**Information-Measuring Systems** Vitalii Babak,Serhii Babak,Volodymyr Eremenko,Yurii Kuts,Artur Zaporozhets,2025-05-31 This book concentrates on virtual IMS with the use of modern information and measurement modeling technologies Modern IMS can be implemented as real hardware and software measuring tools virtual IMS with the use of modern information and measurement modeling technologies including simulation mathematical physical with extensive use of computer equipment for conducting a simulation measurement experiment Compared to real ones virtual IMS has a number of advantages and their implementation requires less time production and financial costs However in a number of cases due to the information uncertainty of the object of measurement such IMS cannot provide objective and reliable results and therefore it is necessary to conduct a full scale measurement experiment using real systems The potential capabilities of modern systems at the stage of information development of society have increased significantly which contributes both to the expansion of the subject areas of their application and their use to increase the efficiency of known and solve new scientific and applied measurement tasks The authors are in solidarity with other colleagues specialists in measurements in the forecasts of the development of IMS No improvements in measurement information technologies including computer and intellectual ones have not led are not leading and obviously cannot lead in future to the expansion of the nomenclature of measurements of quantities while there are no corresponding sensors that form primary information during their direct interaction with the research object Further development of IMS and their use in various fields of science and technology including quantum metrology and nanotechnology will largely be determined by the development of new principles of operation and the creation of new types of sensors based on them

**On-Board Processing for Satellite Remote Sensing Images** Guoqing Zhou,2023-05-12 On board image processing systems are used to maximize image data transmission efficiency for large volumes of data gathered by Earth observation satellites This book explains the methods mathematical models and key technologies used for these systems It introduces the background basic concepts and the architecture of on board image processing along with on board detection of the image feature and matching ground control point identification on board geometric correction calibration geographic registration etc Describes algorithms and methodologies for on board image processing with FPGA chips Migrates the traditional on ground computing to on board operation and the image processing is implemented on board not on ground Introduces for the first time many key

technologies and methods for on board image processing Emphasizes the recent progress in image processing by using on board FPGA chips Includes case studies from the author s extensive research and experience on the topic This book gives insights into emerging technologies for on board processing and will benefit senior undergraduate and graduate students of remote sensing information technology computer science and engineering electronic engineering and geography as well as researchers and professionals interested in satellite remote sensing image processing in academia and governmental and commercial sectors     *Introduction to Homeland Security* George Haddow,Jane Bullock,Damon Coppola,2015-05-29

*Introduction to Homeland Security* Principles of All Hazards Risk Management Fifth Edition provides users with a substantially updated version of previous versions clearly delineating the bedrock principles of preparing for mitigating managing and recovering from emergencies and disasters while also offering a balanced account of all aspects of homeland security This new edition features coverage of the Boston Marathon bombing analysis of the NIST Cybersecurity Framework for critical infrastructure protection and examines the DHS Blue Campaign to stop human trafficking To provide added perspective this edition features additional another voice sections and examines the emergence of social media as a tool for reporting on homeland security issues Provides users with a comprehensive understanding of the bedrock principles of preparing for mitigating managing and recovering from emergencies and disasters Features coverage of the Boston Marathon bombing and analysis of the NIST Cybersecurity Framework for critical infrastructure protection Examines the emergence of social media as a tool for reporting on homeland security issues     *NRL Review* ,2015     **Ambient**

**Intelligence- Software and Applications - 8th International Symposium on Ambient Intelligence (ISAmI 2017)**

Juan F. De Paz,Vicente Julián,Gabriel Villarrubia,Goreti Marreiros,Paulo Novais,2017-06-14 Ambient Intelligence AmI is a recent paradigm emerging from Artificial Intelligence in which computers are used as proactive tools to assist people with their day to day activities making their lives more comfortable Another main goal of AmI originates from the human computer interaction domain and focuses on offering ways to interact with systems in a more natural way by means of user friendly interfaces This field is evolving quickly as can be witnessed by the emerging natural language based and gesture based types of interaction The inclusion of computational power and communication technologies in everyday objects is growing and their embeddedness in our environments should be as invisible as possible In order for AmI to be successful human interaction with computing power and embedded systems in the surroundings should be smooth and take place without people actually noticing it The only things people should notice in connection with AmI are more safety comfort and wellbeing emerging in a natural and inherent way ISAmI is the International Symposium on Ambient Intelligence and aims to bring together researchers from the various disciplines that constitute the scientific field of Ambient Intelligence to present and discuss the latest results new ideas projects and lessons learned especially in terms of software and applications

