Research and Materials Development for Language Learning is the only book available to focus on the interaction between second language acquisition theory and materials development for language learning. It consists of contributions written by experts in SLA, experts in materials development, researchers who have expertise in both fields, and introductions and conclusions by the editor. The book is organized into four major sections: position statements, materials driven by SLA theory, evaluations of materials in relation to SLA theory, and proposals for action that offer a diverse range of perspectives while maintaining a cohesive and comprehensive overview on the subject. This book is ideal for post graduate courses in applied linguistics and second language acquisition and for researchers interested in the relationship between SLA and materials development.

Collocations and Action Research Joshua Brook Antle, 2018-02-22. *Collocations and Action Research* is a thorough investigation of both the theory and practice behind improving second language learners' vocabulary and fluency through the teaching of multi word units of language. Taking these collocations as its focus, this book provides a clear and in depth description of the cognitive processing language learners go through when producing speech in relation to them. Using the findings of a two year action research study into improving learners' spoken fluency, Joshua Brook Antle also explores the practical sides of collocations, explaining how the research study was constructed and conducted. Orientating the findings within the larger field of second language acquisition, especially within the L2 classroom, the practical applications of the findings are then presented through a series of pedagogical tasks, all focusing on collocations and productive fluency. Providing a template for how to conduct an action research study using both qualitative and quantitative research techniques, *Collocations and Action Research* will appeal to researchers interested in vocabulary and spoken fluency, as well as language instructors wanting to better understand the nature of vocabulary and spoken discourse.

Cieřlicka, 2015-01-26. *Bilingual Figurative Language Processing* is a timely book that provides a much needed bilingual perspective to the broad field of figurative language. This is the first book of its kind to address how bilinguals acquire, store, and process figurative language, such as idiomatic expressions, such as 'kick the bucket', metaphors such as 'lawyers are sharks', and irony, and how these tropes

might interact in real time across the bilingual s two languages This volume offers the reader and the bilingual student an overview of the major strands of research both theoretical and empirical currently being undertaken in this field of inquiry At the same time Bilingual Figurative Language Processing provides readers and undergraduate and graduate students with the opportunity to acquire hands on experience in the development of psycholinguistic experiments in bilingual figurative language Each chapter includes a section on suggested student research projects Selected chapters provide detailed procedures on how to design and develop psycholinguistic experiments *Syntax-Based Collocation Extraction* Violeta Seretan,2011-01-04 Syntax Based Collocation Extraction is the first book to offer a comprehensive up to date review of the theoretical and applied work on word collocations Backed by solid theoretical results the computational experiments described based on data in four languages provide support for the book s basic argument for using syntax driven extraction as an alternative to the current cooccurrence based extraction techniques to efficiently extract collocational data The work described in Syntax Based Collocation Extraction focuses on using linguistic tools for corpus based identification of collocations It takes advantage of recent advances in parsing to propose a novel deep syntactic analytic collocation extraction that has applicability to a range of important core tasks in Computational Linguistics The book is useful for anyone interested in computational analysis of texts collocation phenomena and multi word expressions in general **DASAR-DASAR**
