Normalizing Extreme Imprisonment Marion Vannier, 2021

A critical examination of life imprisonment without the possibility of parole LWOP This book presents a unique case study of the normalization of LWOP and the extent to which groups and individuals within civil society who challenge capital punishment have helped normalize LWOP by fostering the belief that it is humane and merciful

The Politics of

Punishment Louise Brangan, 2021-05-16 Prisons are everywhere Yet they are not everywhere alike How can we explain the differences in cross national uses of incarceration The Politics of Punishment explores this question by undertaking a comparative sociological analysis of penal politics and imprisonment in Ireland and Scotland Using archives and oral history this book shows that divergences in the uses of imprisonment result from the distinctive features of a nation's political culture the different political ideas cultural values and social anxieties that shape prison policymaking Political culture thus connects large scale social phenomena to actual carceral outcomes illuminating the forces that support and perpetuate cross national penal differences The work therefore offers a new framework for the comparative study of penalty This is also an important work of sociology and history By closely tracking how and why the politics of punishment evolved and adapted over time we also yield rich and compelling new accounts of both Irish and Scottish penal cultures from 1970 to the 1990s The Politics of Punishment will be essential reading for students and academics interested in the sociology of punishment comparative penology criminology penal policymaking law and social history

The Myth of Judicial Independence Mike

McConville, Michael McConville, Luke Marsh, 2020 This book contests the existence of judicial independence It maintains that civil servants historically and up to the present day have advanced executive mission creep and eroded common law principles via their influence over the Judges Rules Reflexivity and Criminal Justice Sarah Armstrong, Jarrett

Blaustein, Alistair Henry, 2016-11-23 This collection presents a diverse set of case studies and theoretical reflections on how criminologists engage with practitioners and policy makers while undertaking research The contributions to this volume highlight both the challenges and opportunities associated with doing criminological research in a reflexive and collaborative manner They further examine the ethical and practical implications of the impact agenda in the higher education sector with respect to the production and the dissemination of criminological knowledge Developed to serve as an internationally accessible reference volume for scholars practitioners and postgraduate criminology students this book responds to the awareness that criminology as a discipline increasingly encompasses not only the study of crime but also the agencies process and structures that regulate it Key questions include How can criminal justice policy be studied as part of the field of criminology How do we account for our own roles as researchers who are a part of the policy process What factors and dynamics influence hinder and facilitate good policy **Criminal Justice, Risk and the Revolt against Uncertainty** John Pratt, Jordan Anderson, 2020-03-17 This book examines the impact and implications of the relationship between risk and criminal justice in advanced liberal democracies in the context of the revolt against uncertainty which has underpinned the rise of populist politics across these societies in recent years It asks what impact the demands for more certainty and security and the insistence that national identity be reasserted will have on criminal law and penal policy Drawing upon contributions made at a symposium held at Victoria University of Wellington New Zealand in November 2018 this edited collection also discusses the way in which risk has come to inform sentencing practices broader criminal justice processes and the critical issues associated with this It also examines the growth and making of new risky populations and the harnessing of risk prevention logics techniques and mechanisms which have inflated the influence of risk on criminal justice *The Official History of Criminal Justice in England and Wales* David Downes, Tim Newburn, 2022-11-29 This book is Volume IV in the Official History of Criminal Justice in England and Wales Previous volumes have focused on the moral reforms of the 1960s the changes to the criminal courts and the introduction of an independent prosecution service and the broad shifts in penal policy that have taken place in the post war era This volume examines the changing politics of law and order charting the gradual shift toward greater political conflict and dispute Until the early 1970s law and order rarely occupied a privileged place in political debate From that point this began to change with initially the Conservatives utilising crime and penal policy as a means of distinguishing themselves from their opponents This volume charts these changes in the politics of law and order and examines the rise in the temperature of political debate around such issues as the Labour Party markedly shifted its direction in the 1990s This book will be of interest to students of British political history criminology and sociology

