Architectural Theory, Volume 2 Harry Francis Mallgrave, Christina Contandriopoulos, 2008-08-11. This second volume of the landmark Architectural Theory anthology surveys the development of architectural theory from the Franco-Prussian war of 1871 until the end of the twentieth century. The entire two-volume anthology follows the full range of architectural literature from classical times to present transformations. An ambitious anthology bringing together over 300 classic and contemporary essays that survey the key developments and trends in architecture. Spans the period from 1871 to 2005 from John Ruskin and the arts and crafts movement in Great Britain through to the development of Lingang New City and the creation of a metropolis in the East China sea. Organized thematically featuring general and section introductions and headnotes to each essay written by a renowned expert on architectural theory. Places the work of architects like Koolhaas, Eisenman, and Lynch alongside the work of prominent architectural critics offering a balanced perspective on current debates. Includes many hard-to-find texts and works never previously translated into English. Alongside Volume I: An Anthology from Vitruvius to 1870, creates a stunning overview of architectural theory from early antiquity to the twenty-first century. **The Good Metropolis** Alexander Eisenschmidt, 2019-01-29. The publication presents the first historical analysis of the tension between the city and architectural form. It introduces 20th-century theories to construct a historical context from which a new architecture-city relationship emerged. The book provides a conceptual framework to understand this relationship and comes to the conclusion that urbanization may be filled with potential, i.e., be a Good Metropolis. Delirious New York Rem Koolhaas, 1950. **Going Dutch**, 2008-01-31. This volume investigates the place of Dutch history and Dutch-derived culture in America over the last four centuries. It considers how the Dutch have fared in America and it explores how American conceptions of Dutchness have developed from Henry Hudson's historic voyage to Manhattan in 1609 through the rise of Dutch design at the turn of the twenty-first century. Essays probe a rich array of topics: Dutch themes in American arts and letters; the place of Dutch paintings in American collections; shifting American interests in Dutch art, literature, and architecture; the experience of Dutch immigrants in America; and the Dutch Reformed Church in America. *Going Dutch* presents a much-needed overview of the Dutch-American experience from its beginnings to the present. Contributors include Julie Berger Hochstrasser, Willem Frijhoff, Joyce D. Goodfriend, Hans Krabbendam, Joseph Manca, Nancy T. Minty, Mark A. Peterson, Christopher Pierce, Judith Richardson, Louisa Wood, Ruby Benjamin, Schmidt Robert, Schoone Jongen, Annette Stott, Tity de Vries, and Dennis P. Weller. *Imaging the City* Lawrence J. Vale, Sam Bass Warner Jr., 2021-12-16. Planners face a controversial task because their professional role requires them to be spokespersons for the public interest. In a welter of conflicting pictures and voices, how might the public interest be discovered? Once identified, how might it be expressed so that competing publics attend to it? There are no easy

answers but the experience of planners today suggests ways of working and innovations of promise The focus on planning practice prompted the editors to analyze images that are now at work in our cities For Vale and Warner all city design and constructions offer material that people should include in images of their environment The built and building city are part of the experience of all city dwellers it is theirs to incorporate interpret or ignore Essays included in this text trace the interplay between physical objects of planners and architects and the social experience and outlooks of image makers and their audiences Imaging the City explores urban image making from civic boosterism of medieval cities to iconic imagery of Times Square Vale and Warner bring together urban historians geographers city planners architects and cultural commentators to analyze the creation of urban imagery from the signature skyscrapers of Kuala Lumpur to the re creation of the South Bronx and the use of city images in film literature television and on the Internet Urban dwellers urban planners architects municipal officials sociologists urban historians all will perceive their worlds with a heightened sense of awareness after reading this book

*The City Symphony Phenomenon* Steven Jacobs,Eva Hielscher,Anthony Kinik,2018-07-20 The 1920s and 1930s saw the rise of the city symphony an experimental film form that presented the city as protagonist instead of mere decor Combining experimental documentary and narrative practices these films were marked by a high level of abstraction reminiscent of high modernist experiments in painting and photography Moreover interwar city symphonies presented a highly fragmented oftentimes kaleidoscopic sense of modern life and they organized their urban industrial images through rhythmic and associative montage that evoke musical structures In this comprehensive volume contributors consider the full 80 film corpus from Manhatta and Berlin Die Sinfonie der Grosstadt to lesser known cinematic explorations [Architecture After Deleuze and Guattari](#) Chris L. Smith,2023-05-04 This study illuminates the complex interplay between Deleuze and Guattari s philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari s philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas *The Archaeology of Home* Katharine Greider,2011-03-22 Narrates how an investigation into the safety of a house on the lower East Side in New York City turns into an exploration of the history of the dwelling and the land beneath it as well as a philosophical meditation on the meaning of a home

