it means to be a resisting subject and on the interplay between the power and counter power in global order This book was published as a special issue of *Globalizations*

Global Ideologies and Urban Landscapes Manfred Steger, Anne McNevin, 2013-09-13 How do political ideologies and urban landscapes intersect in the context of globalization This volume illuminates the production of ideologies as both discursive and spatial phenomena in distinct contributions that ground their analysis in cities of the Global North and South From Sydney to Singapore Hong Kong to Hanoi Las Vegas to Macau conventional public spaces are in decline as sites of ideological dissent Instead we are witnessing the colonisation of urban space by market globalism today's dominant global ideology and securitised surveillance regimes Against this backdrop how should we interpret the proliferation of metaphors that claim to communicate the essence of global transformation In what ways do space and language work together to normalise the truth claims of powerful ideological players What kinds of social forces mobilise to contest the cooptation of language and space and to pose alternative local and global futures This volume poses these questions against the collapse of old geographical scales and cartographic techniques for identifying the contours of civil society The city acts as an entry point to a new spatial analytics of contemporary ideological forces This book was published as a special issue of *Globalizations*

Land Grabbing and Global Governance Matias E. Margulis, Nora McKeon, Saturnino Borrás Jr., 2016-05-23 Land grabbing per se is not a new phenomenon given its historical precedents in the eras of imperialism However the character scale pace orientation and key

drivers of the recent wave of land grabs is a distinct historical event closely tied to the changing dynamics of the global agri food feed and fuel complex Land grabbing is facilitated by ever greater flows of capital goods and ideas across borders and these flows occur through axes of power that are far more polycentric than the North South imperialist tradition Land grabs occur in the context of changes in the character of the global food regime formerly anchored by North Atlantic empires the integrated food energy complex seems to be headed towards multiple centres of power especially with the rise of the BRICS and the proliferation of middle income countries participating in many of the land transactions Land Grabbing and Global Governance offers insights from leading scholars and experts on contemporary land grabs This volume examines land grabs in direct relation to a global economy undergoing profound change and the role of new configurations of actors and power in governance institutions and practices This book was published as a special issue of Globalizations

The State-Capital Nexus in the Global Crisis Bastiaan van Apeldoorn, Naná de Graaff, Henk W. Overbeek, 2017-07-05 In the wake of the outbreak of the global crisis in 2008 many observers expected the state to assume command over a faltering neoliberal finance led model of capitalism We now know that this expectation was by and large mistaken There is indeed an ongoing recalibration of the state capital relations but in many instances the state has become more actively and more deeply involved in extending the reach of markets rather than in constraining markets in the interests of an equitable response to the crisis This volume offers both theoretical perspectives and empirical studies by a selection of leading Critical International Political Economy scholars on the question how and to what extent we are witnessing a return of the state and a transition towards a new phase of global capitalism The chapters cover a wide array of topics from the rise of China and other emerging economies of the Global South the role of state owned enterprises such as Sovereign Wealth Funds and National Oil Companies and global environmental politics to the role of labour in Europe and US grand strategy foreign policy making in the post Cold War period This book was published as a special issue of Globalizations

Migration, Work and Citizenship in the New Global Order Ronaldo Munck, Carl Ulrik Schierup, Raúl Delgado Wise, 2013-09-13 Any consideration of global migration in relation to work and citizenship must necessarily be situated in the context of the Great Recession A whole historical chapter that of neoliberalism has now closed and the future can only be deemed uncertain Migrant workers were key players during this phase of the global system supplying cheap and flexible labour inputs when required in the rich countries Now with the further sustainability of the neoliberal political and economic world order in question what will be the role of migration in terms of work patterns and what modalities of political citizenship will develop While informalization of the relations of production and the precarization of work were once assumed to be the exception that is no longer the case As for citizenship this book posits a parallel development of precarious citizenship for migrants made increasingly vulnerable by the global economic crisis But we are also in an era of profound social transformation in the context of which social counter movements emerge which may halt the disembedding of the market from social control and its corrosive impact This book

was published as a special issue of *Globalizations* *Edges of Global Justice* Janet M. Conway, 2013 This book explores how the World Social Forum has developed in response to the current period of profound crisis and transition in the history of Western capitalist modernity Based on ten years of field work on three continents this book examines social movements as knowledge producers and its arguments are grounded in sustained empirical attention to what movements are doing and saying on the terrain of the WSF over time and from place to place Andre Gunder Frank and Global Development Patrick Manning, Barry K. other groups mirroring broader global power relations This book was published as a special issue of Globalizations *The New System of Global Governance* Georg von Goldbach, 2024-08-14 CONTENT OF THE BOOK This book shows how the emerging new system of Global Governance will change due to China's economic rise and increasing political importance There will be a paradigm shift in the functioning and interaction of the countries and nations of the earth A New System of Global Governance is emerging The New System of Global Governance will have to function according to new rules to meet with the approval of the majority of the countries and nations The hegemonic system of global governance that we have witnessed for more than a century with the principle of armed conflict as the main political tool will no longer be able to function The main reasons for this are of cultural origin A characteristic feature of capitalist civilization is its origin in Europe With the re entry of China as a player in world history the situation changed dramatically China belongs to a different cultural area Therefore the further development of global capitalism and in particular of the New System of Global Governance will not remain one dimensionally European and will not develop in a linear sequence A paradigm shift will occur
