Delem

Modularity solutions

With the Modulyte DM-101 modules, scalability and flexibility is provided based on state of the art electronics ready for tomorrow.

The DM-101 module is a single axis controller and part of the modular concept for the DAcroWindows range.

The control functions and settings of the module are programmable over any DAcroWindows front-end control. Depending on the axis control type a machine parameter will be enough to have all control options for servo, frequency inverter control as well as AC 2-speed control available.

Up to a maximum of 16 modules can be connected to the front-end control units via the industrial bus with the sequencer (PLC) functionality of the control. This will give optimal scalability to suite the machines configuration and integrate machine control functions, and some relays or other logics.

All Modulyte modules are interconnected by the HSB-bus. This enables easy setup, reduced cabling and makes a fully integrated system.

Next to this module all kind of axes can be controlled via additional modules offering optimal flexibility.

DM-101 module featuring:

- Servo control
- Frequency inverter control
- AC 2-speed control
- Delem Modulyte compatible
- High frequency encoder interfacing
- Analogue inputs
- Enhanced diagnostics
- Compact footprint and encasing