Breaking the Pendulum Philip Goodman, Joshua Page, Michelle Phelps, 2017-03-20 The history of criminal justice in the U S is often described as a pendulum swinging back and forth between strict punishment and lenient rehabilitation While this view is common wisdom it is wrong In *Breaking the Pendulum* Philip Goodman Joshua Page and Michelle Phelps systematically debunk the pendulum perspective showing that it distorts how and why criminal justice changes The pendulum model blinds us to the blending of penal orientations policies and practices as well as the struggle between actors that shapes laws institutions and how we think about crime punishment and related issues Through a re analysis of more than two hundred years of penal history starting with the rise of penitentiaries in the 19th Century and ending with ongoing efforts to roll back mass incarceration the authors offer an alternative approach to conceptualizing penal development Their agonistic perspective posits that struggle is the motor force of criminal justice history Punishment expands contracts and morphs because of contestation between real people in real contexts not a mechanical swing of the pendulum This alternative framework is far more accurate and empowering than metaphors that ignore or downplay the importance of struggle in shaping criminal justice This clearly written engaging book is an invaluable resource for teachers students and scholars seeking to understand the past present and future of American criminal justice By demonstrating the central role of struggle in generating major transformations *Breaking the Pendulum* encourages combatants to keep fighting to change the system

Young Criminal Lives Barry S. Godfrey, Pamela Cox, Heather Shore, 2017 *Young Criminal Lives* is the first cradle to grave study of the experiences of some of the thousands of delinquent difficult and destitute children passing through the early English juvenile reformatory system The book breaks new ground in crime research speaking to pressing present day concerns around child poverty and youth justice and resonating with a powerful public fascination for family history Using innovative digital methods to unlock the Victorian life course the authors have

reconstructed the lives families and neighbourhoods of 500 children living within or at the margins of the early English juvenile reformatory system Four hundred of them were sent to reformatory and industrial schools in the north west of England from courts around the UK over a fifty year period from the 1860s onwards Young Criminal Lives is based on one of the most comprehensive sets of official and personal data ever assembled for a historical study of this kind For the first time these children can be followed on their journey in and out of reform and then through their adulthood and old age The book centres on institutions celebrated in this period for their pioneering new approaches to child welfare and others that were investigated for cruelty and scandal Both were typical of the new kind of state certified provision offered from the 1850s on to children who had committed criminal acts or who were considered vulnerable to predation poverty and the inheritance of criminal dispositions The notion that interventions can and must be evaluated in order to determine what works now dominates public policy But how did Victorian and Edwardian policy makers and practitioners deal with this question By what criteria and on the basis of what kinds of evidence did they judge their own successes and failures Young Criminal Lives ends with a critical review of the historical rise of evidence based policy making within criminal justice It will appeal to scholars and students of crime and penal policy criminologists sociologists and social policy researchers and practitioners in youth justice and child protection

Law, Technology and Society Roger Brownsword, 2019-02-18 This book considers the implications of the regulatory burden being borne increasingly by technological management rather than by rules of law If crime is controlled if human health and safety are secured if the environment is protected not by rules but by measures of technological management designed into products processes places and so on what should we make of this transformation In an era of smart regulatory technologies how should we understand the regulatory environment and the complexion of its regulatory signals How does technological management sit with the Rule of Law and with the traditional ideals of legality legal coherence and respect for liberty human rights and human dignity What is the future for the rules of criminal law torts and contract law are they likely to be rendered redundant How are human informational interests to be specified and protected Can traditional rules of law survive not only the emergent use of technological management but also a risk management mentality that pervades the collective engagement with new technologies Even if technological management is effective is it acceptable Are we ready for rule by technology Undertaking a radical examination of the disruptive effects of technology on the law and the legal mind set Roger Brownsword calls for a triple act of re imagination first re imagining legal rules as one element of a larger regulatory environment of which technological management is also a part secondly re imagining the Rule of Law as a constraint on the arbitrary exercise of power whether exercised through rules or through technological measures and thirdly re imagining the future of traditional rules of criminal law tort law and contract law

