Systemic Circular Economy Solutions for Fiber Reinforced Composites Marcello Colledani, Stefano Turri, 2023-01-07 This open access book provides an overview of the work undertaken within the FiberEUse project which developed solutions enhancing the profitability of composite recycling and reuse in value added products with a cross sectorial approach Glass and carbon fiber reinforced polymers or composites are increasingly used as structural materials in many manufacturing sectors like transport constructions and energy due to their better lightweight and corrosion resistance compared to metals However composite recycling is still a challenge since no significant added value in the recycling and reprocessing of composites is demonstrated FiberEUse developed innovative solutions and business models towards sustainable Circular Economy solutions for post use composite made products Three strategies are presented namely mechanical recycling of short fibers thermal recycling of long fibers and modular car parts design for sustainable disassembly and remanufacturing The validation of the FiberEUse approach within eight industrial demonstrators shows the potentials towards new Circular Economy value chains for composite materials **Engineer-in-training Reference Manual** Michael R. Financial Innovation and Engineering in Islamic Finance

Samir Alamad,2017-04-13 This book provides two important contributions to existing theories in the financial innovation literature First it extends the existing literature of innovation orientation to a completely new field and construct that is based on a religious imperative as a framework within which financial innovation is constrained It explains how an innovation orientation in IFIs can be directed within religious rules which indicates that innovation orientation in IFIs is a learning philosophy Second the book introduces and examines the plasticity of Shariah as a shared boundary object and its dynamic role in managing tension and conflicting values in the financial innovation process Furthermore building on the empirical results the study illustrates the insights that each theoretical lens affords into practices of collaboration and develops a novel analytical framework for understanding religious orientation towards financial innovation This practical contribution of the developed framework could form the basis for a standardised framework for the Islamic finance industry The book concludes by noting the policy and managerial implications of its findings and provides directions for further research
