## **Deleuzian Intersections Science Technology Anthropology:**

**Deleuzian Intersections** Casper Bruun Jensen, 2009-11-01 Science and technology studies cultural anthropology and cultural studies deal with the complex relations between material symbolic technical and political practices In a Deleuzian approach these relations are seen as produced in heterogeneous assemblages moving across distinctions such as the human and non human or the material and ideal This volume outlines a Deleuzian approach to analyzing science culture and politics

**Deleuze and Psychology** Maria Nichterlein, John R. Morss, 2016-08-05 An increasing number of scholars students and practitioners of psychology are becoming intrigued by the ideas of Gilles Deleuze and of Felix Guattari This book aims to be a critical introduction to these ideas which have so much to offer psychology in terms of new directions as well as critique Deleuze was one of the most prominent philosophers of the 20th century and a figure whose ideas are increasingly influential throughout the humanities and social sciences His work particularly his collaborations with psychoanalyst Guattari focused on the articulation of a philosophy of difference Rejecting mainstream continental philosophy just as much as the orthodox analytical metaphysics of the English speaking world Deleuze proposed a positive and passionate alternative bursting at the seams with new concepts and new transformations This book overviews the philosophical contribution of Deleuze including the project he developed with Guattari It goes on to explore the application of these ideas in three major dimensions of psychology its unit of analysis its method and its applications to the clinic Deleuze and Psychology will be of interest to students and scholars of psychology and those interested in continental philosophy as well as psychological practitioners and therapists

**Hope and Insufficiency** Rachel Douglas-Jones, Justin Shaffner, 2021-09-17 A process through which skills knowledge and resources are expanded capacity building remains a tantalizing and pervasive concept throughout the field of anthropology though it has received little in the way of critical analysis By exploring the concept s role in a variety of different settings including government lexicons religious organizations environmental campaigns biomedical training and fieldwork from around the globe Hope and Insufficiency seeks to question the histories assumptions intentions and enactments that have led to the ubiquity of capacity building thereby developing a much needed critical purchase on its persuasive power

**Deleuze, Guattari, and the Problem of Transdisciplinarity** Guillaume Collett, 2019-11-14 Deleuze and Guattari s work has today become ubiquitous in the humanities and social sciences being regularly drawn on by a vast array of subjects Throughout their careers Deleuze and Guattari also engaged with a myriad of disciplines yet they declared themselves that Philosophy is not interdisciplinary This apparent contradiction has rarely been explicitly confronted by scholars Fortunately however Deleuze and Guattari left us a number of clues in their works signaling how to approach this apparent impasse These clues amount to a complex and penetrating if un unified theory of disciplinarity and cross disciplinary articulation Energized by recent developments in critical transdisciplinarity studies this volume analyzes and evaluates instances of disciplinarity and transdisciplinarity within Deleuze and Guattari s shared and respective bodies of

work The first volume in English specifically devoted to examining Deleuze and Guattari's work using this framework this book both contributes to the field of critical transdisciplinarity studies and in doing so helps shed light on the heart of Deleuze and Guattari's intellectual project

**The Digital Logic of Death** Steven Pustay, 2021-01-14 This book is open access and available on [www.bloomsburycollections.com](http://www.bloomsburycollections.com) It is funded by Knowledge Unlatched In *The Digital Logic of Death* Steven Pustay skillfully makes visible the immensely important but often overlooked role that moving images play in shaping our understanding of mortality This relationship he argues is made all the more urgent by the technologies of the digital age which have profoundly altered our ability to represent and contemplate death through moving images resulting in an entirely new cultural logic of death To draw out this new logic Pustay presents accessible readings of otherwise dense and difficult philosophical approaches to death such as those found in existentialism psychoanalysis and critical theory by reading them through the lens of contemporary media From art house films like *Irrversible* and *The Fountain* to blockbusters like the *Matrix* trilogy from television commercials for M M s to pay cable dramas like *The Sopranos* and *Breaking Bad* from first person shooters like *Bioshock* to indie games like *LIMBO* Pustay shows how moving images have shifted our understanding of death in general and our recognition of our own finiteness in particular