**Architecture and Cultural Continuity** Christian Frost,2025-02-06 Architecture and Cultural Continuity explores a dynamic way of viewing architecture arguing that all architecture is best evaluated through active experiences in relation to cultural traditions of community and belonging space ritual and setting A work in three parts the book first

analyses in depth the Festival of San Giovanni in Florence an annual series of celebrations involving the entire city Tracing its history from its Roman origins via the Renaissance through to contemporary times this case study is used to explore ideas of continuity and tradition and how these shape and are shaped by architecture and the city Part 2 gathers theoretical tools from philosophy anthropology and performance studies to offer a framework for the appraisal of architecture whether engaged in festival or simply part of the background to everyday life as experience rather than form The final part presents historic and contemporary case studies to explain the theory in practice from Lord Leighton s House in London to Beit Beirut in Lebanon and from Salisbury s medieval Chapterhouse to the contemporary Australian Parliament building Written for architectural theorists historians and designers alike this book will allow the reader to assess architecture in a way that re addresses aspects of history often obscured by post enlightenment thinking and reveals an architecture rooted in cultural traditions better able to contribute to the diverse communities of the future      **Slapstick Comedy** Tom Paulus, Rob

King, 2010-06-09 From Chaplin s tramp to the Bathing Beauties from madcap chases to skyscraper perils slapstick comedy supplied many of the most enduring icons of American cinema in the silent era This collection of fourteen essays by prominent film scholars challenges longstanding critical dogma and offers new conceptual frameworks for thinking about silent comedy s place in film history and American culture The contributors discuss a broad range of topics including the contested theatrical or cinematic origins of slapstick the comic spectacle of crazy technology and trick stunts the filmmakers who shaped the style of early slapstick and comedy s implications for theories of film form and spectatorship This volume is essential reading for anyone seeking to understand the origins and continued importance of a film genre at the heart of American cinema from its earliest days to today      *Marcel Breuer* John Poros, 2022-09-09 This book tracks the development of Marcel Breuer s aesthetic clash between uniformity and singularity through the detailed examination of his seminal buildings Each chapter examines a specific building and puts into context Breuer s other work and the contemporary movements architects of the post war era such as Surrealism Brutalism and structural expressionism The buildings examined include the UNESCO Headquarters in Paris France of 1958 the IBM Research Center in Le Gaude France of 1962 the Annunciation Priory in Bismark North Dakota of 1963 and the Atlanta Central Library of 1980 Marcel Breuer s approach to design was inspired by the Spanish phrase *sol y sombra* sun and shadow Sun and shadow meant for Breuer that a juxtaposition of contrasts was necessary light glass walls and heavy concrete masses lifted over voids and serial precast construction resting on sculptural columns became hallmarks of Breuer s buildings By creating an architecture of juxtaposition Breuer s work can be interpreted as a surrealist recontre as fueling a new architectural condition A critical evaluation of Marcel Breuer s work this book is written for graduate students researchers and academics interested in his work and how it shaped the architecture of the post war era      *The Colossus of Roads* Karal Ann Marling, A rich and lively examination of this curious and pervasive tradition The world s largest prairie chicken a restaurant shaped like a fish a

massive Paul Bunyan an enormous ear of corn roadside sculpture is a uniquely American phenomenon and these strange and wonderful figures are scattered along highways and standing in small town squares particularly in the Midwest These odd oversized attractions have become destinations for travelers Whether it serves art commerce or local pride the colossus is a stopping place where the everyday rules of reality are suspended and the observer can gain insight into the way these communities imagine themselves Karal Ann Marling visits dozens of these roadside attractions viewing them analytically intellectually and enthusiastically tracing each one through folklore and literature Heavily illustrated this book takes the reader on the road to examine these treasures and all that they represent **Transatlantic Aliens** Will Norman, 2016-11-27