*Swarm Robotics* Giandomenico Spezzano,2019-05-13 Collectively working robot teams can solve a problem more

efficiently than a single robot while also providing robustness and flexibility to the group. Swarm robotics model is a key component of a cooperative algorithm that controls the behaviors and interactions of all individuals. The robots in the swarm should have some basic functions such as sensing, communicating, and monitoring and satisfy the following properties:

- Autonomy: Individuals that create the swarm robotic system are autonomous robots. They are independent and can interact with each other and the environment.
- Large number: They are in large number, enabling cooperation.
- Scalability and robustness: A new unit can be easily added to the system so the system can be easily scaled. A greater number of units improves the performance of the system. The system is quite robust to the loss of some units as some units still remain to perform although the system will not perform to its maximum capabilities.
- Decentralized coordination: The robots communicate with each other and with their environment to make final decisions.
- Flexibility: The swarm robotic system has the ability to generate modularized solutions to different tasks.

**Social Informatics** Emma Spiro, Yong-Yeol

Ahn, 2016-11-01. The two volume set LNCS 10046 and 10047 constitutes the proceedings of the 8th International Conference on Social Informatics SocInfo 2016 held in Bellevue WA USA in November 2016. The 36 full papers and 39 poster papers presented in this volume were carefully reviewed and selected from 120 submissions. They are organized in topical sections named: networks, communities and groups, politics, news and events, markets, crowds and consumers, and privacy, health and well-being.

Applied Video Processing in Surveillance and Monitoring Systems Dey, Nilanjan, Ashour, Amira, Acharjee,

Suvojit, 2016-10-11. Video monitoring has become a vital aspect within the global society as it helps prevent crime, promote safety, and track daily activities such as traffic. As technology in the area continues to improve, it is necessary to evaluate how video is being processed to improve the quality of images. *Applied Video Processing in Surveillance and Monitoring Systems* investigates emergent techniques in video and image processing by evaluating such topics as segmentation, noise elimination, encryption, and classification. Featuring real time applications, empirical research, and vital frameworks within the field, this publication is a critical reference source for researchers, professionals, engineers, academicians, advanced level students, and technology developers.

*5G and Fiber Optics Security Technologies for Smart Grid Cyber Defense* Prabhakar, G., Ayyanar, N., Rajaram, S., 2024-08-01.

In the digital age, smart grids stand as the backbone of modern energy systems, facilitating efficient energy distribution and management. However, this sophistication comes at the cost of heightened vulnerability to cyber threats. Standing on the precipice of a hyper-connected future, the inadequacies of current cybersecurity measures loom large, demanding urgent attention from academic scholars and industry experts. *5G and Fiber Optics Security Technologies for Smart Grid Cyber Defense* addresses the challenges of securing smart grid systems through communication technologies. The book navigates through 5G wireless and fiber optics, offering a nuanced understanding of their application in the context of grid security. The book begins by exploring the inherent vulnerabilities in smart grid architecture and the imperative role of cybersecurity in modern energy systems. Subsequently, it delves into the specifics of 5G network

architectures dissecting the technologies and standards underpinning the new radio NR while emphasizing the significance of network slicing and security isolation Concurrently the book unveils the intricacies of fiber optic communication in smart grids elucidating network design security measures and integrating fiber optic sensors for grid monitoring and intrusion detection

*Advanced Methodologies and Technologies in Network Architecture, Mobile Computing, and Data Analytics* Khosrow-Pour, D.B.A., Mehdi, 2018-10-19 From cloud computing to data analytics society stores vast supplies of information through wireless networks and mobile computing As organizations are becoming increasingly more wireless ensuring the security and seamless function of electronic gadgets while creating a strong network is imperative Advanced Methodologies and Technologies in Network Architecture Mobile Computing and Data Analytics highlights the challenges associated with creating a strong network architecture in a perpetually online society Readers will learn various methods in building a seamless mobile computing option and the most effective means of analyzing big data This book is an important resource for information technology professionals software developers data analysts graduate level students researchers computer engineers and IT specialists seeking modern information on emerging methods in data mining information technology and wireless networks