**Chromosome Woman, Nomad Scientist** Savithri Preetha Nair, 2022-11-23 This is the first in depth and analytical biography of an Asian woman scientist Edavaleth Kakkat Janaki Ammal 1897-1984 Using a wide range of archival sources it presents a dazzling portrait of the twentieth century through the eyes of a pioneering Indian woman scientist who was highly mobile and a life that intersected with several significant historical events the rise of Nazi Germany and World War II the struggle for Indian Independence the social relations of science movement the Lysenko affair the green revolution the dawn of environmentalism and the protest movement against a proposed hydro electric project in the Silent Valley in the 1970s and 1980s The volume brings into focus her work on mapping the origin and evolution of cultivated plants across space and time to contribute to a grand history of human evolution her works published in peer reviewed Indian and international journals of science as well as her co authored work *Chromosome Atlas of Cultivated Plants* 1945 considered a bible by practitioners of the discipline It also looks at her correspondence with major personalities of the time including political leaders like Jawaharlal Nehru biologists like Cyril D Darlington J B S Haldane and H H Bartlett geographers like Carl Sauer and social activists like Hilda Seligman who all played significant roles in shaping her world view and her science A story spanning over North America Europe and Asia this biography is a must have for scholars and researchers of science and technology studies gender studies especially those studying women in the sciences history and South Asian studies It will also be a delight for the general reader

**A Media Epigraphy of Video Compression** Marek Jancovic, 2023-07-29 This book explores the historical interrelationships between mathematics medicine and media and offers a unique perspective on how video compression has shaped our relationship with moving images and the world It situates compression in a network of technological visual and epistemic practices

spanning from late 18th century computational methods to the standardization of electrical infrastructure and the development of neurology throughout the 1900s Bringing into conversation media archaeology science and technology studies disability studies and queer theory each chapter offers an in depth look at a different trace of compression such as interlacing macroblocking or flicker This is a story of forgotten technologies unusual media practices strange images on the margins of visual culture and inventive ways of looking at the world Readers will find illuminating discussions of the formation of complex scientific and medical systems and of the violent and pleasurable interactions between our bodies and media infrastructure **Archaeological Theory in the New Millennium** Oliver J. T. Harris,Craig Cipolla,2017-06-26

Archaeological Theory in the New Millennium provides an account of the changing world of archaeological theory and a challenge to more traditional narratives of archaeological thought It charts the emergence of the new emphasis on relations as well as engaging with other current theoretical trends and the thinkers archaeologists regularly employ Bringing together different strands of global archaeological theory and placing them in dialogue the book explores the similarities and differences between different contemporary trends in theory while also highlighting potential strengths and weaknesses of different approaches Written in a way to maximise its accessibility in direct contrast to many of the sources on which it draws Archaeological Theory in the New Millennium is an essential guide to cutting edge theory for students and for professionals wishing to reacquaint themselves with this field *The Politics of Resource Extraction* S. Sawyer,E. Gomez,2012-02-14

International institutions United Nations World Bank and multinational companies have voiced concern over the adverse impact of resource extraction activities on the livelihood of indigenous communities This volume examines mega resource extraction projects in Australia Bolivia Canada Chad Cameroon India Nigeria Peru the Philippines **Creating Material**

**Worlds** Louisa Campbell,Adrian Maldonado,Elizabeth Pierce,Anthony Russell,2016-05-07 Despite a growing literature on identity theory in the last two decades much of its current use in archaeology is still driven toward locating and dating static categories such as Phoenician Christian or native Previous studies have highlighted the various problems and challenges presented by identity with the overall effect of deconstructing it to insignificance As the humanities and social sciences turn to material culture archaeology provides a unique perspective on the interaction between people and things over the long term This volume argues that identity is worth studying not despite its slippery nature but because of it Identity can be seen as an emergent property of living in a material world an ongoing process of becoming which archaeologists are particularly well suited to study The geographic and temporal scale of the papers included is purposefully broad to demonstrate the variety of ways in which archaeology is redefining identity Research areas span from the Great Lakes to the Mediterranean with case studies from the Mesolithic to the contemporary world by emerging voices in the field The volume contains a critical review of theories of identity by the editors as well as a response and afterward by A Bernard Knapp Biopolitics and the Philosophy of Death Paolo Palladino,2016-10-20 While the governance of human existence is organised ever

increasingly around life and its potential to proliferate beyond all limits much critical reflection on the phenomenon is underpinned by considerations about the very negation of life death The challenge is to construct an alternative understanding of human existence that is truer to the complexity of the present biopolitical moment Palladino responds to the challenge by drawing upon philosophical historical and sociological modes of inquiry to examine key developments in the history of biomedical understanding of ageing and death He combines this genealogy with close reflection upon its implications for a critical and effective reading of Foucault's and Deleuze's foundational work on the relationship between life death and embodied existence Biopolitics and the Philosophy of Death proposes that the central task of contemporary critical thought is to find ways of coordinating different ways of thinking about molecules populations and the mortality of the human organism without transforming the notion of life itself into the new transcendent truth that would take the place once occupied by God and Man