Taking Care of Business Matthew Bacon, 2017-02-08 Taking Care of Business Police Detectives Drug Law Enforcement and Proactive Investigation offers a rich and insightful empirical study of drug investigations based on extensive fieldwork

undertaken with the specialist detective units of two English police services It fills a significant gap in criminological literature by providing a timely and thought provoking ethnography of detective culture investigative practice and drug law enforcement Drawing on data collected from over five hundred hours of direct observation of ordinary police work both on and off the streets the chapters are skilfully interwoven with fieldnotes informal conversations interviews and analysis of official documents Taken together they explore how police officers perceive the drug world and their role in it translate policy from its written form into action and utilise intelligence led policing strategies to instigate covert operations and make cases There is in depth examination of the everyday realities of the war on drugs alongside the associated working rules tacit understandings and underlying assumptions that operate behind the public face of police organizations The book also critically examines the most pertinent legislative initiatives organizational reforms and shifts in thinking concerning the values objectives and norms of policing that have occurred over recent decades which between them have contributed to significant changes in the ways that detectives are trained and investigations are controlled and carried out With highly salient insights regarding operational policing and drug control policy in the current social economic and political climate Taking Care of Business is a compelling and important work on contemporary criminal investigation and the policing of drugs It will be of interest to scholars of criminology sociology law and policy studies especially those researching and studying policing regulation surveillance drug control policy and the informal economy as well as policymakers police practitioners and criminal justice professionals

Law and Personality Disorder Ailbhe O'Loughlin, 2025-06-03 In 1999 policymakers in England and Wales advanced controversial proposals for the preventive detention of a group they termed dangerous people with severe personality disorders Against a background of uncertain scientific knowledge legal and policy actors have long faced challenges in reconciling the need to prevent crime with the need to respect the rights of the dangerous Ailbhe O Loughlin s book Law and Personality Disorder situates contemporary debates about dangerous offenders within this decades old battle between the proponents of liberal legal principles and advocates of social defence Law and Personality Disorder deconstructs competing images of offenders with personality disorders and the dilemmas they present combining insights from criminology psychiatry psychology and law The book thus critically engages with an alluring narrative the state has a duty to protect the public from dangerous individuals but it can also protect the human rights of the dangerous by providing them with rehabilitation opportunities While human rights law is often invoked as a means of curbing the excesses of preventive justice O Loughlin demonstrates that the case law of the European Court of Human Rights tends to legitimise coercive measures Criminal law furthermore enables the punishment of offenders with mental disorders by resisting psychiatric evidence that they may not be fully responsible for their actions Examining gaps in sentencing law mental health law and human rights law this innovative book offers readers a comprehensive interpretation of the laws governing offenders with personality disorders and puts forward proposals for reform

Sentencing and Criminal Justice Andrew

Ashworth, Rory Kelly, 2021-07-15 This revised and updated new edition focuses on major developments in sentencing law practice and theory Sentencing in England and Wales is now dominated by Sentencing Council guidelines and scrutiny of those guidelines is central to this book Issues of principle are identified and discussed to include the constitutional position of the Sentencing Council the meaning of and challenges to proportionality and the sentencing of BAME offenders and women offenders The book welcomes the new Sentencing Code introduced as the Sentencing Act 2020 and critically examines the government's plans for sentencing reform set out in the 2020 White Paper A Smarter Approach to Sentencing Throughout the book sentencing is explored in its wider criminal justice context making it essential reading for courses on sentencing criminal justice and criminal law