**Integrated Space for African Society** Annette Froehlich, 2019-09-18 This book provides an overview of the space sector in African countries from a legal and policy point of view analysing how the African Union's Space Policy and Strategy ASPS is implemented and highlighting the various space activities in each country Against this backdrop it investigates the ASPS identifying its policy goals identified and discussing its strategy Moreover it explores the on going regional cooperation programmes the continent's leading space actors and

their roles and the space related regional fora and organizations reflecting on various initiatives including the African Leadership Conference on Space Science and Technology for Sustainable Development ALC the Regional African Satellite Communications Organisation RASCOM and the African Resource Management Satellite Constellation ARMS C As such it is a valuable source of information on space capacities in African countries **African Foreign Policies in International Institutions** Jason Warner, Timothy M. Shaw, 2018-05-18 This book is the first to exclusively consider the foreign policy tendencies of African states in international institutions As an edited volume offering empirically based perspectives from a variety of scholars this project disabuses the notion that Africa should be considered a niche interest in the field of foreign policy analysis It asserts that the actions of the continent's states collectively serve as an important heuristic by which to interrogate and understand the foreign policies of other global states and are not simply anomalously extant entities whose actions should be studied only insofar as they deviate from predictions based on the experiences of Western or other non African states

**Distributed Denial of Service Attacks** İlker Özçelik, Richard Brooks, 2020-08-03 Distributed Denial of Service DDoS attacks have become more destructive wide spread and harder to control over time This book allows students to understand how these attacks are constructed the security flaws they leverage why they are effective how they can be detected and how they can be mitigated Students use software defined networking SDN technology to create and execute controlled DDoS experiments They learn how to deploy networks analyze network performance and create resilient systems This book is used for graduate level computer engineering instruction at Clemson University It augments the traditional graduate computing curricula by integrating Internet deployment network security ethics contemporary social issues and engineering principles into a laboratory based course of instruction Unique features of this book include A history of DDoS attacks that includes attacker motivations Discussion of cyber war censorship and Internet black outs SDN based DDoS laboratory assignments Up to date review of current DDoS attack techniques and tools Review of the current laws that globally relate to DDoS Abuse of DNS NTP BGP and other parts of the global Internet infrastructure to attack networks Mathematics of Internet traffic measurement Game theory for DDoS resilience Construction of content distribution systems that absorb DDoS attacks This book assumes familiarity with computing Internet design appropriate background in mathematics and some programming skills It provides analysis and reference material for networking engineers and researchers By increasing student knowledge in security and networking it adds breadth and depth to advanced computing curricula

**Space Supporting Africa** Annette Froehlich, Nicolas Ringas, James Wilson, 2020-09-15 Africa faces numerous challenges relating to good governance due to its vast and diverse landscape as well as its history This book explores the role of space based applications in supporting African good governance by strengthening civil society bolstering democratic processes and advancing socio economic development The increased use of such applications can accelerate Africa's progress towards the United Nations Agenda 2030 Sustainable Development Goals as well as the African Union's Agenda

2063 aspirations This book examines key challenges facing governance within African to provide an accurate account of the current African context It discusses specific examples of e governance and digital solutions that leverage space based technologies and have been successfully implemented in both the developed and developing world In the context of the numerous satellite constellations being deployed to provide affordable Internet connectivity globally it examines the major actors in this sector and presents additional governance solutions based on remote sensing and Earth observation data Given its scope the book will be of interest to professionals and students in the fields of development governance and space studies

*Principles of Applied Remote Sensing* Siamak Khorram,Cynthia F. van der Wiele, Frank H. Koch, Stacy A. C.

Nelson, Matthew D. Potts, 2016-01-04 This textbook is one of the first to explain the fundamentals and applications of remote sensing at both undergraduate and graduate levels Topics include definitions and a brief history of payloads and platforms data acquisition and specifications image processing techniques data integration and spatial modeling and a range of applications covering terrestrial atmospheric oceanographic and planetary disciplines The policy and law issues of remote sensing and the future trends on the horizon are also covered Remote sensing is an exciting dynamic technology that is transforming the Earth sciences terrestrial atmospheric and marine as well as the practices of agriculture disaster response engineering natural resources providing evidence in legal cases and documented humanitarian crises and many other fields Increasingly understanding of these techniques will be central to a number of disciplines particularly as the technology advances