**Sound Work** Jonathan Impett, 2021-12-15 The practices and perception of music creation have evolved with the cultural social and technological contexts of music and musicians But musical authorship in its many technical and aesthetic modes remains an important component of music culture Musicians are increasingly called on to share their experience in writing However cultural imperatives to account for composition as knowledge production and to make claims for its uniqueness inhibit the development of discourse in both expert and public spheres Internet pioneer Philip Agre observed a discourse deficit in artificial intelligence research and proposed a critical technical practice a single disciplinary field with one foot planted in the craft work of design and the other foot planted in the reflexive work of critique A critical technical practice rethinks its own premises re evaluates its own methods and reconsiders its own concepts as a routine part of its daily work This volume considers the potential for critical technical practice in the evolving situation of composition across a wide range of current practices In seeking to tell more honest useful stories of composition it hopes to contribute to a new discourse around the creation of music

*The Routledge Companion to Actor-Network Theory* Anders Blok, Ignacio Farias, Celia Roberts, 2019-06-17 This companion explores ANT as an intellectual practice tracking its movements and engagements with a wide range of other academic and activist projects Showcasing the work of a diverse set of second generation ANT scholars from around the world it highlights the exciting depth and breadth of contemporary ANT and its future possibilities The companion has 38 chapters each answering a key question about ANT and its capacities Early chapters explore ANT as an intellectual practice and highlight ANT's dialogues with other fields and key theorists Others open critical provocative discussions of its limitations Later sections explore how ANT has been developed in a range of social scientific fields and how it has been used to explore a wide range of scales and sites Chapters in the final section discuss ANT's involvement in real world endeavours such as disability and environmental activism and even running a Chilean hospital Each chapter contains an overview of relevant work and introduces original examples and ideas from the authors recent research The chapters orient readers in rich complex fields and can be read in any order or combination

Throughout the volume authors mobilise ANT to explore and account for a range of exciting case studies from wheelchair activism to parliamentary decision making from racial profiling to energy consumption monitoring from queer sex to Korean cities A comprehensive introduction by the editors explores the significance of ANT more broadly and provides an overview of the volume The Routledge Companion to Actor Network Theory will be an inspiring and lively companion to academics and advanced undergraduates and postgraduates from across many disciplines across the social sciences including Sociology Geography Politics and Urban Studies Environmental Studies and STS and anyone wishing to engage with ANT to understand what it has already been used to do and to imagine what it might do in the future

**Situational Analysis** Adele E. Clarke, Carrie Friese, Rachel S. Washburn, 2017-07-20 The Second Edition of Situational Analysis Grounded Theory After the Interpretive Turn offers an innovative extension of grounded theory useful in qualitative research projects that draws on interviews observations and visual narrative and historical discourse materials To engage the dense complexities of real world situations Situational Analysis SA braids together Strauss's ecological social worlds arenas theory Foucault's discourse analysis and Deleuze and Guattari's rhizomes and assemblages In SA the situation itself becomes the fundamental unit of analysis Using extensive examples the authors discuss getting started how to create three kinds of maps emphasizing differences and relationality situational maps social world arena maps and positional maps the kinds of analytic work they accomplish and how to write up the results centered on the distinctive strengths of the method The book will serve as an invaluable resource for advanced undergraduate and graduate level students as well as professional researchers and consultants from diverse backgrounds pursuing qualitative projects

**Archaeological Theory in Dialogue** Rachel J. Crellin, Craig N. Cipolla, Lindsay M. Montgomery, Oliver J.T. Harris, Sophie V. Moore, 2020-11-09 Archaeological Theory in Dialogue presents an innovative conversation between five scholars from different backgrounds on a range of central issues facing archaeology today Interspersing detailed investigations of critical theoretical issues with dialogues between the authors the book interrogates the importance of four themes at the heart of much contemporary theoretical debate relations ontology posthumanism and Indigenous paradigms The authors who work in Europe and North America explore how these themes are shaping the ways that archaeologists conduct fieldwork conceptualize the past and engage with the political and ethical challenges that our discipline faces in the twenty first century The unique style of Archaeological Theory in Dialogue switching between detailed arguments and dialogical exchange makes it essential reading for both scholars and students of archaeological theory and those with an interest in the politics and ethics of the past

