

Group 10 PICKUP ROTOR

REMOVAL AND INSTALLATION

CAUTION: Place stack wagon on a level surface, support front end securely, and block wheels before working underneath. Use blocks under the pickup skid when changing flails.

Refer to ROTOR DRIVE Group 20, Section 20, to remove drive belt from rotor drive sheave, and to remove or replace rotor bearings. Rotor can be removed if desired, after bearings are removed.

DISASSEMBLY

To change paddles on early models, or hinges on late models, without removing rotor, proceed as follows:

Remove cotter pins (4, Fig. 2) and drive out wedge pins (3) holding paddle shafts at each end of rotor. Obtain a section of 16 or 19 mm (5/8 or 3/4 in.) diameter steel rod to use as a driver. Align a paddle shaft with the access holes; then use drive rod to force shaft out opposite end of housing, as in Fig. 1.

NOTE: Paddles will wear faster near the center of the rotor. If these worn paddles are exchanged with paddles which are less worn, use **ONLY** paddles from the same shaft.

A—Wedge Pin

Fig. 1—Changing Paddles

When new paddles are required, install the same quantity of new paddles each 180° (opposite shaft).

These precautions are necessary to preserve rotor balance.

The pickup rotor exploded view is shown in Fig. 2.

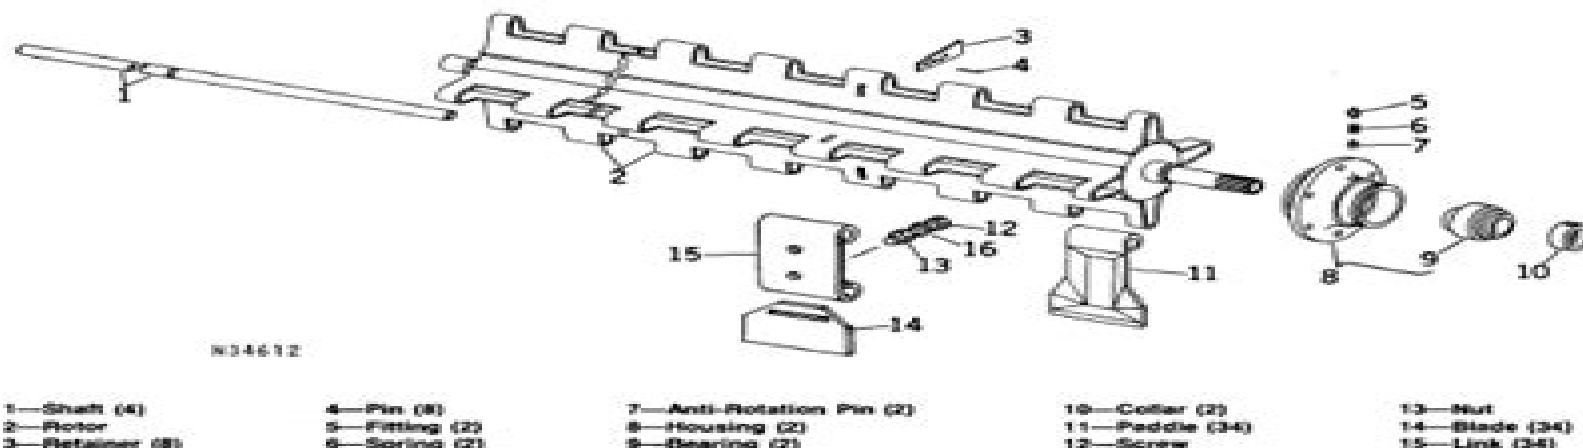

Fig. 2—Rotor and Paddles
