Dell PowerEdge R710—Information Update

System Memory

This document provides latest information on the supported memory configurations listed in the *Hardware Owner's Manual* at support.dell.com/manuals.

For systems with two processors:

- Single-rank and dual-rank RDIMMs of sizes 2 GB, 4 GB, 8 GB, and 16 GB are supported for a total of up to 288 GB.
- Quad-rank RDIMMs (two per channel) are supported for a total of up to 192 GB.
- 1 GB and 2 GB UDIMMs are supported for a total of up to 24 GB.

Memory Module Installation Guidelines

The memory speed of each channel depends on the memory configuration:

- For single or dual-rank memory modules:
  - One and two memory modules per channel support up to 1333 MHz.
  - Three memory modules per channel support up to 800 MHz.
- For quad-rank memory modules:
  - One memory module per channel supports up to 1067 MHz.
  - Two memory modules per channel are limited to 800 MHz, regardless of memory module speed.

NOTE: Actual memory speed depends on your system configuration such as the processor series, DIMM voltage (low or standard), and system firmware/BIOS version.

Imaging and Modelling Challenges** Oscar Camara,Tommaso Mansi,Mihaela Pop,Kawal Rhode,Maxime Sermesant,Alistair Young,2014-01-21 This book constitutes the thoroughly refereed post conference proceedings of the 4th International Workshop on Statistical Atlases and Computational Models of the Heart Imaging and Modelling Challenges STACOM 2013 held in conjunction with MICCAI 2013 in Nagoya Japan in September 2013 The 31 revised full papers were carefully reviewed and selected from numerous submissions The papers are organized in topical sections on cardiac image processing atlas construction statistical modelling of cardiac function across different patient populations cardiac mapping cardiac computational physiology model customization atlas based functional analysis ontological schemata for data and results integrated functional and structural analyses as well as the pre clinical and clinical applicability of these methods **Extreme Learning Machines 2013: Algorithms and Applications** Fuchen Sun,Kar-Ann Toh,Manuel Grana Romay,Kezhi Mao,2014-07-08 In recent years ELM has emerged as a revolutionary technique of computational intelligence and has attracted considerable attentions An extreme learning machine ELM is a single layer feed forward neural network alike learning system whose connections from the input layer to the hidden layer are randomly generated while the connections from the hidden layer to the output layer are learned through linear learning methods The outstanding merits of extreme learning machine ELM are its fast learning speed trivial human intervene and high scalability This book contains some selected papers from the International Conference on Extreme Learning Machine 2013 which was held in Beijing China October 15 17 2013 This conference aims to bring together the researchers and practitioners of extreme learning machine from a variety of fields including artificial intelligence biomedical engineering and bioinformatics system modelling and control and signal and image processing to promote research and discussions of learning without iterative tuning This book covers algorithms and applications of ELM It gives readers a glance of the newest developments of ELM **Advances in Digital Forensics VIII** Gilbert Peterson,Sujeet Shenoi,2012-12-09 Digital forensics deals with the acquisition preservation examination analysis and presentation of electronic evidence Networked computing wireless communications and portable electronic devices have expanded the role of digital forensics beyond traditional computer crime investigations Practically every crime now involves some aspect of digital evidence digital forensics provides the techniques and tools to articulate this evidence Digital forensics also has myriad intelligence applications Furthermore it has a vital role in information assurance investigations of security breaches yield valuable information that can be used to design more secure systems Advances in Digital Forensics VIII describes original research results and innovative applications in the discipline of digital forensics In addition it highlights some of the major technical and legal issues related to digital evidence

