the theme of electronic health records into the field of pharmacy On the face of it both of these would seem to provide a way of improving service However the more we use technology the more it is important to examine underlying values and ethical issues and this leads to an increased focus on developing and maintaining the autonomy and responsibility of the patient or customer Rolv Blaker Eileen Nafstad and Norman Andressen then take the focus to psychology Blaker directly addresses the ideology that may be predominant in a society and thus may be reflected in any professional practice whereas Norman Anderssen and Ingrid Dundas take this further in analyzing underlying ideologies in teaching research methodology in psychology Hilde Eileen Nafstad in the following chapter takes this theme to a more profound level by focusing on the ideology based assumptions in research on human suffering concretized by studies of Post Traumatic Stress Syndromes in relation to war experiences Simon Robinson invites us to look at the moral context of employability and Elizabeth Ozorak looks at the world views and values underlying the student experience of service or volunteer learning Bruce Macfarlane takes the debate further in chapter eight by focusing on the academic profession and the idea of academic citizenship Derek Sellman takes this theme and applies it to the profession of nursing while Joan Whitman Hoff in her chapter takes us into what still for many people is uncharted ethical territory the world of IT as it used in teaching Suzy Jagger's chapter focuses on the teaching of computer ethics Like Sellman she wants to focus on the moral development of the students and looks to how this might be charted Development ethical development or any other involves change and John Strain considers whether we ought to take history more seriously in the ethical education In an age which is persistently confronted with innovation it is understandable that ethics is regarded as something that people will find compelling on account of its innovative character This book then argues that Applied and Professional Ethics is not to be confined to any predetermined shape Along with the dilemmas and the theories there are those underlying values and world views that are of equal importance in creating ethos and community and in enabling creative response Such values are there at the heart of virtue ethics Because of the plurality of the educational and professional community values and perspectives and assessments of values differ and thus dialogue is at the heart such ethics This book suggests that the teaching of Applied and Professional Ethics has to engage at all these levels and thereby both take seriously all aspects of ethics for living and working All of these chapters began their life as either keynote lectures or papers at the Second International Conference on Teaching Applied and Professional Ethics in Higher Education the Real World Real People Conference Ethics in a Virtual World London 30th August to September 1st 2005 International Joint Conference SOCO'17-CISIS'17-ICEUTE'17 León, Spain, September 6-8, 2017, Proceeding Hilde Pérez García, Javier Alfonso-Cendón, Lidia Sánchez González, Héctor Quintián, Emilio Corchado, 2017-08-21 This volume includes papers presented at SOCO 2017 CISIS 2017 and ICEUTE 2017 all conferences held in the beautiful and historic city of Le n Spain in September 2017 Soft computing represents a collection of computational techniques in machine learning computer science and some engineering disciplines which investigate simulate and analyze highly complex issues and

Harris, Jr., Eyad Masad, 2015-06-22 This volume identifies discusses and addresses the wide array of ethical issues that have emerged for engineers due to the rise of a global economy To date there has been no systematic treatment of the particular challenges globalization poses for engineering ethics standards and education This volume concentrates on precisely this challenge Scholars and practitioners from diverse national and professional backgrounds discuss the ethical issues emerging from the inherent symbiotic relationship between the engineering profession and globalization Through their discussions a deeper and more complete understanding of the precise ways in which globalization impacts the formulation and justification of ethical standards in engineering as well as the curriculum and pedagogy of engineering ethics education emerges The world today is witnessing an unprecedented demand for engineers and other science and technology professionals with advanced degrees due to both the off shoring of western jobs and the rapid development of non Western countries The current flow of technology and professionals is from the West to the rest of the world Professional practices followed by Western or Western trained engineers are often based on presuppositions which can be in fundamental disagreement with the viewpoints of non Westerners A successful engineering solution cannot be simply technically sound but also must account for cultural social and religious constraints For these reasons existing Western standards cannot simply be exported to other countries Divided into two parts Part I of the volume provides an overview of particular dimensions of globalization and the criteria that an adequate engineering ethics framework must satisfy in a globalized world Part II of the volume considers pedagogical challenges and aims in engineering ethics education that is global in character Corporate Social Responsibility in the Construction Industry Michael Murray, Andrew Dainty, 2013-01-11 The construction process right through from planning and design to use and demolition has a major impact on society Traditionally concern has been focused on its environmental impact and the quest for sustainability but this has now extended into the wider remit of Corporate Social Responsibility CSR Essentially this means that businesses must act voluntarily in a socially ethical manner by developing a policy that encompasses the core principles enshrined by CSR A unique presentation on a topic of emerging importance Corporate