Predictive Sentencing Jan W de Keijser, Julian V Roberts, Jesper Ryberg, 2019-05-16 Predictive Sentencing addresses the role of risk assessment in contemporary sentencing practices Predictive sentencing has become so deeply ingrained in Western criminal justice decision making that despite early ethical discussions about selective incapacitation it currently attracts little critique Nor has it been subjected to a thorough normative and empirical scrutiny This is problematic since much current policy and practice concerning risk predictions is inconsistent with mainstream theories of punishment Moreover predictive sentencing exacerbates discrimination and disparity in sentencing Although structured risk assessments may have replaced gut feelings and have now been systematically implemented in Western justice systems the fundamental issues and questions that surround the use of risk assessment instruments at sentencing remain unresolved This volume critically evaluates these issues and will be of great interest to scholars of criminal justice and criminology

Changing Contours of Criminal Justice Mary Bosworth, Carolyn Hoyle, Lucia Zedner, 2016-11-17 Celebrating the 50th Anniversary of the Oxford Centre for Criminology this edited collection of essays seeks to explore the changing contours of criminal justice over the past half century and to consider possible shifts over the next few decades The question of how social science disciplines develop and change does not invite any easy answer with the task made all the more difficult given the highly politicised nature of some subjects and the volatile evolving status of its institutions and practices A case in point is criminal justice at once fairly parochial much criminal justice scholarship is now global in its reach and subject areas that are now accepted as central to its study victims restorative justice security privatization terrorism citizenship and migration to name just a few were topics unknown to the discipline half a century ago Indeed most criminologists would have once stoutly denied that they had anything to do with it Likewise some central topics of past criminological attention like probation have largely receded from academic attention and some central criminal justice institutions like Borstal and corporal punishment have at least in Europe been abolished Although the rapidity and radical nature of this change make it quite impossible to predict what criminal justice will look like in fifty years time reflection on such developments may assist in understanding how it arrived at its current form and hint at what the future holds The contributors to this volume have been invited to reflect on the impact Oxford criminology has had on the discipline providing

a unique and critical discussion about the current state of criminal justice around the world and the origins and future implications of contemporary practice All are leading internationally renowned criminologists whose work has defined and often re defined our understanding of criminal justice policy and literature

Life Imprisonment and Human Rights

Dirk van Zyl Smit,Catherine Appleton,2016-12-01 In many jurisdictions today life imprisonment is the most severe penalty that can be imposed Despite this it is a relatively under researched form of punishment and no meaningful attempt has been made to understand its full human rights implications This important collection fills that gap by addressing these two key questions what is life imprisonment and what human rights are relevant to it These questions are explored from the perspective of a range of jurisdictions in essays that draw on both empirical and doctrinal research Under the editorship of two leading scholars in the field this innovative and important work will be a landmark publication in the field of penal studies and human rights

Technology, Governance and Respect for the Law

Roger Brownsword,2022-09-29 In the context of the technological disruption of law and in particular the prospect of governance by machines this book reconsiders the demand that we should respect the law simply because it is the law What does the law need to look like to justify our respect Responding to this question the book takes the form of a dialectic between on the one side the promise of the prospectus for law and on the other the discontent provoked by the performance of law in practice this is followed by a synthesis Four pictures of law are considered two are traditional pictures law as order and law as just order and two are prompted by the technological disruption of law law as governance by machines and law as self governance by humans These pictures are tested in five performance areas contract law criminal law biolaw information law and constitutional law The synthesis revealing the complexity of the demand for respect highlights three particular points First the only prospectus for law that clearly commands respect is one that is committed to protecting the global commons the preconditions for humans to form their own communities with their own forms of governance second any form of governance by humans will invite reservations and push back against the demand for respect and third governance by machines is not so much a superior form of governance as a radically different form in which questions about respect are redundant This book will appeal to scholars and students with interests in the broad and burgeoning field of law regulation and technology as well as to legal theorists practitioners and others interested in the impact of new technology on law

Handbook on Border Criminology

Mary Bosworth,Katja Franko,Maggy Lee,Rimple Mehta,2024-12-09 This topical Handbook investigates the nature and impact of intersections between border control and criminal justice Using comparative and decolonial perspectives it demonstrates the corrosive effect of harsh border practices not just on those subject to them but to many of the key principles of liberal democracy
