Training Jack C. Richards, 1998-02-13 *Beyond Training* examines the nature of second language teacher development and how teachers' practices are influenced by their beliefs and principles It seeks to move discussion of language teacher development beyond the level of training which reflects a technical view of specific teaching practices Instead it takes a more holistic approach to teacher development built on the notion of the teacher as critical and reflective thinker The argument pursued throughout is that teacher education needs to engage teachers not merely in the mastery of techniques but in an exploration of the knowledge beliefs and attitudes that underly their teaching practices *Above and Beyond the Segments*

Johanneke Caspers, Yiya Chen, Willemijn Heeren, Jos Pacilly, Niels O. Schiller, Ellen van Zanten, 2014-12-15 *Above and Beyond the Segments* presents a unique collection of experimental linguistic and phonetic research Mainly it deals with the experimental approach to prosodic and more specifically melodic aspects of speech But it also treats segmental phonetics and phonology second language learning semantics and related topics Apart from European languages and dialects including Dutch English Greek Danish and dialects from Italy and The Netherlands there also are chapters on regions as widespread as China Russia South Africa South Sudan and Surinam These all testify the enormous diversity of language and speech in the world This book is of special interest to linguists working on prosodic aspects of speech in general and to those studying non Western languages in particular **Research Methods and Design Beyond a Single Discipline** Heting Chu, 2024-04-01

Effects in Instructional L2 Learning Simone E. Pfenninger, David Singleton, 2017-04-21 This book constitutes a holistic study of how and why late starters surpass early starters in comparable instructional settings Combining advanced quantitative methods with individual level qualitative data it examines the role of age of onset in the context of the Swiss multilingual educational system and focuses on performance at the beginning and end of secondary school thereby offering a long term view of the teenage experience of foreign language learning The study scrutinised factors that seem to prevent young starters from profiting from their extended learning period and investigated the mechanisms that enable late beginners to catch up with early beginners relatively quickly Taking account of contextual factors individual socio affective factors and instructional factors within a single longitudinal study the book makes a convincing case that age of onset is not only of minimal relevance for many aspects of instructed language acquisition but that in this context for a number of reasons a later onset can be beneficial