A cogent and innovative account of the politics of literary and artistic modernism in the early years of the Cold War an exceptional book *Transatlantica* In *Transatlantic Aliens* Will Norman reorients our understanding of midcentury American culture by thinking dialectically about the interfusion of aesthetic and intellectual practices across both the cultural hierarchy and the Atlantic Norman relays this critical narrative through a series of interlinked case studies of key figures including C L R James Theodor Adorno George Grosz Raymond Chandler Simone de Beauvoir Vladimir Nabokov and Saul Steinberg He discovers the strange afterlives of European modernism in disorientating and uncanny juxtapositions the aesthetics of French symbolism flicker among the neon signs of a small town in the dead of night and echoes of Mondrian's grids are observed in the form of a boardroom sales chart At the heart of *Transatlantic Aliens* is a conception of alienation that encompasses both its political and aesthetic valences What unites the exilic figures it addresses is the desire to transform the practical experience of alienation into a positive resource for criticizing and coping with a reconfigured postwar landscape Addressed to scholars and readers of American and comparative literatures as well as of cultural history and visual culture the book combines assessments of individual artworks novels and other texts with more distant readings spanning time and space A gallery of color plates beautifully illuminates the book's analysis Examining hardboiled fiction through Flaubert New Yorker cartoons through modernist painting and Bette Davis through Hegel and Marx *Transatlantic Aliens* challenges and changes the way we understand modernism's place in midcentury American culture *The Jazz*

*Cadence of American Culture* Robert G. O'Meally, 1998 Taking to heart Ralph Ellison's remark that much in American life is jazz shaped *The Jazz Cadence of American Culture* offers a wide range of eloquent statements about the influence of this art form Robert G. O'Meally has gathered a comprehensive collection of important essays speeches and interviews on the impact of jazz on other arts on politics and on the rhythm of everyday life Focusing mainly on American artistic expression from 1920 to 1970 O'Meally confronts a long era of political and artistic turbulence and change in which American art forms influenced one another in unexpected ways Organized thematically these provocative pieces include an essay considering poet and novelist James Weldon Johnson as a cultural critic an interview with Wynton Marsalis a speech on the heroic image in jazz and a newspaper review of a recent melding of jazz music and dance *Bring in Da Noise Bring in Da Funk* From Stanley

Crouch to August Wilson to Jacqui Malone the plurality of voices gathered here reflects the variety of expression within jazz. The book's opening section sketches the overall place of jazz in America. Alan P. Merriam and Fradley H. Garner unpack the word jazz and its register. Albert Murray considers improvisation in music and life. Amiri Baraka argues that white critics misunderstand jazz and Stanley Crouch cogently dissects the intersections of jazz and mainstream American democratic institutions. After this, the book takes an interdisciplinary approach exploring jazz and the visual arts, dance, sports, history, memory, and literature. Ann Douglas writes on jazz's influence on the design and construction of skyscrapers in the 1920s and 30s. Zora Neale Hurston considers the significance of African American dance. Michael Eric Dyson looks at the jazz of Michael Jordan's basketball game and Hazel Carby takes on the sexual politics of Ma Rainey and Bessie Smith's blues. *The Jazz Cadence* offers a wealth of insight and information for scholars, students, jazz aficionados, and any reader wishing to know more about this music form that has put its stamp on American culture more profoundly than any other in the twentieth century.

*The Island at the Center of the World* Russell Shorto, 2005-04-12 In a riveting groundbreaking narrative, Russell Shorto tells the story of New Netherland, the Dutch colony which predated the Pilgrims and established ideals of tolerance and individual rights that shaped American history. UPDATED EDITION WITH A NEW PREFACE AND POSTSCRIPT

Astonishing! A book that will permanently alter the way we regard our collective past. *The New York Times*. When the British wrested New Amsterdam from the Dutch in 1664, the truth about its thriving polyglot society began to disappear into myths about an island purchased for 24 dollars and a cartoonish peg-legged governor. But the story of the Dutch colony of New Netherland was merely lost, not destroyed. 12,000 pages of its records, recently declared a national treasure, are now being translated. Russell Shorto draws on this remarkable archive in *The Island at the Center of the World*, which has been hailed by *The New York Times* as a book that will permanently alter the way we regard our collective past. The Dutch colony predated the original thirteen colonies, yet it seems strikingly familiar. Its capital was cosmopolitan and multi-ethnic, and its citizens valued free trade, individual rights, and religious freedom. Their champion was a progressive young lawyer named Adriaen van der Donck, who emerges in these pages as a forgotten American patriot and whose political vision brought him into conflict with Peter Stuyvesant, the autocratic director of the Dutch colony. The struggle between these two strong-willed men laid the foundation for New York City and helped shape American culture. *The Island at the Center of the World* uncovers a lost world and offers a surprising new perspective on our own.