and electronic crime investigations The areas of coverage include themes and issues forensic techniques mobile phone forensics cloud forensics network forensics and advanced forensic techniques This book is the eighth volume in the annual series produced by the International Federation for Information Processing IFIP Working Group 11 9 on Digital Forensics an international community of scientists engineers and practitioners dedicated to advancing the state of the art of research and practice in digital forensics The book contains a selection of twenty two edited papers from the Eighth Annual IFIP WG 11 9 International Conference on Digital Forensics held at the University of Pretoria Pretoria South Africa in the spring of 2012 Advances in Digital Forensics VIII is an important resource for researchers faculty members and graduate students as well as for practitioners and individuals engaged in research and development efforts for the law enforcement and intelligence communities Gilbert Peterson is an Associate Professor of Computer Engineering at the Air Force Institute of Technology Wright Patterson Air Force Base Ohio USA Sujeet Shenoi is the F P Walter Professor of Computer Science and a Professor of Chemical Engineering at the University of Tulsa Tulsa Oklahoma USA **Advances in User Authentication** Dipankar Dasgupta,Arunava Roy,Abhijit Nag,2017-08-22 This book is dedicated to advances in the field of user authentication The book covers detailed description of the authentication process as well as types of authentication modalities along with their several features authentication factors It discusses the use of these modalities in a time varying operating environment including factors such as devices media and surrounding conditions like light noise etc The book is divided into several parts that cover descriptions of several biometric and non biometric authentication modalities single factor and multi factor authentication systems mainly adaptive negative authentication system etc Adaptive strategy ensures the incorporation of the existing environmental conditions on the selection of authentication factors and provides significant diversity in the selection process The contents of this book will prove useful to practitioners researchers and students The book is suited to be used a text in advanced graduate courses on User Authentication Modalities It can also be used as a textbook for professional development and certification coursework for practicing engineers and computer scientists Architecture and Patterns for IT Service Management, Resource Planning, and Governance Charles T. Betz,2011-11-02 Information technology supports efficient operations enterprise integration and seamless value delivery yet itself is too often inefficient un integrated and of unclear value This completely rewritten version of the bestselling Architecture and Patterns for IT Service Management Resource Planning and Governance retains the original and still unique approach apply the discipline of enterprise architecture to the business of large scale IT management itself Author Charles Betz applies his deep practitioner experience to a critical reading of ITIL 2011 COBIT version 4 the CMMI suite the IT portfolio management literature and the Agile Lean IT convergence and derives a value stream analysis IT semantic model and enabling systems architecture covering current topics such as CMDB CMS Service Catalog and IT Portfolio Management Using the concept of design patterns the book then presents dozens of visual models documenting challenging problems in integrating IT management showing how process

data and IT management systems must work together to enable IT and its business partners The edition retains the fundamental discipline of traceable process data and system analysis that has made the first edition a favored desk reference for IT process analysts around the world This best seller is a must read for anyone charged with enterprise architecture IT planning or IT governance and management Lean oriented process analysis of IT management carefully distinguished from an IT functional model Field tested conceptual information model with definitions and usage scenarios mapped to both the process and system architectures Integrated architecture for IT management systems Synthesizes Enterprise Architecture IT Service Management and IT Portfolio Management in a practical way **SAN/LAN Monthly Newletter December 2010** ,

Computational Intelligence, Optimization and Inverse Problems with Applications in Engineering Gustavo Mendes Platt,Xin-She Yang,Antônio José Silva Neto,2018-09-25 This book focuses on metaheuristic methods and its applications to real world problems in Engineering The first part describes some key metaheuristic methods such as Bat Algorithms Particle Swarm Optimization Differential Evolution and Particle Collision Algorithms Improved versions of these methods and strategies for parameter tuning are also presented both of which are essential for the practical use of these important computational tools The second part then applies metaheuristics to problems mainly in Civil Mechanical Chemical Electrical and Nuclear Engineering Other methods such as the Flower Pollination Algorithm Symbiotic Organisms Search Cross Entropy Algorithm Artificial Bee Colonies Population Based Incremental Learning Cuckoo Search and Genetic Algorithms are also presented The book is rounded out by recently developed strategies or hybrid improved versions of existing methods such as the Lightning Optimization Algorithm Differential Evolution with Particle Collisions and Ant Colony Optimization with Dispersion state of the art approaches for the application of computational intelligence to engineering problems The wide variety of methods and applications as well as the original results to problems of practical engineering interest represent the primary differentiation and distinctive quality of this book Furthermore it gathers contributions by authors from four countries some of which are the original proponents of the methods presented and 18 research centers around the globe