**Mothering in East Asian Communities; Politics and Practices** Patti Duncan, 2014-09-01 In Mothering in East Asian Communities Duncan and Wong seamlessly rupture a homogenous identity category that of the tiger mom The editors invoke the works of diverse contributors who critically challenge essentialized identity categories and racialized and sexualized experiences of women of color within the institution of motherhood and practices of mothering Here the edited volume grapples with globalization

transnationalism and capitalism with an East Asian ethno racial cultural context Duncan and Wong offer a personal and political analysis of motherhood that is socially and cu *Infrastructures and Social Complexity* Penelope Harvey, Casper Bruun Jensen, Atsuro Morita, 2016-10-04 Contemporary forms of infrastructural development herald alternative futures through their incorporation of digital technologies mobile capital international politics and the promises and fears of enhanced connectivity In tandem with increasing concerns about climate change and the anthropocene there is further an urgency around contemporary infrastructural provision a concern about its fragility and an awareness that these connective relational systems significantly shape both local and planetary futures in ways that we need to understand more clearly Offering a rich set of empirically detailed and conceptually sophisticated studies of infrastructural systems and experiments present and past contributors to this volume address both the transformative potential of infrastructural systems and their stasis Covering infrastructural figures their ontologies epistemologies classifications and politics and spanning development urban energy environmental and information infrastructures the chapters explore both the promises and failures of infrastructure Tracing the experimental histories of a wide range of infrastructures and documenting their variable outcomes the volume offers a unique set of analytical perspectives on contemporary infrastructural complications These studies bring a systematic empirical and analytical attention to human worlds as they intersect with more than human worlds whether technological or biological

**Postgenomics** Sarah S. Richardson, Hallam Stevens, 2015-05-29 Ten years after the Human Genome Project's completion the life sciences stand in a moment of uncertainty transition and contestation The postgenomic era has seen rapid shifts in research methodology funding scientific labor and disciplinary structures Postgenomics is transforming our understanding of disease and health our environment and the categories of race class and gender At the same time the gene retains its centrality and power in biological and popular discourse The contributors to Postgenomics analyze these ruptures and continuities and place them in historical social and political context Postgenomics they argue forces a rethinking of the genome itself and opens new territory for conversations between the social sciences humanities and life sciences Contributors Russ Altman Rachel A Ankeny Catherine Bliss John Dupr Michael Fortun Evelyn Fox Keller Sabina Leonelli Adrian Mackenzie Margot Moinester Aaron Panofsky Sarah S Richardson Sara Shostak Hallam Stevens

**Perspectivism in Archaeology** Andrés Laguens, 2024-02-08 Perspectivism in Archaeology explores recurring features in Amerindian mythology and cosmology in the past as well as distinctions and similarities between humans non humans and material culture It offers a range of possibilities for the reconstruction of ancient ontological approaches as well as new ways of thinking in archaeology notably how ancient ontological approaches can be reconciled with current archaeological theories In this volume Andr s Laguens contributes a new set of approaches that incorporate Indigenous theories of reality into an understanding of the South American archaeological record He analyses perspectivism as a step by step theory with clear explanations and examples and shows how it can be implemented in archaeological research and merged with ontological

approaches Exploring the foundations of Amerindian perspectivism and its theoretical and methodological possibilities he also demonstrates applications of its precepts through case studies of ancient societies of the Andes and Patagonia An Archaeology of Materials Chantal Conneller, 2012-03-28 An Archaeology of Materials sets out a new approach to the study of raw materials Traditional understandings of materials in archaeology and in western thought more widely have failed to acknowledge both the complexity and moreover the benefits of an analysis of materials Here Conneller argues that materials cannot be understood independently of the practices through which they are constituted Drawing on a number of different thinkers and using case studies from the European early Prehistoric period she investigates how we can rethink the properties of matter and the relationship of material and form What emerges from this book is the variability and the specificity of human material interactions and the rather more active role that matter plays in these than traditionally conceived Rather than being insignificant a formless substrate or simply a constraint to human action it is argued that materials are more fundamental Tracing the processes by which the properties of past materials emerge reveals the working of past worlds particularly articulations of the cultural the natural and the supernatural This book will establish a new perspective on the meaning and significance of materials particularly those involved in mundane daily usage and will be a timely addition to the literature on technologies and materials
